A-Rated Real and Business Property & Business Interruption – All States

Claims are adjusted using advisors that include Adam Green, Baker Donelson; Jay Farmerie of Cyrus Rice; and/or Dr Janet Stout, Special Pathogens Laboratory.

Zero Compromise on Unmerited Claims Against You

Insurance carriers occasionally pressure AWT Members to settle unmerited claims. This happens when a carrier doesn't quickly and thoroughly investigate the true responsibility for an occurrence, or simply doesn't understand water treatment enough to competently defend you. To counter this, WaterColor has retaken control of the claims process for its AWT clients.

All claims are immediately and thoroughly investigated to determine liability. If the treater is responsible, your claim and costs are quickly paid. Otherwise, we defend you vigorously in consultation with among others, AWT Members Jay Farmerie, Janet Stout and Adam Green.

From Corrosion to Contamination, from Legionella to Leaks, WaterColor has for almost 40 years, enthusiastically investigated and defended its AWT clients' claims. No longer is there a need to be pressured by carriers into settling unmerited claims.
