जयपुर, दिनांक : 30.11.2011

जिला कलक्टर,  
जयपुर।

विषय:—राजस्थान उच्च न्यायालय द्वारा एसबी सिविल रिट पिटीशन 11153/11  
के अन्तर्गत पारित आदेश दिनांक 23/8/2011 एवं 8/9/2011 के  
क्रियान्वयन के संबंध में।

प्रसंग:—अब्दुल रहमान बनाम राजस्थान राज्य एवं अन्य (DBSWP No 1536/03)

महोदय,

उपरोक्त विषयान्तर्गत माननीय राजस्थान उच्च न्यायालय ने जयपुर स्थित रामगढ़ बांध के बहाव क्षेत्र (Catchment area) में हुए अतिक्रमण एवं निर्माण को अत्यन्त गंभीरता से लेते हुए आदेश दिया है कि ऐसे किसी प्रकार का निर्माण कार्य नहीं किया जाये जो रामगढ़ बांध में पानी की आवक को अवरुद्ध करता हो एवं साथ ही बांध के बहाव क्षेत्र में हुए निर्माण/अतिक्रमण को हटाने अथवा उनमें सुधार करने के निर्देश भी दिए हैं जिससे कि पानी के आवक में किसी प्रकार का अवरोध नहीं उत्पन्न हो जैसाकि अब्दुल रहमान के प्रकरण में गठित कमेटी द्वारा प्रस्तुत सुझाव के बिन्दु संख्या 5 में वर्णित है। दिनांक 23/8/2011 को पारित आदेश में माननीय उच्च न्यायालय ने रामगढ़ बांध के बहाव क्षेत्र में आने वाले चार तहसीलों यथा जमवारामगढ़, आमेर, शाहपुरा तथा विराटनगर का उल्लेख करते हुए अब्दुल रहमान के प्रकरण में दिए गए निर्देशों का संदर्भ देते हुए उक्त निर्देशों की पालना नहीं किए जाने का उल्लेख किया है। माननीय राजस्थान उच्च न्यायालय ने रामगढ़ बांध के बहाव क्षेत्र में अब्दुल रहमान के प्रकरण में दिए गए निर्देशों की पालना में संबंधित तथ्यात्मक स्थिति के आकलन के लिए दो सदस्यों की मॉनिटरिंग कमेटी का भी गठन किया गया है। उक्त मॉनिटरिंग कमेटी द्वारा न केवल तथ्यात्मक स्थिति का आकलन किया गया है बल्कि जल बहाव क्षेत्र की 15/8/1947 के अनुसार स्थिति को बहाल करने के संबंध में सुझाव भी प्रस्तुत किए गए हैं। माननीय उच्च न्यायालय द्वारा यह स्पष्ट किया गया है कि उपरोक्त विषयान्तर्गत पारित आदेश प्रथमतः रामगढ़ बांध के बहाव क्षेत्र के संबंध में है तथा इसके पश्चात् इसकी क्रियान्विति जयपुर जिले के विभिन्न जल संसाधनों से संबंधित होगा एवं तत्पश्चात् सम्पूर्ण राज्य में इसे लागू किया जाना अनिवार्य होगा।

(क) उपरोक्त परिपेक्ष्य में जिला कलक्टर, जयपुर को निर्देशित किया जाता है कि उपरोक्त वर्णित आदेश दिनांक 23/8/2011 एवं 8/9/2011 के अन्तर्गत रामगढ़ बांध के बहाव क्षेत्र में आने वाले चार तहसीलों जमवारामगढ़, आमेर, शाहपुरा एवं विराटनगर के ग्रामीण क्षेत्रों का गहन सर्वेक्षण करवाकर यह सुनिश्चित कर लें कि ग्रामीण विकास एवं पंचायती राज विभाग/नरेगा/भू-संरक्षण एवं जलग्रहण की विभिन्न योजनाओं के अन्तर्गत कराये गये निर्माण कार्यों से रामगढ़ बांध के बहाव क्षेत्र (Catchment area) में पानी के स्वाभाविक आवक मार्ग में अवरोध नहीं हो एवं यदि निर्माण कार्यों में किसी प्रकार का अवरोध उत्पन्न हो गया हो तो अब्दुल रहमान के प्रकरण में माननीय उच्च न्यायालय के निर्देशों पर गठित विशेषज्ञ कमेटी द्वारा प्रस्तुत सुझाव के अनुसार उसे या तो हटाया जाये अथवा पानी की आवक को पूर्ववत् बहाल करने हेतु कारगर उपाय किये जायें। इस संबंध में ग्रामीण विकास योजना के अलावा पंचायती राज संस्थाओं को उपलब्ध कराये गये टीएफसी, एसएफसी अथवा अनटाईड फण्ड की राशि का उपयोग नियमानुसार किया जा सकता है।

(ख) उपरोक्त वर्णित आदेश तथा अब्दुल रहमान के प्रकरण में गठित विशेषज्ञ कमेटी के सुझाव तथा माननीय उच्च न्यायालय का प्रासंगिक आदेश दिनांक 23/8/11 एवं 8/9/11 तथा मोनीटरिंग कमेटी की रिपोर्ट ग्रामीण विकास एवं पंचायती राज विभाग की वेबसाईट [www.raipanchayat.gov.in](http://www.raipanchayat.gov.in) पर सहज अवलोकनार्थ उपलब्ध करा दिये गए हैं तथा इसी क्रम में अब निम्न आदेश दिए जाते हैं:-

1. माननीय उच्च न्यायालय द्वारा गठित मॉनिटरिंग कमेटी की रिपोर्ट का अध्ययन करें तथा तदनुसार आवश्यक कार्यवाही करना सुनिश्चित करें।
2. माननीय उच्च न्यायालय द्वारा पारित आदेश दिनांक 8/9/2011 में अब्दुल रहमान के प्रकरण में दिए गए निर्णय के पैरा संख्या 15 का उल्लेख किया गया है जिसमें विभिन्न प्रकार के सुझावों का भी वर्णन किया गया है, जिसका अध्ययन कर तदनुसार कार्यवाही किया जाना सुनिश्चित करावें।
3. जैसाकि आपको विदित है कि ग्रामीण विकास एवं पंचायती राज विभाग द्वारा भी विभिन्न योजनान्तर्गत ग्रामीण क्षेत्रों में एनीकट का निर्माण कराया जाता है। अतः आपको निर्देशित किया जाता है कि किसी भी परिस्थिति में 2 मीटर से ऊंचे एनीकट का निर्माण नहीं किया जायें। यह उचित होगा कि इस संबंध में भी जल संसाधन विभाग से आवश्यक परामर्श कर लिया जाये। 2 मीटर से अधिक ऊंचाई के एनीकट जल संसाधन विभाग से अनापत्ति प्राप्त करने के पश्चात् ही निर्मित किये जाये। अगर 2 मीटर से अधिक ऊंचाई के एनीकट का निर्माण बिना जल संसाधन विभाग की अनापत्ति के कर लिया गया हो तो ऐसे एनीकट को चिन्हित कर, Waste Weir के माध्यम से अथवा अन्य किसी कारगर उपाय के माध्यम से यह सुनिश्चित किया जाये कि एनीकट की प्रभावी ऊंचाई 2 मीटर के बराबर ही हो अर्थात् 2 मीटर की ऊंचाई के एनीकट के बराबर ही पानी का भराव रहे एवं यह किसी भी नदी/नाले/तालाब/अन्य सार्वजनिक जलाशय के भराव क्षेत्र में पानी के आवक मार्ग को अवरुद्ध नहीं करें।

4. अब्दुल रहमान के प्रकरण में दिए गए निर्देशों में उल्लिखित विशेषज्ञ कमेटी द्वारा दिये गए सुझावों के बिन्दु सं० 9 के अनुसार ग्रामीण क्षेत्र में स्थित तालाब इत्यादि में पानी की आवक के मार्ग में पक्का नाला का निर्माण कराया जावे जिससे कि घरेलू तथा औद्योगिक अवशिष्ट का मिश्रण न हो एवं प्रदूषण रहित पानी का आवक इन जलाशय में हो।
5. नरेगा योजनान्तर्गत अनुमत कार्यों में ग्रामीण सड़कों के कार्यों के साथ-साथ जल संधारण का कार्य भी अनुमत है। उचित होगा कि 2 मीटर तक की ऊंचाई के एनीकट के संबंध में भी जल संसाधन विभाग से परामर्श कर लिया जाये। 2 मीटर से अधिक ऊंचाई वाले एनीकट के लिए जल संसाधन विभाग को ही कार्यकारी एजेंसी बनाया जाये जिससे कि कार्य स्वीकृत करते समय माननीय उच्च न्यायालय के निर्देशों का पूरा ध्यान रखा जा सके।
6. इसी प्रकार से ग्रामीण क्षेत्रों में बनाई जा रही ग्रेवल सड़क इत्यादि को स्वीकृत करने से पूर्व यह सुनिश्चित कर लिया जाये कि उनके निर्माण से किसी भी नदी, नाले अथवा तालाब के जल बहाव क्षेत्र में अवरोध पैदा न हो एवं ऐसी स्थिति होने की संभावना हो तो जल संसाधन विभाग से परामर्श कर पानी के बहाव को यथावत रखने हेतु कारगर कदम उठाये जाये।
7. भू-संरक्षण एवं जलग्रहण विभाग द्वारा भी ग्रामीण क्षेत्रों में जलग्रहण (Water shed) के कार्य कराये जाते हैं, उचित होगा कि उनके द्वारा भी वाटरशैड कार्यों के अन्तर्गत कराये जाने वाले कार्य इस प्रकार से स्वीकृत किए जायें कि किसी भी नदी, नाले अथवा अन्य जल संरक्षण जलाशय में पानी की आवक अवरुद्ध न हो। एनीकट का निर्माण भी उपरोक्त वर्णित बिन्दु संख्या 3,4 एवं 5 में दिए गए निर्देशों के अनुसार ही स्वीकृत एवं निर्मित किए जाए।
8. प्रत्येक गांव में स्थित शामलात भूमि का चिन्हितकरण कर यह सुनिश्चित किया जाये कि उसमें किसी प्रकार का अवैध निर्माण/अतिक्रमण न हो अथवा कोई ऐसा निर्माण कार्य नहीं हो जो नदी/नाले/भराव क्षेत्र के पानी के आवक मार्ग को अवरुद्ध करते हों। अवैध निर्माण/अतिक्रमण होने की स्थिति में उन्हें समयबद्ध तरीके से एवं विधिवत रूप से हटाया जाये जैसाकि बिन्दु संख्या (क) में वर्णित है एवं तत्पश्चात् ऐसी भूमि को नरेगा अथवा अन्य ग्रामीण विकास योजनान्तर्गत नियमानुसार विकसित किया जाये। नरेगा योजनान्तर्गत चारागाह विकास के दिशा निर्देश दिनांक 26/3/2011 को जारी परिपत्र एवं दिनांक 29/9/2011 को जारी पुस्तिका "चारागाह भूमि के विकास हेतु कार्यकारी निर्देश" में दिये गए हैं, जिनकी पालना भी सुनिश्चित करावें।

कृपया उपरोक्त निर्देशों की पालना सुनिश्चित करें एवं प्रत्येक विकास खण्ड के संबंध में आप द्वारा की गई कार्रवाई की रिपोर्ट प्रथमतः 15 दिवस एवं तत्पश्चात् मासिक रिपोर्ट प्रस्तुत करें।

(सी0एस0 राजन)

अतिरिक्त मुख्य सचिव

प्रतिलिपि निम्नांकित को सूचनार्थ एवं आवश्यक कार्यवाही हेतु प्रेषित हैं:-

- 1- अतिरिक्त मुख्य सचिव, जल संसाधन।
- 2- प्रमुख शासन सचिव, राजस्व/कृषि।
- 3- शासन सचिव, ग्रामीण विकास एवं आयुक्त नरेगा।
- 4- निदेशक, भू-संरक्षण एवं जलग्रहण विभाग।
- 5- समस्त जिला कलक्टर/मुख्य कार्यकारी अधिकारी, जिला परिषद्/विकास अधिकारी को प्रेषित कर लेख है कि उपरोक्त दिशा निर्देशों के अनुरूप बिन्दुवार वांछित कार्यवाही आप अपने स्तर पर सुनिश्चित करवाने का श्रम करावें।

उप शासन सचिव(विधि)

IN THE HIGH COURT OF JUDICATURE FOR RAJASTHAN  
AT JAIPUR BENCH, JAIPUR

S.B. Civil Writ Petition No.11153/2011  
Suo Motu Versus State of Rajasthan

Date of Order :: 23.8.2011

**HON'BLE MR. JUSTICE M.N. BHANDARI**

Mr.G.S. Bapna, Advocate General with Mr. V. Garg - for  
the State.

<><><>

Learned Advocate General, Mr. G.S. Bapna has submitted the latest report of Ramgarh Dam prepared by Water Resources Department, Jaipur and detailed map prepared by the Geological Survey of India, which has given complete picture of the catchment area. This includes flow of water through Tala River and Banganga River along with its tributaries. Both the documents are taken on record.

As per the information given, around 415 anicuts exist in the catchment area of Ramgarh Dam apart from construction of roads by PWD as well as Agriculture Marketing Board. Activities of the Forest Department, Rural Development Department, Irrigation Department and also activities of the villagers have been focused to show obstruction in free flow of water towards Ramgarh Dam. It seems that not only there exists lack of coordination between

various Departments of the State of Rajasthan but unawareness of the judgment of this Court in the case of Abdul Rehman Versus State of Rajasthan and others - DBCWP No.1536/2003 decided on 2.8.2004, as a result of which, Ramgarh Dam, constructed in the year 1903 at Banganga River, is not getting water. The catchment area of the Dam is 769.20 square km. in Jaipur District. It is spread over four Tehsils, namely, Jamvaramgarh, Amer, Shahpura and Viratnagar. Aforesaid Dam was even source of irrigation till 1978. It was then kept as source of drinking water for Jaipur City but, due to unorganized activities of the various Departments, water resources for Jaipur City is lacking water.

For Asian Games, Ramgarh Dam was used for sports activities. Thus, it is not an old story where Ramgarh Dam was full of water. Prima facie reasons given in the report show involvement of various Departments, however, to take care of the problem, no effective steps have been taken, despite the fact that Government was under an obligation to take effective measures even for implementation of the judgment of this Court in the case of Abdul Rehman (supra). The minutes of the meeting dated 22.12.2004 has been brought to the notice of the Court and is accordingly taken on record. A period of seven years has already passed even after the aforesaid meeting. It seems that there exists lack of

coordination and willingness of the Government to take required measures as directed by this Court. This is more so when scarcity of water in the State of Rajasthan is not unknown.

In the aforesaid circumstances, care has to be taken to monitor action of various Departments to save the water resources in the State of Rajasthan and initially for Ramgarh Dam. This is more so when the Government incurred huge money to bring water to various cities but it is not trying to save the old sources of water.

As per the news report flashed even after the issuance of the notice by this Court, encroachments in the catchment area and construction of farmhouses therein have been reported, yet no proposal has been placed before this Court for removal of encroachments or constructions illegally raised, which is quite unfortunate. Primarily, the Forest Department, Environment Department, Revenue Department and Irrigation Department are required to be called upon to show as to what action has been taken by them for implementation of the judgment of this Court in the case of Abdul Rehman (supra) and presently for Ramgarh Dam. In the case of Abdul Rehman (supra), a direction was given to maintain position of all the drainages, channels, nalas, rivers and its tributaries etc. as was existing on 15.8.1947 with a further direction to declare

5

4

it to be a Government land.

Perusal of the report placed on record does not show any action on the part of the Government. The inaction on their part cannot be appreciated thus it has become necessary for this Court to constitute a Monitoring Committee of two Advocates to look into implementation of the judgment in the case of Abdul Rehman and presently in regard to Ramgarh Dam. Accordingly, I nominate following Advocates to be Member of the Monitoring Committee:-

- (i) Shri Virendra Dangi, Sr. Advocate
- (ii) Shri Ashok Kumar Bhargava, Advocate

Aforesaid Monitoring Committee has been constituted not only to assist this Court but to visit the area concerned also. This may be after perusal of the revenue record and other record to see the position of the catchment area as was existing on 15.8.1947 and accordingly to monitor the implementation of the judgment in the case of Abdul Rehman and, if need be, to assist the Court by giving their valuable suggestions so that not only all the encroachments can be removed effectively but the position is restored in the manner indicated by this Court in the judgment *supra*. Since the problem is of complex nature, hence, they would be at liberty to seek expert advice from the Government Officers or their

4/12

agencies which includes as to how the forest can be maintained and further plantation can be undertaken to attract the rain, presently for catchment area of Ramgarh Dam. The Members of the Monitoring Committee would be provided complete assistance by all the Departments of State of Rajasthan. A vehicle for visiting the area concerned, as and when required may be provided to the committee members by the Government.

The Principal Secretary, Forest Department will submit statement as to how much area pertains to the Forest Department in four tehsils named above along with details as to whether any person/body has been authorized to undertake agriculture or any other work belonging to the forest land. The statement would further include as to how much amount has been incurred for plantation in the area and also to maintain the forest already existing. On getting the aforesaid statement, further direction would be given, if so required.

The Principal Secretary, Revenue Department would place the record showing position of the land of catchment area, as was existing on 15.8.1947. He will also indicate as to whether any encroachment exists in the land belonging to the channels, drainages, nalas or rivers falling in four tehsils named above. He will also indicate as to whether any effective

4/11

7  
6  
action has been taken to remove such encroachment and as to whether any allotment of land has been made therein.

The Principal Secretary, Water Resources will indicate as to what can be immediate measures to get water in Ramgarh Dam, so that in coming years, it may get water. The PHED and Environment Department of the State will cooperate with him for that purpose. Officers of PHED and Environment Department are also directed to cooperate in the matter and to give their suggestions for improvement of water resources with proper plantation so as to maintain even ecology of the area.

It is made clear that if any information is found to be contrary to the ground realities then necessary order would be passed for taking appropriate action against the Department concerned. However, at present following directions are given to the respondents:

- ✓ (i) All the Departments involved in the present matter like Revenue, Forest, Irrigation, PHED, Environment, Mining, Panchayati Raj are directed to cooperate with each other to stop encroachment and illegal construction in the drainages, channels, nalas, river etc. in the four téhsils named above.
- ✓ (ii) State Government will ensure stoppage of encroachment and construction in the catchment area of

### Ramgarh Dam.

(iii) Forest and Revenue Departments are restrained to lease out or allow any construction or for other use, in the

catchment area of Ramgarh Dam. They will also indicate as to

in which part, encroachment, construction or any allotment was made in the catchment area contrary to the revenue record as on 15.08.1947.

(iv) State Government will come out with the plan for removal of encroachments so as to restore the position as was existing on 15.8.1947.

(v) Advice of experts of Geological Survey of India may be taken to restore the position of catchment area of Ramgarh Dam.

(vi) Strict compliance of the aforesaid directions may be made and it would otherwise be monitored by the Monitoring Committee so constituted.

(vii) It is clarified that the Monitoring Committee would be given access to the Government record of catchment area along with timely visit with the assistance of the Officers to see restoration of the position of the land as was existing earlier.

(viii) The order aforesaid has been given presently for Ramgarh Dam but after completion of action, further direction would be given for other water resources in Jaipur district and thereafter for State of Rajasthan as time has come to make all efforts to save water so as the forest to save State of

Rajasthan to face any drought.

(ix) The Secretary, Mines Department will indicate as to whether any mining activities are going on in the catchment area. It should be based on the revenue record as on 15.08.1947.

(x) The State Government is directed to provide map of catchment area after taking it from "Google".

Learned Advocate General submits that matter may be taken up on 8.9.2011 to complete the instructions and to submit the statement as directed. It is given out that matter would be given top priority as even the Government intend to solve the water problem of the State of Rajasthan and for that purpose, they do not want to leave any stone unturned. The Government will make all efforts to see that catchment areas are not only saved but restored to its original position.

Aforesaid is appreciated with a hope that the Government will give all priorities to save water resources in State of Rajasthan and it will not let them die for lack of coordination between various Departments.

List this case accordingly on 8.9.2011 as a first case.

  
(M.N. BHANDARI), J.

12  
Certified Copy of Order Dated 8/9/11

**S.B. CIVIL WRIT PETITION NO.11153/2011**  
(Suo Motu Vs. State of Rajasthan)

Date of Order : 08<sup>th</sup> September, 2011

**HON'BLE MR. JUSTICE M.N. BHANDARI**

Mr.G.S.Bapna, Advocate General with Mr.V.Garg, for the State.  
Mr.Ashok Bhargava ]  
Mr.Virendra Dangi ], members of the Monitoring Committee.

Heard learned Advocate General, Members of the Monitoring Committee and learned counsel Mr.S.R.Surana.

The Monitoring Committee has produced a report along with photographs and CD to draw attention of this Court in regard to the encroachment and other issues pertaining to Ramgarh Dam. They have thoroughly surveyed the area and on physical inspection, given detailed report, which is taken on record. A copy of the said report has already been given to learned Advocate General, who prays for time to go through the report and look into the suggestions given by the Monitoring Committee.

Vide the order dated 23<sup>rd</sup> August, 2011, this Court issued certain directions for compliance by various departments. However, other than the preparation of map of the catchment area through "Google", no information, as required has been furnished.

Learned Advocate General prays for and is granted time to do the needful in compliance of the order dated 23<sup>rd</sup> August, 2011. However, that would be as a last opportunity.

The informations as required are nothing but largely based on record available in the various departments and the physical position of the area to find out as to whether allotments have been made in violation of provision of law, apart from the information regarding encroachment and construction on the government land blocking the free-flow water in Ramgarh Dam.

It was made clear that presently the issue has been taken in regard to the Ramgarh Dam but, on second occasion, it would be for Jaipur district and, later on, for whole State of Rajasthan. For the aforesaid purpose, a reference of the judgment of this Court in the case of *Abdul Rehman Vs. State of Rajasthan & Ors.* reported in 2004 (4) WLC 435 has been given. Therein, after a detailed survey, a report was presented for all the reservoir area in State of Rajasthan by remote sensing. Based on the aforesaid report and the suggestions given by the Committee, number of directions were given by the Division Bench of this Court. A period of seven years has passed thereupon, however, other than one meeting, the report of which is available on record, there is no other information as to

consideration to the suggestions given by the Committee as otherwise reflected in the judgment in the case of Abdul Rehman (supra). Since, complete details of all the areas in State of Rajasthan is available with the State Government pursuant to the earlier directions given by the Division Bench in the case of Abdul Rehman (supra), it was expected from the State Government to make use of the aforesaid report to save catchment areas so that rivers, dams, channels, tanks may not remain empty. Even in the year 2011, rainfall in the State of Rajasthan is more than the average yet, as per the news flashed in newspaper, many of the dams are dry. That needs to have a concern by the State Government to find out as to why water is not flowing in those dams.

Presently, the issue has been taken for Ramgarh Dam only but, it is again made clear that the Monitoring Committee will work for the entire State to save reservoir areas and the water resources areas. The cooperation of the Collectors of different districts is also required for that purpose so that, with the help of the Collector and Revenue Department, no illegal allotments are made, more specifically, in violation of Section 16 of the Rajasthan Tenancy Act, 1955 (hereinafter to be referred as "the Act of 1955"). Section 16 of the Act of 1955 is quoted hereunder for ready reference:

"16. Land in which Khatedari rights shall not be accrue-

Notwithstanding anything in this Act [in any other law or enactment for the time

being in force in any part of the State] Khatedari rights shall not accrue in-

- (i) pasture land;
- (ii) land used for casual or occasional cultivation in the bed of river [or tank];
- (iii) land covered by water and used for the purpose of growing Singhara or other like produce;
- (iv) land under shifting or unstable cultivation;
- (v) land comprised in gardens owned and maintained by the State Government;
- (vi) land acquired or held for a public purpose or a work of public utility;
- (vii) land which, at the commencement of this Act or at any time thereafter, is set apart for military encamping grounds;
- (viii) land situated within the limits of cantonment;
- (ix) Land included within railway or canal boundaries;
- (x) land within the boundaries of any Government forest;
- (xi) municipal trenching grounds;
- (xii) land held or acquired by educational institutions for purpose of instruction in agriculture or for play-ground; and
- (xiii) land within the boundaries of a Government agricultural or grass farm;
- (xiv) land which has been set apart or is, in the opinion of the Collector, necessary for flow of water thereon in to any reservoir or tanka for drinking water for a village or for surrounding

villages]:

Provided that that State Government may, by notification in the [Official Gazette] declare that any land which is under shifting or unstable cultivation, shall cease to be a land for such cultivation and thereupon such land shall be available for the grant of Khatedari rights and the State Government may by a like notification, declare that any land which was not at the commencement of this Act under shifting or unstable cultivation shall at any time after such commencement be under such cultivation from such date as may be specified in the notification and thereupon such land shall be available for such cultivation."

Perusal of Section 16 (ii) (iii) and (xiv) shows that allotments in certain areas are prohibited and thereby various departments of State of Rajasthan, more specifically, the Revenue and Panchayat Departments have to take note of and to ensure compliance of Section 16 of the Act of 1955 along with many other provisions.

Since the matter is in regard of Ramgarh Dam at present, even officers of the Jaipur Development Authority (hereinafter to be referred as "the J.D.A.") are required to assist the learned Advocate General to ensure that if any allotment, encroachment and construction exists on the government land, either on the catchment area or nearby, Ramgarh Dam, necessary steps would be taken to remove such construction/encroachment/allotment so as to allow flow of water in Ramgarh Dam. Similar steps have to be taken by all the

concerned departments.

Looking to the aforesaid, following directions are further given for compliance by the State Government:

(1) The State Government will show as to what action has been taken in regard to the directions given by this Court in the case of Abdul Rehman (Supra). For ready reference, the suggestions given by the Committee, which are quoted in para 15 of the said judgment, are quoted hereunder:

"15. The Committee has made suggestions for restoring the catchment areas to their original shape and use:

"(3) Suggestions for restoring the catchment areas to their original shape and use;

Looking to the site visit by the State Level Expert Committee in September 2003 and General Survey Reports received from the District Collectors and Chairmen, District Expert Committee, following suggestions are made:

1. All land shown as drainage channels like nalla, rivers, tributaries etc. as on 15.8.1947 should be declared as Govt. land. Any conversions made after 15.8.1947 should be declared illegal. The relevant

act and rules must be amended accordingly.

2. Demarcation of catchment areas should be done by construction pillars at suitable spacing depending upon size of the catchment area with the help of GT sheet of scale 1:25000 or 1:50000 and/or "Water Shed Atlas of Rajasthan" prepared by the State Remote Sensing Application Centre, Jodhpur.
3. Demarcation of drainage channels -
  - (i) In uninhabited areas this can be done by installing pillars at suitable spacing or by constructing side wall depending upon size of drainage channel and its importance.
  - (ii) In urban and rural areas, the demarcation of drainage channels must essentially be done by constructing side walls of appropriate height and thickness.
4. In the government owned lakes and other water bodies, the Khatedari rights of private persons in their submergence area should be brought under the ownership of the government.
5. The drainage channels in the catchment areas should be got inspected by engineering professionals and Patwaris. Wherever there are obstructions in nalla, it should be suitably removed by constructing culverts, deepening and widening of nallas etc.

6. Wherever there are any construction activities, which may interfere with the flow of water in drainage channels, no objection certificate must be obtained from the irrigation department.

7. The Anicuts more than 2m height above deepest nalla bed should be identified. The height more than 2m should be dismantled.

8. Wherever residential colonies have been constructed obstructing flow in drainage channels, the obstruction must be removed and nallas may be deepened/constructed.

9. On the periphery of lakes, ponds, water bodies in urban and rural areas, a pucca drain should be constructed on periphery of the water body to prevent entry of domestic, industrial and other waste in the water body.

10. For soil conservation work, suitable guidelines must be issued by the "Watershed & Soil Conservation Department" so that these works make minimum possible interference with the flow of water.

11. The district administration should specify places for dumping various types of waste material. If any body is found to dump the waste material in other places, particularly drainage channels, then suitable punishment should be provided in the law.

12. The government should use television, radio and newspapers to create awareness in this matter.

13. Possibility should be explored to use marble slurry as construction material, for filling depressions etc. as has been done for disposal of fly ash from Thermal Power Houses.

14. The water quality of water bodies should regularly be monitored.

15. Wherever over-burden or waste materials generated from mines and processing units, have been dumped obstructing flow of water in drainage. For that purpose, special condition should be incorporated in the lease/license agreement."

There are manifold directions to save catchment area and reservoir in State of Rajasthan. A period of seven years has already passed, thus what steps have been taken in compliance of the said judgment, should be brought in record before the next date.

(2) At present, the Forest Department will come with the programme for plantation in Jaipur district. The photographs taken by the Monitoring Committee show that

areas are not having proper plantation, more specifically near catchment area of Ramgarh Dam. At many parts, even illegal mining is going on. That needs to be checked by the Forest Department with the help of Mining Department as well. By the next date, the Forest Department will indicate their programme for plantation in Jaipur district and the duration for implementation. They will also ensure that if any of the area of the Forest Department is occupied or encroached upon, such encroachment would be removed by the next date or at least, it would be brought on record to indicate as to which are the areas encroached upon by any person/s.

(3) The departments will also ensure that no tree is allowed to be cut without permission of the Collector if not falling in the forest area. Therein, it would be ensured that no tree is cut in the sanctuary area.

(4) The Revenue Department will come out

with the details as to what action has been taken pursuant to the judgment in the case of Abdul Rehman (supra). If they have already identified the cases of encroachments or illegal allotments, they will indicate as to what action has been taken. If any action has been taken then what is the status thereof, as the Principal Secretary of the Revenue Department informed that many cases are pending before the Revenue Board on References made by the Collector. The detail of such cases may also be given to this Court, presently for the Jaipur district.

(5) The Revenue Department will further ensure that if any allotment has been made by the Authorities in violation of provision of law then information about those officers would also be furnished to this Court along with information as to what action has been taken or proposed to be taken by the Department as no officer can be left free if he/she has committed illegality in making allotment more particularly in violation of Section 16

of the Act of 1955 or otherwise.

(6) The Collector, Jaipur is directed to ensure that if any allotment has been made in an illegal manner, then he will give complete information to this Court about those allotments and follow-up actions. This is in regard to catchment areas of Ramgarh Dam or areas marked as river, pond, nalas, tank etc.

(7) The Mining Department is directed to ensure that no illegal mining is allowed in Jaipur district. This is more particularly and presently, in catchment area of Ramgarh Dam and, if illegal mining is being undertaken by someone, they will undertake required action with the help of the police and, for that purpose, the police department is directed to cooperate with the Mining Department to stop illegal mining completely in the catchment area of Ramgarh Dam. The mining department will further indicate the nature of land on which permission for mining has been granted. They will further take the video-

graphy of area in which illegal mining is going on. It is to ensure that, onwards, if illegal mining is done, then officers of that area concerned may be booked for their delinquencies and for not monitoring the area properly. The video-graphy of area may be undertaken as a first step so that, onwards, if any illegal mining is done in the area concerned, follow-up action may be undertaken immediately. They will further ensure that over-burden removal by the minors may not be placed in the catchment area blocking free flow of water towards Dam. It is further to be ensured that if digging is permitted, mines are abundant, then overburden should be placed to fill-up the dig so that water is not unnecessarily stored in rainy season.

Further plan would be prepared that if a mine is filled with water and is drained out after the rain, whether it can be channalized in the river, which may ultimately flow towards Ramgarh Dam. It is seen and noticed in many of the judgments that the mines filled with the

25

water is then pumped out after rainy season but the water coming out remains un-utilized.

Proper assistance on the aforesaid issue may be taken from the Environment Department and Irrigation Department.

(8) The Irrigation Department will come with the details and data as to what are the areas of Ramgarh Dam which are occupied and encroached upon. They will also ensure that onwards the catchment area and the area of the Dam is not occupied or encroached upon. If any such event takes place then to inform and register the FIR against the person concerned.

(9) The J.D.A. will come out with the details and plan as to what action they are going to take for removing encroachments and constructions in the catchment area and will further ensure that before the next date, encroachments and constructions on the government land are removed. No

colony should be allowed to develop in the catchment area of Ramgarh Dam and, if anybody indulge in doing such practice, proper action be taken forthwith with complete information to this Court.

(10) Since many other departments would be concerned to the whole issue, which includes even the Environment Department, a proper plan and scheme may be framed initially for Jaipur district to protect environment, more specifically, to make it free from pollution. It is seen that dirt of the city goes in the Dam. For that purpose, they will take Kanota Dam as an illustrative case to stop polluted water to come or to see that water is treated if it is flow in the Dam.

(11) The Pollution Department will also cooperate with the Environment Department to stop drainage or dirty water to come in the Dam without treatment.

(12) Complete exercise as directed above

may be undertaken after taking note of the judgment of this Court in the case of **Rajendra Kumar Razdan Vs. State of Rajasthan** decided by the Division Bench of the Principal Seat at Jodhpur in **D.B. Civil Writ Petition No. 4271/1999**. Therein also, certain directions were given to save catchment areas and reservoir. The State Government will further ensure implementation of the directions given therein and come out with the follow-up plan for compliance of the judgment in the case of **Rajendra Kumar Razdan (supra)**. Further information would be furnished to this Court in reference to the judgment of Hon'ble Apex Court in the case of **Jagpal Singh & Ors. Vs. State of Punjab & Ors.**, wherein, the Chief Secretary of every State has been given certain directions to ensure that no illegal and unauthorized allotments are made and if any allotment is made or areas are encroached upon then to make it free from encroachment and then to cancel the allotment in that regard. Para 22 of

17

the said judgment is relevant, thus the same is quoted hereunder:

"22. Before parting with this case we give directions to all the State Governments in the country that they should prepare schemes for eviction of illegal/unauthorized occupants of Gram Sabha/Gram Panchayat/Pora mboke/Shamlat land and these must be restored to the Gram Sabha/Gram Panchayat for the common use of villagers of the village. For this purpose the Chief Secretaries of all State Governments/Union Territories in India are directed to do the needful, taking the help of other senior officers of the Governments. The said scheme should provide for the speedy eviction of such illegal occupant, after giving him a show cause notice and a brief hearing. Long duration of such illegal occupation or huge expenditure in making constructions thereon or political connections must not be treated as a justification for condoning this illegal act or for regularizing the illegal possession. Regularization should only be permitted in exceptional cases, e.g. where lease has been granted under some Government notification to landless labourers or members of Scheduled Castes/Scheduled Tribes, or where there is already a school, dispensary or other public utility on the land."

(13) The Commissioner, J.D.A. is directed to provide space to the Monitoring Committee to work on the directions, which have been given by this Court vide order dated 23<sup>rd</sup> August, 2011 and for further monitoring of the directions issued today. It goes without saying that if any information or inspection report is needed by the Monitoring Committee, it would be suitably provided to them. The Monitoring Committee has made it clear that they would not be charging any amount for giving their services for monitoring the case as per the direction of this Court. I appreciate the aforesaid. They would be provided a vehicle by the JDA as and when they want to inspect the area.

(14) The Panchayati Raj Department will ensure that no work is allowed to be undertaken in catchment area to utilize fund of NREGA. They will indicate as to whether work has been allowed in the name of NREGA to occupy or even to

make construction in the catchment area of Ramgarh Dam.

(15) Complete exercise as directed above, would be undertaken by the State Government through various departments on or before the next date. While complying with the directions, they will ensure that no illegal construction or encroachment and allotment is permitted now onwards as per the order dated 23<sup>rd</sup> August, 2011. It is made clear that compliance of the directions given above and earlier given in the order dated 23<sup>rd</sup> August, 2011 would be undertaken by the State Government by the next date, as the matter would not be deferred further because the Government is expected to give priority to this matter as it is concerned to every common person more specifically to save reservoir and the catchment areas.

List this case accordingly on 27.09.2011, as prayed.

  
(M.N. BHANDARI), J.

and if necessary rules to check corruption and serve the public in a better way are required to be framed, the matter may be referred to the State of Rajasthan to make necessary rules in this regard under Section 15 of 1975 Act.

- (ii) Till necessary Rules are framed under section 15 of 1975 Act, the Conductor/Driver Incentive Scheme 2004 (Green Card Scheme) shall remain inoperative and all the decisions/actions taken under the said scheme shall be treated as nonest.
- (iii) There shall be no order as to costs.

**RAJASTHAN HIGH COURT [JODHPUR]**

PRESENT : Hon'ble Mr. Justice N.N. Mathur;  
Hon'ble Mr. Justice K.K. Acharya

ABDUL RAHMAN

Versus

STATE OF RAJASTHAN & ORS.

D.B. Civil Writ Petition No. 1536/2003 – Decided on 2.8.2004

**Environment – Restoration of catchment area – Public Interest Litigation – Nadi land cannot be used for construction – State directed to consider recommendations of expert committee constituted by State under orders of Court dated 18.7.2003 and to chalk out plan for restoration of catchment areas to their original shape.** (Para 16)

पर्यावरण—जलागम क्षेत्र का पुनःस्थापन—लोकहित वाद—नदी की भूमि, निर्माण में प्रयुक्त नहीं की जा सकती—दि. 18.7.2003 के न्यायालय के आदेश के अन्तर्गत राज्य द्वारा विशेषज्ञ समिति की अनुशंसाओं पर विचार करने तथा जलागम क्षेत्रों को उनकी मूल स्थिति में पुनः लाने का राज्य को निदेश किया गया। (पैरा 16)

**INTERIM ORDER MADE ABSOLUTE AND WRIT PETITION DISPOSED OF WITH ABOVE DIRECTIONS**

**Case Law Referred :**

1. AIR 1985 SC 652.

Mr. Anil Bhandari, for petitioner.

Mr. B.L. Tiwari, Additional Government Advocate.

**BY THE COURT : (PER HON'BLE SHRI MATHUR, J.)**

1. By way of instant 'Public Interest Litigation', petitioner has raised an issue of high public importance emphasizing on the need to protect the tanks/ponds for proper and healthy environment to enable the people to enjoy a quality life which is the essence of right of a citizen under Article 21 of the Constitution of India.

2. Referring to the provisions of Rajasthan Land Revenue Act 1956, it is submitted that no Nadi land can be used for any sort of construction.

3. The backdrop in which the petition has been filed needs to be noticed. There is a gair mumkin Nadi measuring 9 bighas 17 biswas in Khasra No. 253 at Village Marwar Ballia and so also, there is a land measuring 29 bighas 1 biswa in Khasra No. 266 and this land is gair mumkin pasture

land. The land situated in Khasra No. 253 being a gair mumkin Nadi, cannot be used for construction of any sort of building. However, the third respondent viz; Mohd. Yusuf, Sarpanch, Gram Panchayat, Marwar Balia has started construction of a school building in the land situated in Khasra No. 253. It is further stated that some persons made encroachments in the said gair mumkin Nadi land of Khasra No. 253 and those persons served with notice for removing encroachments and thereafter all the encroachments were removed. A direction is sought restraining the respondents to construct the school building in Khasra No. 253, which is a Nadi land.

4. In reply to the writ petition, it has been admitted that in the revenue record, Khasra No. 253 is recorded as gair mumkin Nadi land and Khasra No. 266 as gochar land. However, it is denied that there is any Nadi land over the disputed site. There is 29 bighas and one biswa of land as straight land. There exists various buildings viz; "Aanganbadi", Sub Health Centre, G.L.R. Building etc. It is further stated that large number of residential houses have been built therein. Thus, a proposal has been sent for conversion of the land as "Abadi" land. So far as the construction of the school is concerned, it is submitted that the same is in the larger public interest. In the same area, number of Government buildings have already been constructed.

5. It appears that there has been indiscriminate utilization of the catchment areas for construction and mining purposes which has prevented lakes, reservoirs, rivers, ponds etc. from receiving water even during the rainy season. This Court by order dated 18.7.2003 directed the State Government to undertake a general survey to identify the catchment areas which have been used for construction and mining purposes. It was further directed that survey shall also be undertaken for the purpose of studying the effect of utilization of catchment areas for construction and mining purposes or for other purposes. Further, suggestion was sought for restoring the catchment areas to their original shape and use.

6. Pursuant to the directions of this Court dated 18.7.2003, the State Government constituted an Expert Committee with the following compositions:

- |                                                              |          |
|--------------------------------------------------------------|----------|
| 1. Shri Y.C. Agrawal, Director (MIS), ID&R,                  | Convener |
| Irrigation Department, Sinchai Bhawan, JLN Marg, Jaipur      |          |
| 2. Sh. S.B.L. Mathur, Jt. Director, Jodhpur Range, Watershed |          |
| Development & Soil-Conservation Department, Jodhpur          | Member   |
| 3. Sh. S.S. Dhindsa, Chief Chemist, PHED, Jaipur             | Member   |
| 4. Sh. Rakesh Hirat, Superintending Mining Engineer, Udaipur | Member   |

7. The said Expert Committee has conducted the survey and submitted report to this Court. It appears that the Committee inspected various lakes in Udaipur, Rajsamand and Ajmer. It also met the Government Officials and Non-government persons related to the subject. The Committee also inspected the mining areas to collect the relevant information. General Survey Reports were sought from the District Collectors and Chairman, District Expert Committee from all districts. District wise abstracts of obstructions in catchment areas of reservoirs/ponds/lakes etc. and obstructions to be removed as referred in General Survey reports received from the District Collectors and Chairman District Expert Committee were carefully considered. General Survey of the obstructions was undertaken by the Remote Sensing Technology.

8. We are happy to note that the State Government spared 22.70 lacs for the purpose of survey to State Remote Sensing Application Centre,

Jodhpur. The Committee found that at some places, proper drainage crossing in embankments, residential colonies and other construction activities have not been provided to allow free and uninterrupted water in drainage channels. This has resulted in reduction of catchment areas of lakes, reservoirs, rivers, ponds etc. and filling of water bodies in the State. Due to soil conservation works, watershed works & water harvesting structures the run off from the catchment areas has been reduced. Untreated domestic waste, industrial waste and other wastes are falling in water storage bodies, causing the deterioration of quality of water. This has caused biological growth of various types. It is further found that wherever the excavation in mining leases goes below natural ground level, the water from the adjoining area gets entry into the mine and fill it, thus reducing quantity of water reaching the water bodies like lakes, reservoir etc. It is further observed that wherever there are deep mines, they are de-watered to do mining operations. This lowers down the ground water table and creates scarcity of water for drinking and agriculture. The dumping of marble slurry and other waste into drainage channels has caused reduction in their water carrying capacity and thus reduced quantity of water reaching the water bodies.

9. The problem of environmental pollution has been recognized as a worldwide disaster. Development without regard to the ecological equilibrium has led to an environment crisis. Urbanization, modernization and the race for technological and industrial development has caused the ecological imbalance. The Constitution (Forty-Second Amendment) Act, 1976 has made it a fundamental duty of the State and citizens to protect and improve the environment.

10. Article 48A of the Constitution provides that –

“The State shall endeavour to protect and improve the environment and to safeguard the forests and wildlife of the country.”

11. Article 51A of the Constitution provides that –

“To protect and improve the natural environment including forests, lakes, rivers and wild-life and to have compassion for living creatures.”

12. Thus, the Constitutional provisions, on the one hand give directions to the State for the protection and on the other, cast a duty on every citizen to help the preservation of natural environment.

13. Article 21 of the Constitution of India guarantees every citizen of India the right to life and personal liberty. The Apex Court has elevated the environmental concerns to the level of a fundamental right as falling under Article 21 of the Constitution.

14. In Rural Litigation and Entitlement Kendra Vs. State of U.P. reported in AIR 1985 SC 652, the Supreme Court made a detailed order regarding the working of the limestone quarries in the Dehradun Mussorie belt. There are series of decisions wherein the Supreme Court has affirmed that every citizen has fundamental right to take enjoyment of quality of life and living as contemplated by Article 21 of the Constitution of India. Thus, it is felt that there is a need to adopt the regulatory measures so as to maintain a proper balance between the conservation of natural resources and the protection of the ecological environment on one hand, the need for development and of the industrial growth of the country on the other.

15. The Committee has made suggestions for restoring the catchment areas to their original shape and use:

“(3) Suggestions for restoring the catchment areas to their original shape and use;

Looking to the site visit by the State Level Expert Committee in September 2003 and General Survey Reports received from the District Collectors and Chairmen, District Expert Committee, following suggestions are made:

1. All land shown as drainage channels like nalla, rivers, tributaries etc. as on 15.8.1947 should be declared as Govt. land. Any conversions made after 15.8.1947 should be declared illegal. The relevant act and rules must be amended accordingly.
2. Demarcation of catchment areas should be done by construction pillars at suitable spacing depending upon size of the catchment area with the help of GT sheet of scale 1:25000 or 1:50000 and/or “Water Shed Atlas of Rajasthan” prepared by the State Remote Sensing Application Centre, Jodhpur.
3. Demarcation of drainage channels —
  - (i) In uninhabited areas this can be done by installing pillars at suitable spacing or by constructing side wall depending upon size of drainage channel and its importance.
  - (ii) In urban and rural areas, the demarcation of drainage channels must essentially be done by constructing side walls of appropriate height and thickness.
4. In the government owned lakes and other water bodies, the Khatedari rights of private persons in their submergence area should be brought under the ownership of the government.
5. The drainage channels in the catchment areas should be got inspected by engineering professionals and Patwaris. Wherever there are obstructions in nalla, it should be suitably removed by constructing culverts, deepening and widening of nallas etc.
6. Wherever there are any construction activities, which may interfere with the flow of water in drainage channels, no objection certificate must be obtained from the irrigation department.
7. The Anicuts more than 2m height above deepest nalla bed should be identified. The height more than 2m should be dismantled.
8. Wherever residential colonies have been constructed obstructing flow in drainage channels, the obstruction must be removed and nallas may be deepened/constructed.
9. On the periphery of lakes, ponds, water bodies in urban and rural areas, a pucca drain should be constructed on periphery of the water body to prevent entry of domestic, industrial and other waste in the water body.
10. For soil conservation work, suitable guidelines must be issued by the “Watershed & Soil Conservation Department” so that these works make minimum possible interference with the flow of water.
11. The district administration should specify places for dumping various types of waste material. If any body is found to dump the waste material in other places, particularly drainage channels, then suitable punishment should be provided in the law.
12. The government should use television, radio and newspapers to create awareness in this matter.
13. Possibility should be explored to use marble slurry as construction material, for filling depressions etc. as has been done for disposal of fly ash from Thermal Power Houses.

14. The water quality of water bodies should regularly be monitored.

15. Wherever over-burden or waste materials generated from mines and processing units, have been dumped obstructing flow of water in drainage channels; diversion drains and check walls must be constructed. For that purpose, special condition should be incorporated in the lease/license agreement."

16. Having given thoughtful consideration to the issue involved and the suggestions made, we direct the State Government to consider the recommendations of the Committee referred to above and chalk out a plan to take the effective steps for restoring the catchment areas to their original shape. It is made clear that this order will not prevent the State Authorities from drawing-up or taking further steps more effectively to fulfill the objects of the directions issued by this Court. Three months' time is granted for giving positive shape to the suggestions. The interim order dated 9.4.2003 granted by this Court is made absolute.

### RAJASTHAN HIGH COURT [JAIPUR BENCH]

PRESENT: Hon'ble Mr. Justice Shiv Kumar Sharma

GANPAT LAL MATHUR & ORS.

Versus

MREC

S.B. Civil Writ Petition No. 5507/2000—Decided on 2.8.2004

Service Law—Selection Grade—Withdrawal of—Natural Justice—Selection grade earlier granted to petitioners withdrawn without giving opportunity of hearing to petitioners—Orders of recovery quashed.

(Paras 5-7)

सेवा विधि—चयन वेतनमान—उसका समय हरण—नैसर्गिक न्याय—याचियों को पूर्व में स्वीकृत चयनमान को उन्हें सुनवाई का बिना अवसर दिये बिना प्रत्याहृत किया गया—वसूली के आदेश अभिखण्डित किए गए।

(पैरा 5-7)

**WRIT PETITION ALLOWED—IMPUGNED ORDER QUASHED**

Malish Bhandari, for the petitioners.

Naina Sarraf, for the respondent.

BY THE COURT :

1. Instant writ petition preferred by five petitioners raises a common question of law, as to whether benefit of selection grade once granted can be withdrawn unilaterally?

2. As per the undisputed facts all the petitioners after serving the respondent institute stood retired. The petitioners while they were in service had been granted selection grade in view of the Circular dated January 25, 1992 of the State of Rajasthan. After retirement of the petitioners the respondent decided to withdraw the benefit of selection grade so granted to the petitioners and orders of recovery from the retirement benefits were issued. The said orders have been impugned by the petitioners in this writ petition.

3. The respondent in its return raised preliminary objection in regard to maintainability of the petition and averred that

IN THE HIGH COURT OF JUDICATURE FOR  
RAJASTHAN AT JAIPUR BENCH JAIPUR

---

S.B.CIVIL WRIT PETITION NO.11153/2011

Suo Moto Versus State of Rajasthan

MONITORING COMMITTEE REPORT.

----

TO

THE HON'BLE CHIEF JUSTICE  
AND HIS OTHER HON'BLE COMPANION  
JUDGES OF THE HIGH COURT OF  
JUDICATURE FOR RAJASTHAN AT  
JAIPUR BENCH JAIPUR.

MAY IT PLEASE YOUR LORDSHIPS:

The humble Members. of the  
Monitoring Committee submit  
preliminary and observation report  
in pursuance to the Hon'ble Court  
order dated 23.8.2011 relating to  
the Catchment area of Ramgarh Dam  
apart from construction of roads by

*Handwritten:*  
Recd. Copy  
05/09/11

Public Works Department (P.W.D.) and other departments as under:-

1. That the Members of the Monitoring Committee visited the area concerned and perused the part revenue record and other record to see / find out the position of catchment area as was existing on 15.8.1947, which is made available to the Members of the Monitoring Committee.

On 27.8.2011, the learned Advocate General also accompanied the Monitoring Committee alongwith the State Government officers.

Ramgarh Dam was constructed in the year 1903 for the capacity of 7480 MCM and covers gross catchment area of 769.20 Sq. Km. This Dam has been silted upto the depth of 4.57 M

(15.0 Ft.) approximately  
resulting into reducing its storage  
capacity. The capacity survey can be  
done in future by the Committee for  
the correct assessment and actual  
storage capacity of the Ramgarh Dam  
as within a short period the  
capacity survey is not possible.  
The whole catchment area of Ramgarh  
Dam is covered by four Tehsils  
namely Amer, Ramgarh, Shahpura and  
Viratnagar. The details of the  
catchment area made available to  
the Committee tehsil-wise regarding  
water bodies is annexed and marked  
as Exhibit-1.

On perusal of the details of  
the encroachers it comes out that  
at Ghati Ghanshyampura, Gram  
Panchayat Sagred Kalan of Khasra  
No. 293 Rakba 4114, the Highness of  
Jaipur is a Khatedar but Usha wife

of Shri Banwari Lal Kejriwal has made construction on it. Khasra No. 373 Rakba 723 Bighas & 13 Biswas and on Khasra No. 380, 13 Bighas is in the name of Ex. H.H. of Jaipur and on nearly 723 Bighas & 13 Biswas land, encroachment is there near Pump House of PHED. The Hotel belongs to H.H. Jaipur has been leased to Taj Group & Engineering Department is also existing upon that land. The encroachment is in total land 69 Bighas & 18 Biswas by Ex. H.H. of Jaipur namely 'Blue-Forest' near 'Barkhanda Ka Nala'. Similarly in Village Govidiyana, Gram Panchayat Samred Kalan, Khasra No.17, Rakba 570, the Gram Panchayat Samred Kalan constructed Grawel Road on various Khasras and constructed Pakka Rooms. Due to it, the flow of water into the Dam is seriously affected, therefore for revival of

the flows into the Dam, it is  
necessary to remove them in the  
existing water bodies in the  
catchment area of Dam.

A very surprising feature also came to the knowledge of the Committee that land existing in some of the villages which fall within the 'PERIPHERAL-AREA' (Doob-Area) of the Ramgarh Dam is also find registered in the name of Ex. H.H. Jaipur in Revenue record as 'Khatedar'.

Although the entire area could not be inspected / surveyed within the short period as the area is big one, but it is reported that there are 451 water bodies including large number of Pucca Anicuts some of which raised to the height of 8-10 Meters in the catchment area of

Ramgarh Dam intercepting water coming into the Dam which can be suitably removed or modified. The present structures are besides other Anicuts / Contours bunding constructed by various departments so also by Watershed Department of the State Govt., which is obstructing the flow of running water. The water bodies are small Anicuts (JOHADS) upto the height of approximately 5 M to large Anicuts of the height upto 10 M. Water is also obstructed by construction of ditches and bunding alongwith the contours in foot of hills. The height of contour bunding can be observed from 4 meter to 8 meter and covered almost the entire hills in forest area and due to unplanned construction of these bundings the water is entrapped before coming to the drains.

The roads have been constructed  
by various Panchayats raised on 1-3  
meter high embankments in the  
catchment area at various places.  
The roads are constructed across  
the main river obstructing the  
significant volume of water. No  
provision for cross drainage works  
has been made. The long roads have  
been constructed by various  
Panchayat Samities across the Tala  
River before it joins the Banganga  
which breached recently during the  
year 2010 rains due to absence of  
adequate cross drainage works which  
resulted into blockade of good  
water flow into the Ramgarh Dam else  
it would have filled-up in a single  
day, as before in the year 1975/  
1981.

The Soil Conservation Department  
has covered nearby 773.55 Sq. Km

within the catchment area which reduced velocity of flow of water resulting into higher infiltration as well as higher rate of evaporation. Several mining activities existing and still going on at number of places in the catchment area which are nearby the Village Kant, Bilonchi and Chandwaji. The mining activities in the catchment area causes obstructions in the natural flow of the rain water. No representative or officer or record of the Mining Department was available in the team during the field visit, therefore, the required information could not be collected by the Committee.

The Committee was surprised to note that in the area of Village Kant (on 'Acharol to Kant Road') a

Board is fixed in the name and style "TRIVENI CITY-I" where the entire chunk of land has been leveled by Tractors and which has covered almost half portion of nearby Anicut and has thus occupied 'Siwai Chak land'. On deep query / enquiry it is brought to the notice of the Committee that the Jaipur Development Authority (J.D.A.) has regularized the land for construction of the Colony to the Khatedar. The J.D.A. officers did not accompany the members of the Monitoring Committee, hence information could not be obtained, the matter is reported to the learned Advocate General to take immediate effective steps to check and control the activity of the concerned Khatedar of constructing / establishing the colony.

In most of the catchment area, the farmers and other influential residents of the area or of outer areas have constructed WHS (JOHAD) in the form of 'Dolls' or 'Made Bandi' (low height earthen dams) in their farm / land which harvest the water for their local purpose. This act retains significant water obstructing the flow created in the streams resulting in less water flow. The overall catchment area have been severely affected / deteriorated by constructing large number of water bodies in the catchment area and, therefore, their removal is necessary to get flow of water in the Dam.

2. That in the catchment area it is found that many Kachchi Jhopri (Huts) attached with the Pump House and Pucca big house (Kothi) is

constructed and it is reported that it is in the Khasra of Ex-Highness of Jaipur. The removal of these big houses and Kachcha houses attached with it are required to be removed as the same fall within the Peripheral Area (Doob Area) of the Ramgarh Dam and has not only created obstruction in the flow of water in the catchment area but would also cause eminent danger to the lives of residents / occupants of these houses, in case of heavy rain fall. The Monitoring Committee tried to get some photographs of the illegal constructions made by such encroachers creating obstruction in the catchment area and the same are herewith submitted alongwith the report for kind perusal of the Hon'ble Court.

The Monitoring Committee found that at some places in the catchment area, the construction of Anicuts has been done by various departments like Irrigation, forest, Panchayats, etc. which are creating great obstructions in allowing free and uninterrupted flow of water in the channels resulting in reduction of catchment area of rivers namely Banganga & Tala and ultimately of Ramgarh Dam. The watershed or newly constructed Kachchi Doli of big height is also creating obstruction in the flow of the water due to soil conservation works, the watershed works and water harvesting structures to run from the catchment area to the Dam. Few various type of wastes, falling in water storage bodies causing deterioration of quality of water, also causes biological growth of various types

insects & viruses resulting into deterioration of over all environment. The mining goes below the natural ground level and the water coming from the Hills of the adjoining areas get entry into the mine and fill it thus reducing quantity of water reaching the water bodies in the catchment area. More-over, when the deep mines are dewatered for the mining operations it is certainly harmful for the entire catchment area. This lowers down the ground water table and creates scarcity of water for drinking and agriculture. The dumping of various slurry and other wastes into the drainage channels also cause reduction in water carrying capacity and reduce the quantity of water reaching the water bodies.

The problem of environmental pollution has been recognized as a world-wide disaster development without regard to the ecological equilibrium as led to an environmental crisis. Urbanization, modernization and the race for technological and industrial development also caused the ecological imbalance. The 42<sup>nd</sup> Constitution Amendment Act, 1976 made fundamental duty of the State and Indian citizens to protect and improve the environment. As the situation exists today in the Ramgarh Dam and its Catchment areas, there can be no two opinions that it has proved failure on the part of the State Government to protect and improve the environment.

(3) The Monitoring Committee found that the directions issued in the

case of Abdul Rehman Versus State  
of Rajasthan and others in D.B.  
Civil Writ Petition No.1536/2003  
decided on 2.8.2004, no steps in  
respect of implementation of the  
suggestions given by the expert  
committee has been taken by  
the State Government authorities,  
which has resulted into the problem  
of environmental pollution,  
encroachment in the catchment area,  
diversion of way of water going to  
the tributaries, rivers etc. In-  
action of the State Govt. has hit  
to the Constitutional provisions  
pertaining to endeavour to  
protect and improve the  
environment, to safeguard the  
forest and wild life of the country,  
to protect and improve the natural  
environment including forest,  
lakes, rivers and wild life for  
compassion to living creatures. Day

by day citizens of Jaipur are facing great hardship in getting the water. We cannot forget that during last year the water supply was given on alternate day in certain areas of the Jaipur City. This is totally unreasonable and the Government must pay serious attention to the supply of water daily at least once in a day in the Jaipur City.

The Monitoring Committee do not hesitate in mentioning that the shortage of water in Jaipur City rather especially in Ramgarh lake is due to indiscipline /non-serious act of the State Government Departments such as; Irrigation, PHED, JDA, Rural Development, Forest, Pollution Control Board, Mines, Revenue, etc., therefore, it is suggested that the Hon'ble Court should issue affective directions to

them to save the water in the catchment area of Ramgarh Dam.

SUGGESTIONS:

(I) All the activities in the catchment area by different departments of the State Govt. which are contributing in deterioration of the catchment area deserves to be stopped immediately without any further delay.

(II) Water bodies having high structure can be getted / modified and water bodies of low height can be removed immediately. To served the purpose of local need the structure can be allowed with the water column retained water upto 0.75 M.

(III) The main river is in Sandy soil and at many locations river course is too wide causing shallow depth of run of which in turn leads to more evaporation and percolation into river bed. A detailed survey of channelization and deep study of the river is necessary by experts so that the significant 'run-of' can be generated with the minimum evaporation and infiltration losses. Framing / deviation in the main river course be discouraged and strictly prohibited.

(IV) No Pucca structure, masonry wall, compound wall, Anicuts, Pucca House construction, High water-shed, road without permission of this Court and approval of the expert and other construction which cause obstruction in the flow of water

towards the catchment area should be allowed in any existing forum/ farm houses in the vicinity of the main river / Nala.

(V) Presently no rain gauge station is there in the entire catchment area of Ramgarh Dam. The gauge and discharged site along with full equipment with adequate staff be installed & deputed at each tributary so that the realistic hydrological studies can be taken into account in respect of change in the rain fall pattern.

(VI) All land shown as drainage channel like Nala, River, tributary as on 15.8.1947 should be declared the Government land. Any conversion made by any authority after 15.8.1947 should be declared illegal for which appropriate legal

process be adopted by the government authorities.

(VII) Demarcation of the Catchment area should be done with the help of experts within a period of three months positively. The State Government should take up this matter at war level. The government owned Anicuts and other water bodies which are creating obstructions in the flow of water should be removed immediately or be modified keeping in mind that the modification do not create any obstruction in flow of the water. The Khatedari rights of private Khatedars in the entire Ramgarh Dam area should be brought under the ownership of the Government by following the legal process.

(VIII) The drainage/ river channel in the catchment area should be got stopped by Engineers, Patwaries on alternate years basis and ensure that any obstruction in the catchment area should be removed immediately by initiating criminal and civil proceedings against the defaulting Khatedar(s) or any person(s), if they are found engaged in any activity of any sort of construction which may interfere with the free flow of water in channels. A serious view is required to be taken against such defaulting person(s) / Khatedar(s). The irrigation and other concerned departments may be instructed that in any circumstance, no construction activity or any other activity be allowed, which creates obstruction in the flow of water, and the same be taken seriously. All Anicuts,

except any exceptional  
circumstanced, should be dismantled  
immediately. No residential colony  
should be allowed to be constructed  
in the entire area as reported  
hereinabove in the Kant village, a  
Khatedar is constructing a  
residential colony on his land  
including on the 'Siwai Chak' land  
for which reference along with the  
photographs is reported. On the  
periphery of Johads, ponds, water  
bodies in urban and rural areas a  
Pucca drainage system should be  
constructed on periphery of the  
water bodies to prevent entry of  
domestic, industrial and other  
wastes in the water bodies. For soil  
conservation work, strict and  
suitable guidelines be issued by the  
Watershed and Soil Conservation  
Department so that these works make  
minimum possible interference with

the flow of water. The district administration should specify place for dumping various type of waste material & if any one is found guilty for dumping of various type of waste material at some other place, then provision should be made in the law to punish him / them.

(IX) To create awareness in the public, government should make use of Television, Radio and Newspapers for relaying, broadcasting, televising, publishing certain specific programmes made specially for this purpose. The water quality of water bodies should regularly be monitored by senior officers of the concerned department(s) under intimation to the Hon'ble Court or the Monitoring Committee appointed by the Hon'ble Court at least for a

period of three years. No untoward activities should be allowed in any circumstances.

(X) Wherever waste material generated from Mines and by other means, which is being dumped obstructing flow of water of drainage channels, such lease(s) / license(s) of the Mining should be directed to be cancelled and mining in these areas be stopped with immediate effect and the dumped waste be directed to be removed clearing the obstruction.

(XI) The Mining operation should not be allowed to be operated and should be closed down forthwith. The Forest Department should improve greenery in the entire area for which necessary steps should be

taken by the concerned department(s)  
immediately.

In pursuance to the Order dated  
23.8.2011, the Report along with  
photographs, CD's and suggestions  
are submitted herewith for kind  
perusal of the Hon'ble Court and  
further orders.

(VIRENDRA DANGI) (A.K.BHARGAVA)
