

Palintest

Welcome to Palintest

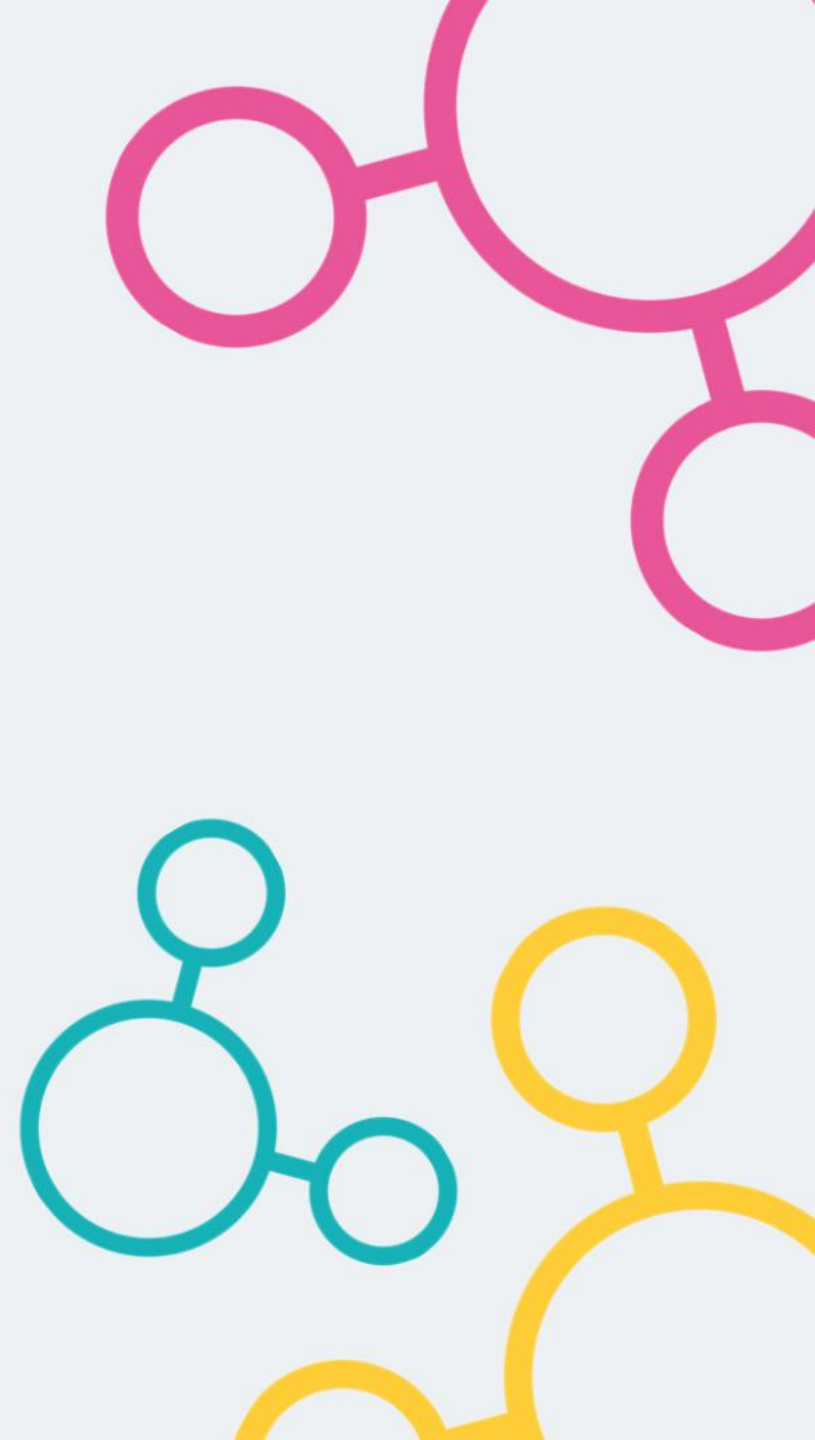

Gregory Godeau – EMEA Sales Manager

Palintest

Our Purpose

We exist to safeguard water for everyone, every day.

About Palintest

Palintest is an industry leader in the design and manufacture of water analysis technologies.

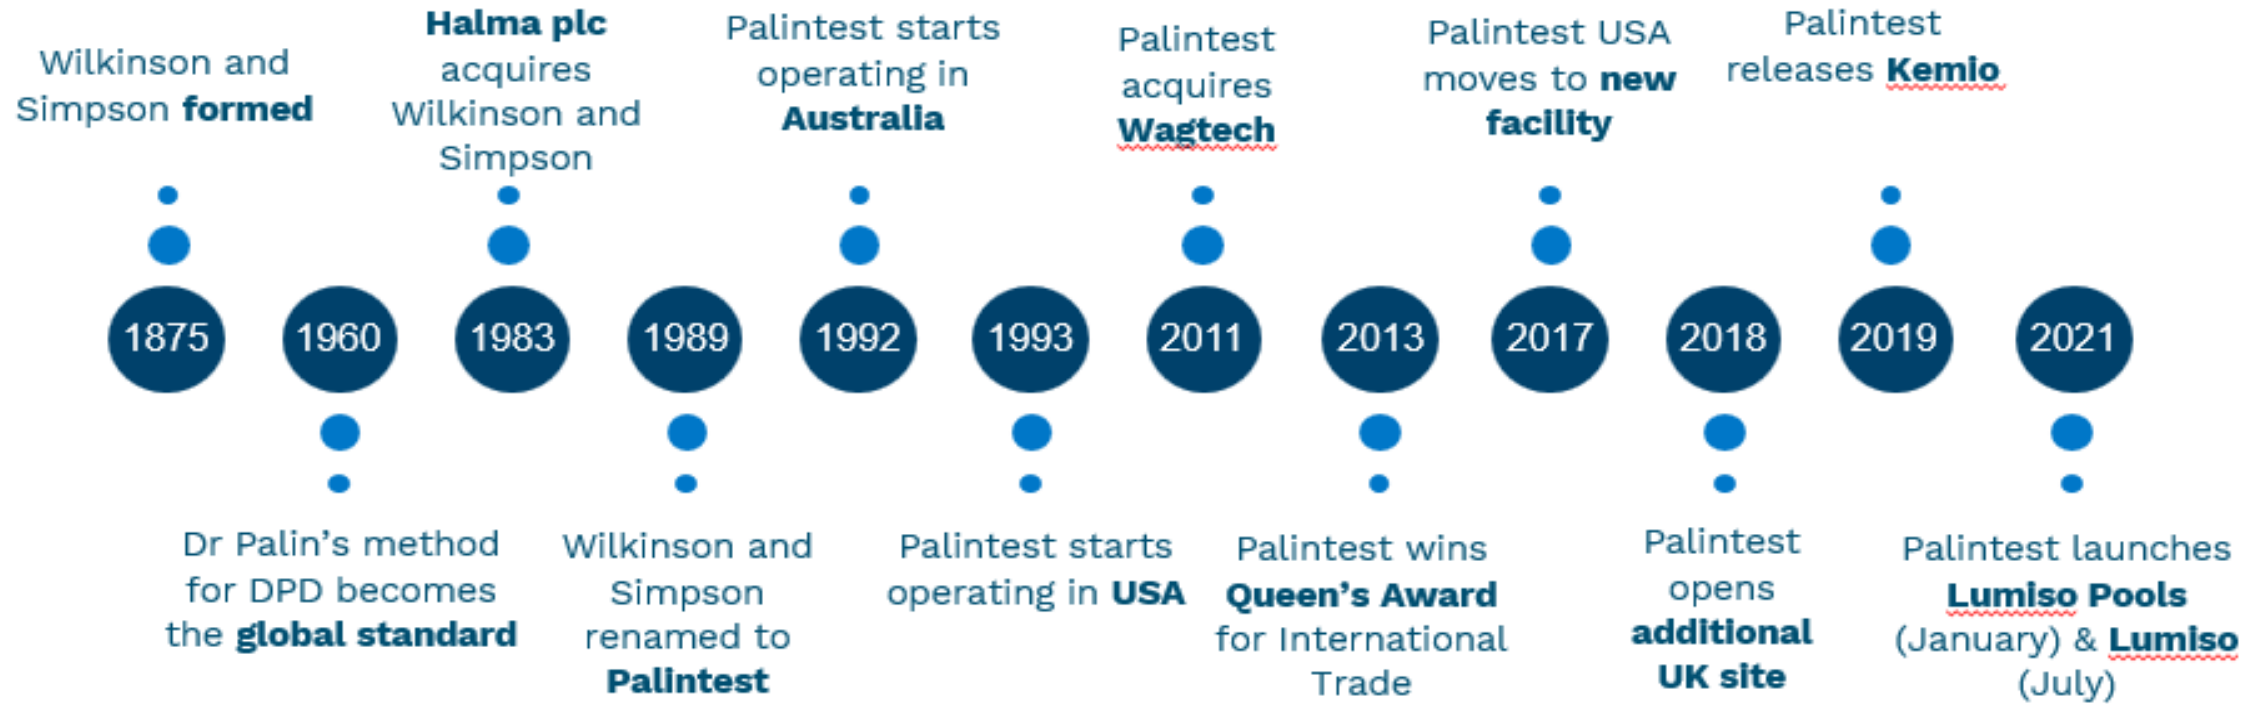

Providing equipment for water quality monitoring and disinfection control, our equipment empowers individuals to make water quality decisions with confidence.

Our trusted distribution network covers more than 100 countries.

Our History

Our Values

Collaboration

Together, we can achieve more

Ownership

Taking Responsibility and Accountability

Passion

Proactive and passionate

External Focus

Watching understanding and winning

Integrity

True to ourselves and our vision

Our Technology

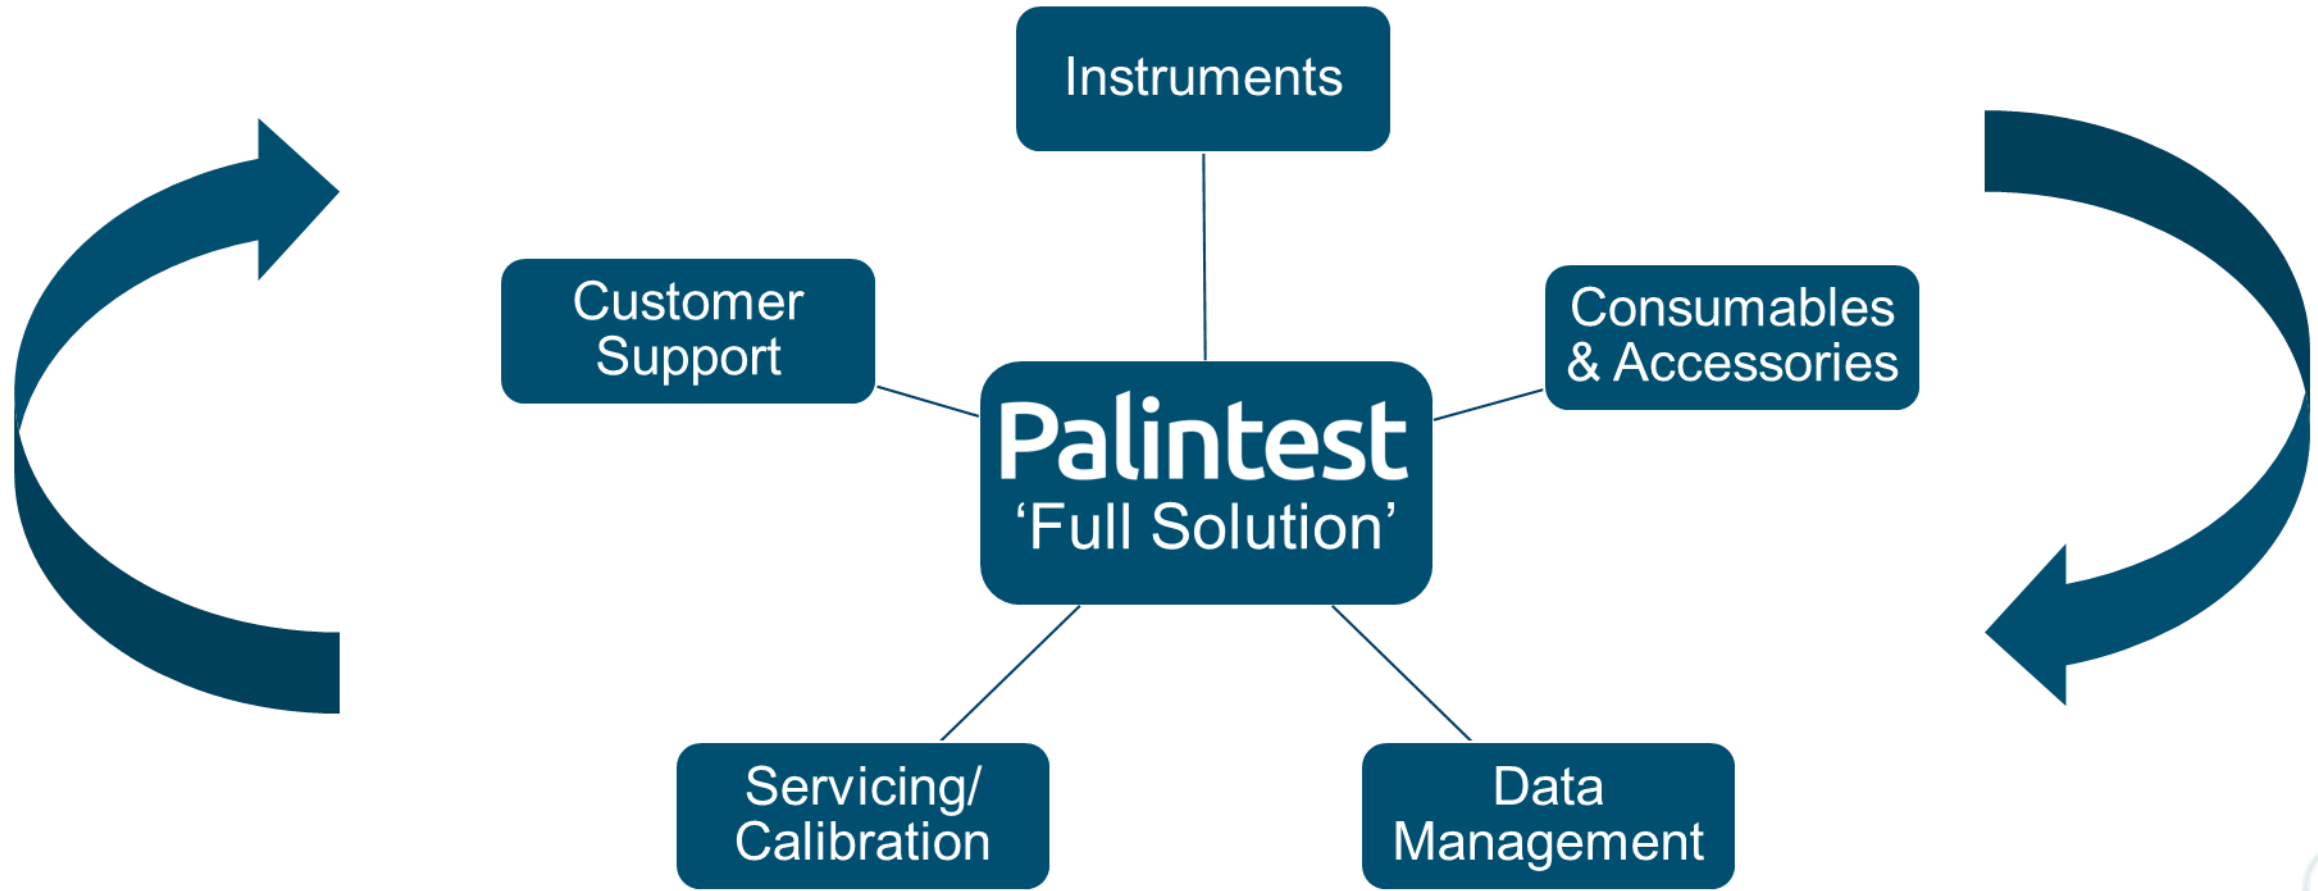

Tried, tested and trusted technology

Manufactured in the UK, our assured equipment enables testing for the full suite of water quality parameters.

All Palintest technologies are designed with portability and simplicity in mind, allowing all users to make confident water quality decisions, no matter where they are located.

Palintest Solution

Our Product Range

Visual

Visual Test Kits provide comparisons of colour changes to determine results. Ideally suited to high volume testing where approximate screening of samples is required.

Photometry

Suitable for a wide range of parameters, photometric analysis is a simple and effective mechanism for determining water quality.

Sensors

Palintest offers a wide range of sensors, as well as reagents, to support all your testing needs

Microbiological

Water quality bacteriological testing kits, soil testing kits and more.

Applications

**Drinking and
WasteWater**

Recreational Water

Humanitarian

Industrial Water

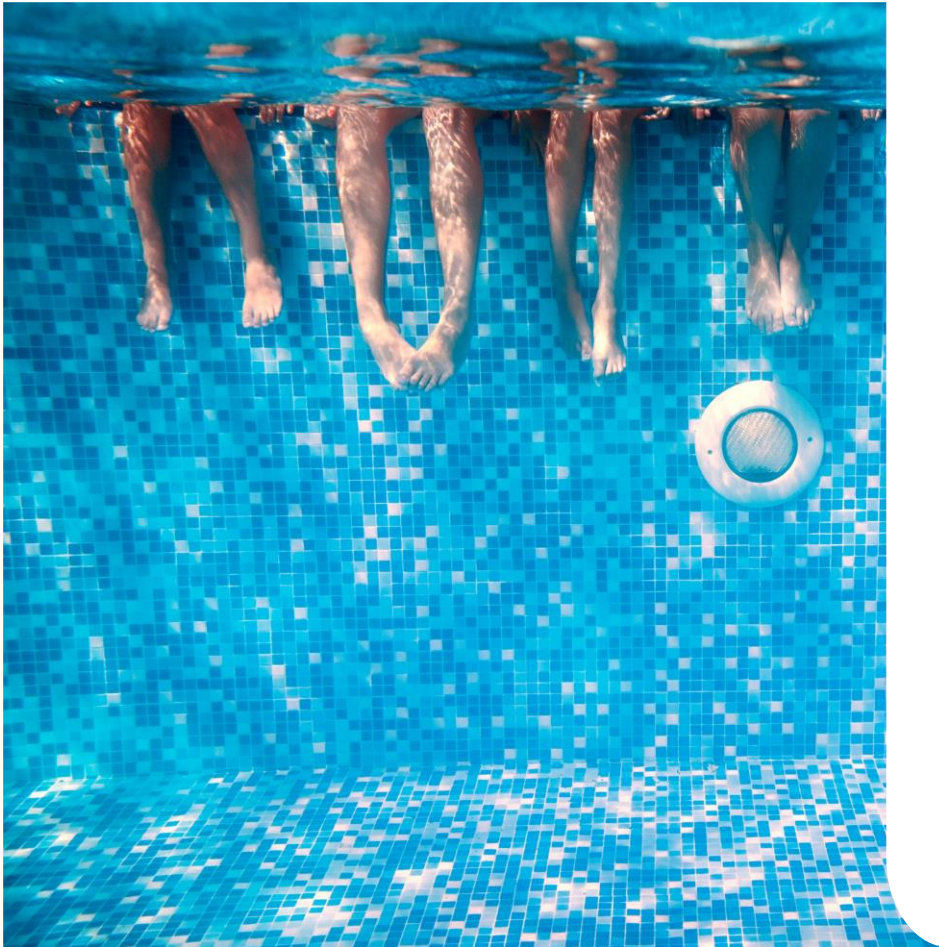

Our Water Management Expertise

Our technology helps you meet regulatory requirements and optimise water systems.

Our water analysis technology supports water utilities providers, and water management and wastewater personnel, in meeting regulatory requirements and ensuring water is safe for use and distribution.

Our Recreational Water Expertise

Gain peace of mind – and meet regulatory requirements – with our water analysis technology.

Palintest has decades of experience in creating innovative solutions for pool and spa operators and personnel: this cost-effective technology is designed for ease of use and accuracy and supports the maintenance of safe bathing environments.

Supporting the Humanitarian Sector

Our technology helps to save lives and improve health, by providing accuracy and reliability in water testing.

Our portable, robust and easily transportable solutions have been designed for use in emergency situations and remote, hard to reach areas away from laboratory and healthcare infrastructure.

Our Food and Beverage Expertise

Our Food and Beverage Expertise

Helping you meet regulatory requirements, increase operational efficiency and ensure product safety.

The processing of food and beverages is a highly regulated industry, with safety the top priority amongst producers, retailers and consumers. Our pioneering water technologies help producers reach the highest standards of safety, with critical process and disinfection control.
