

Our Test Flow sensor runs with 15 l/s -24/7 for the last 12 Months.
Equal: 372 Million Turns or 469.800.000 m³ Water

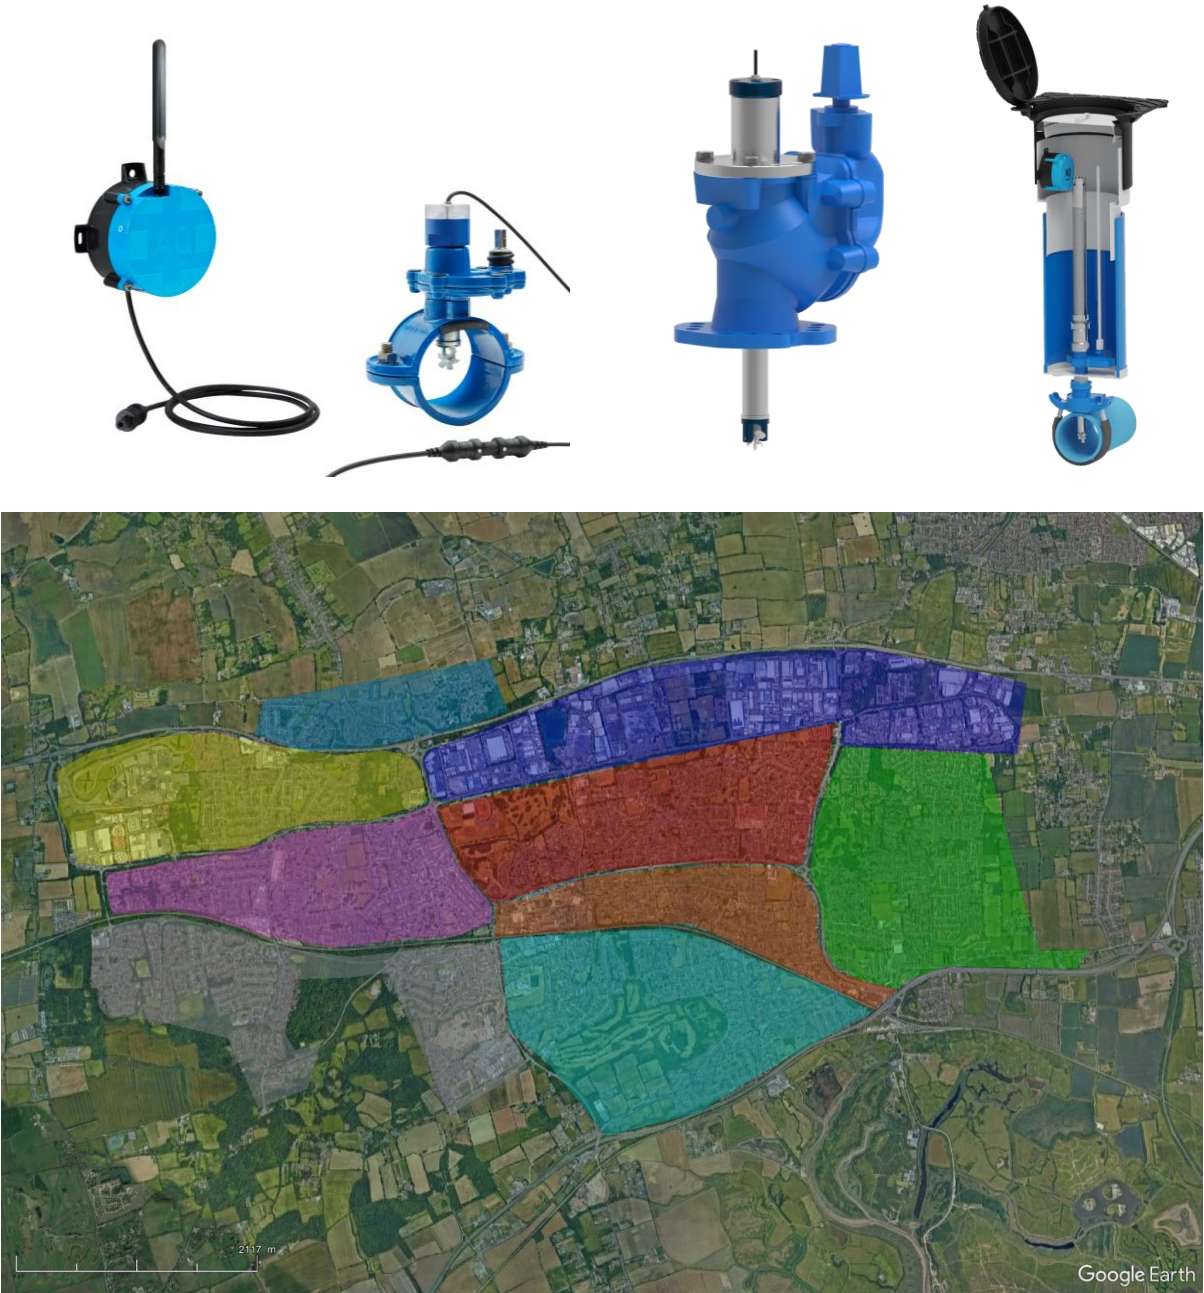

Data source: www.statista.com

Town	Inhabitants	Average water usage per person per year (m3)
Basildon	10190	132
Crawley	10090	129
Dartford	10070	131
Eastbourne	10030	138
Harlow	10020	128
Swindon	10010	135
Wakefiled	10000	133
Worthing	10000	137

"If I now divide a city of about 10,000 inhabitants into about 9 DMA's with an approximate consumption of 60,833,333 m³ per year, depending on geographical conditions and pressure zones, then I can monitor these zones with the Aqualink. In this case, the service life of the measuring probes can easily be estimated at 10 years.

After that, the measuring head can simply be replaced.
Whereby the battery life is typically 6 years. The battery can also be easily replaced by the customer himself

Average total consumption per year 547.500.000 m³ Town in UK
