

Webinar: **WASH** for Health Homes

WASH practices, including hand washing have become immensely important in the wake of the pandemic. From the last three years, Sehgal Foundation and CAWST have been organizing and co-delivering training workshops on **Community WASH Promotion** in India. To respond to the present times, Sehgal Foundation and CAWST are bringing their experiences in the form a webinar discussing the concept of 'WASH for Healthy Homes'.

Webinar Goals:

Participants will be equipped to motivate the community members to practice proper WASH behaviours, including the following topics:

1. Transmission route of water borne diseases
2. How to prevent water borne diseases?
3. Different components of WASH for healthy homes
4. Tools to monitor healthy homes for single and joint families

Participants may be individuals or groups who are:

- WASH or health promoters/ hygiene educators who educate the community members about water, sanitation and hygiene, particularly hand washing
- WASH technicians who interact with households
- Project managers/ officers who will train, manage and monitor community WASH promoters/hygiene educators

Upcoming webinar: Application of behavior change theory for WASH programs.

For more details, contact: Aparajeeta, a.vaibhav@smsfoundation.org

Date: Thursday, May 21, 2020
Time: 10 am to 11 am, Indian Standard Time and 10.30 pm to 11.30 pm, Mountain Time.
