Mission "Environment Protection".

BIOMAX PROFILE

Biomax is a provider for eco-friendly Enviro-protective solutions. Biomax is a fusion between a range of consulting, development and manufacturing firms. We provide environment friendly solutions that deliver outstanding results. Biomax provides solutions to meet demands and needs without depleting natural resources.

Our office is located in Thane. We strive to integrate our products and services into each market through business opportunities and collaborations with local Institutions, companies and organizations. Our products are well suited to emerging agriculturally dominant and rapidly industrializing environment sensitive markets.

The Company's activities are focused on structuring and managing an integrated organization of Academic Professionals, Scientific Institutes, Government Agencies, Technology providers, Distributors, Sales Organizations, and Customers, with a collective goal for positively impacting the host society and its environment.

BIOMAX always tries to offer unique but simple approaches for waste recycling may it be wastewater or solid waste. Also, for bio-cleaning of ponds and lakes as water is becoming increasingly scarce commodity. Efforts are always directed towards developing products with integration of recent technologies into simplistic user-friendly operations. BIOMAX investigates concepts and undertakes scientific research in coordination with laboratories institutes having appropriate facilities. Under the expert's advice and information available from various sources BIOMAX offers products covering concepts to recommendations and also helps in implementation.

OUR RESPONSIBILITIES AS AN ORGANIZATION

- Educating at all levels on environmental concepts, issues, and alternatives
