MARKET INSIGHT

Water Solutions for Global Mining: Competition, Costs & Demand Outlook, 2014–2019

July 2014

About This Market Insight

Market Insight Details

- This Market Insight highlights the following:
 - An in-depth analysis of planned global hard-rock mining activity by mine, mining company, mineral, and US\$ investment.
 - A five-year forecast (2014–2019) of the global hard-rock mining sector's water demand by region and mineral type.
 - A five-year forecast (2014–2019) of the global hard-rock mining sector's water & wastewater treatment investment.
 - Profiles of key water technology equipment and service providers active in the global water for mining sector, including mining revenue rankings of construction & design firms.
 - Profiles of leading mining companies and rankings of revenues per m³ water.
 - Mining company water withdrawals, recycled water use (m³), costs and efficiency ratios.
- This Market Insight analyzes water solutions for copper, gold, nickel, and iron ore, which represent more than 88% of planned hard-rock mining investments worldwide.
- This Market Insight draws on Bluefield Research's Advanced Water Treatment & Desalination Insight Service and its ongoing deliverables.

Geographical Coverage	Water Treatment & Solutions Providers	Construction & Design	Mining Companies
• North America • Latin America • Asia-Pacific • Africa • Europe • Middle East – North Africa	• Abengoa • Acciona • AECI • Ashland Inc. • Aveng Group • BASF Mining • CYTEC • Clariant AG • Doosan • Evoqua • Flowserve Corp. • FLSmidth & Co • GE • IDE Technologies • KSB Group • Kurita Water • Metso • Nalco (Ecolab) • Outotec • Osmoflo • Pall Corp. • Pentair Ltd. • RWL Group • Seven Seas • SNF FloMin Inc. • Suez Environnement • Veolia Water • The Weir Group • Xylem Inc.	• Bechtel • Black & Veatch • Bouygues • Cengiz Construction • CH2MHill • China Geo-Engineering • China Metallurgical • China Railway Group • Chiyoda Corp. • Fluor • Grupo ACS • Hatch • Hochtief AG • Jacobs International • KBR • Kiewit • Layne Christensen • Louis Berger • Mott MacDonald • MWH • PCL Construction • Salfacorp • SNC Lavalin • Sinohydro Group • Skanska AB • SKM • Stantec • Toyo Thai Corp. • URS • Worley Parsons • Others	• Alcoa • AngloAmerican • Barrick • BHP Billiton • Citic Pacific • Codelco • First Quantum • Fortescue • Freeport McMoRan • Glencore • Gold Corp • Newmont • Norilsk Nickel • Nova Gold Res • Rio Tinto • Rusal • Teck • Vale • Others
Company Segments Analyzed			
• Chemical Companies • EPC Firms • Filtration Companies • Mining Companies • Pump & Valve Companies • Specialized Mining Equipment Companies			

Table of Contents

Slide

Section 1 – Introduction

- 2 About This Market Insight
- 3 Summary

Section 2 – Market Drivers & Landscape

- 5 Summary
- 6 Water Stress and Mineral Footprints
- 7 Key Markets & Drivers
- 8 Planned Investments by Project Stage and Country
- 9 Planned Investments by Mineral Type and Country
- 10 Mining Sector Contribution to National GDP
- 11 Policy Drivers – Environmental Regulation
- 12 Policy Drivers – Mining Sector Growth
- 13 Australia Mining Sector Resets
- 14 South Africa Government Long-Term Water Supply Targets
- 15 Southern Africa, A Long-term Draw for Desalination
- 16 Planned Chile Copper Mining Investment & Desalination

Section 3 – Mining Company Water Benchmarks

- 18 Summary
- 19 Company Strategies & Positioning: Landscape Overview
- 20 Water Use by Mining Companies
- 21 Water Use by Source and Region
- 22 Mining Companies – Future Water Risk

Section 4 – Water Solutions Providers

- 24 Summary
- 25 Water Supply Chain Highlighting Key Players
- 26 Meeting the Key Water Challenges in Mining
- 27 Global Desalination for Mining Activity
- 28 Seawater Desalination for Mining Projects
- 29 Leading International EPCs in Mining
- 30 Acid Mine Drainage and Wastewater Treatment
- 31 Large Water Supply & Pipeline Projects

Slide

Section 4 – Water Solutions Providers (continued)

- 32 Recent Water Related M&A and Partnership Activity in the Mining Sector
- 33 Recent Market Entry for Water Suppliers in Mining

Section 5 – Market Outlook

- 35 Summary
- 36 Growth of Mining Production
- 37 Water Use by Mineral Type
- 38 Water Use by Mineral and Country
- 39 Mining Forecast Methodology & Assumptions
- 40 Projected Water Use by Hard Rock Mineral and Region
- 41 Projected Mining Water Use by Region
- 42 Projected Mining Water Use by Source (continued)

Section 6 – Water Solutions Provider Company Profiles

- 44 Chemical Company Profiles
 - AECI
 - Ashland
 - BASF
 - Clariant AG
 - Cytec
 - Dow
 - Kurita
 - Nalco
 - SNF Flomin
- 45 Specialized Mining Company Profiles
 - Aquarion
 - FLSmith & Co.
 - Osmoflo
 - Outotec
 - Pall Corp.

Table of Contents (continued)

Slide #

Section 6 – Water Solutions Provider Company Profiles (continued)

46 Pump & Valve Supplier Company Profiles

Flowserve
KSB Group
Metso
Pentair
The Weir Group
Xylem

47 Diversified Water System Integrator Profiles

Evoqua
GE Water and Process
Suez Environnement
Veolia Water

48 Desalination Company Profiles

Abengoa
Acciona Water
Aveng Water
IDE Technologies
RWL Water
Seven Seas Water
Valoriza Agua

Section 7 – Mining Company Profiles

- 50 Anglo American
- 51 Barrick Gold Corporation
- 52 BHP Billiton
- 53 Codelco
- 54 Freeport McMoRan Copper & Gold
- 55 Fortescue Metals Group
- 56 Glencore Plc
- 57 Goldcorp Inc.

Slide #

Section 7 – Mining Company Profiles (continued)

- 58 Norilsk Nickel
- 59 Newmont Mining Corp.
- 60 Rio Tinto
- 61 Rusal
- 62 Teck Resources
- 63 Vale S.A.

Section 8 – Planned Mining Projects & Investments

65–72 Planned Mining Investment Database (200+ projects)

Inputs include:

Project Name
Project Status
Country
Water Stress
Primary Mineral
Mine Owners (% stake)
Investment (US\$)

Water Solutions for Global Mining: Competition, Costs & Demand Outlook, 2014–2019 is part of Bluefield's Advanced Water Treatment & Desalination Insight Service.

Advanced Water Treatment & Desalination Insight Service provides clients with a steady stream of in-depth analyses of evolving water treatment markets, company strategies, demand shifts, and the underlying drivers for greenfield opportunities..

Learn more at www.bluefieldresearch.com.

Sample Analysis: Key Markets & Drivers (Section 2, Slide 7)

The demand for water solutions is largely bifurcated between securing water supplies (e.g. desalination, groundwater) and mandated treatment of effluents (e.g acid mine drainage), thereby creating a mix of opportunities for water technology and system suppliers.

Key Drivers for Water Technology & Management Solutions

	Chile	Australia	Peru	South Africa	Canada	Brazil	United States	Indonesia
Mining Policies								
Scarcity of Water Supply								
Mine Dewatering Risk								
Acid Mine Drainage								
Primary Mining Products (Hard Rock)	• Copper	• Copper • Gold • Iron • Nickel	• Copper • Gold	• Gold • Iron	• Copper • Gold • Nickel	• Iron • Nickel	• Copper • Gold • Iron	• Gold • Nickel
Mining % GDP	19%	10%	12%	9%	4%	4%	2%	2%

Source: Bluefield Research

Analysis

- More mature economies— Australia, Canada, and the US— have established environmental mandates on mining activities that are slowly being adopted in emerging markets.
- Chile's US\$16.4 million fine on and temporary shutdown of Barrick Gold's operations and Peru's move to evaluate environmental impacts through SENACE signals stronger regulatory enforcement in the region.
- Broader mining oversight— via public pressure— has been a recent effect of water scarcity and competition for supply. As a result, seawater desalination supply is on the rise in key markets including Chile, Namibia, and Australia.
- More than 6,000 closed mines in South Africa have sparked debate over acid mine drainage and its impact on existing water source. An analysis of 40 copper mines in the US indicated an average treatment cost of US\$1.28/m³, highlighting the potential cost. South Africa's DWR has estimated US\$1 billion in costs.
- The impact of the mining sector on GDP alters the discussion at a political level, focusing attention on the mining sector and potentially slowing sweeping changes to policies and regulations on the sector.

Sample Analysis: Water Use by Mining Companies (Section 3, Slide 20)

Bluefield's analysis of 15 leading mining companies highlights the growing impact of water management on their ongoing operations

Analysis

- These leading mining companies report a combined 25.3 million m³/d of water usage in 2012, of which 62% was recycled. While this represents a significant share, planned mining capacity additions are expected to add to the demand for increased recycling.
- As a benchmark, mining companies have reported revenues per cubic meter withdrawn as an indicator of water efficiency per dollar. BHP Billiton stands out with US\$344/m³ withdrawn.
- The wide disparity between BHP Billiton's US\$344/m³ and Newmont's US\$19/m³ highlight the impact of mineral focus and availability of water.
 - Brazil-based Vale S.A. water usage is largely a result of its high water usage iron ore mining. Further, much of its activities are in low water-stress regions.
 - In contrast, Newmont Mining and Codelco's recycled water use is 32% and 75%, respectively. The potential mandates of costly desalination for mines in Chile, could force a change to greater reuse for these companies.

*Only Glencore's revenues from its metals and minerals division included. Revenues from the energy and agriculture groups were excluded, falling outside the scope of this report.

Note: The companies analyzed are intended to be reflective of the mining sector.

Global companies across the value chain are developing strategies to capitalize on greenfield opportunities in water– new build, new business models, and private investment. Bluefield Research supports a growing roster of companies across key technology segments and industry verticals addressing risks and opportunities in the new water landscape.

Companies are turning to Bluefield for in-depth, actionable intelligence into the water sector and the sector's impacts on key industries. The insights draw on primary research from the water, energy, power, mining, agriculture, financial sectors, and their respective supply chains.

Bluefield works with key decision-makers at utilities, project development companies, independent water and power providers, EPC companies, technology suppliers, manufacturers, and investment firms. Bluefield's services gives these companies tools to define and execute strategies.
