

For Immediate Release

CWTI CONTRACTED TO DESIGN AND FABRICATE FULLY AUTOMATED IRRIGATION PUMPING STATION TO DELIVER 18,000 LITRES OF WATER PER MINUTE

March 26, 2025, Guelph, Ontario. Current Water Technologies Inc. (TSX-V: WATR) ("**CWTI**" or "**the Company**" or "**the Corporation**"), an emerging technology leader in the management and treatment of industrial and municipal wastewater and drinking water resources, is pleased to announce that our expert pumping team, Pumptronics, has been contracted to design and fabricate a major automated irrigation pumping station for a site located in Eastern Canada.

This fully automated irrigation pumping station will be designed to facilitate delivery of water to a number of grow facilities. Stage 1 of the design and fabrication of the station is targeted to be completed in 2025 with system installation, testing and commissioning targeted for early 2026.

Neither the TSX Venture Exchange Inc. nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

About Current Water Technologies Inc.

Current Water Technologies is a "Technology Company" applying its patented and proprietary "Electrochemical Technologies" to the treatment of waste water, desalination water and drinking water contaminated by metals or nutrients, i.e., nitrate/ammonia associated with the mining, metal processing, chemical, agricultural, municipal and waste management sectors. Pumptronics Incorporated operates as a division of the Company and continue to function as an integrated pump station manufacturer specializing in custom design and automation.

The common shares trade on Tier II of the TSX Venture Exchange under the symbol "WATR".

The TSX Venture Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.
