

# INVITING NOMINATIONS FOR INNOVATION YEAR BOOK 2023

Contributing to `Vocal about Local` theme, Indian Innovators Association (IIA) brought out India's first yearbook on innovations highlighting State-of-Market (SOM) technologies developed by resident Indian innovators in the field of Agriculture, Healthcare, Water & Sanitation, Defence & Aerospace, Industrial Products and Consumer Products. The publication `**Top 100 Indian Innovations**`, both print copy and eBook are available in India, USA, UK ([www.motguru.com](http://www.motguru.com)) and other countries.

Encouraged by the response, IIA is now planning 2023 edition and invite nominations/ references from both resident and non-resident Indian researchers & Innovators. State-of-Art (SOA) Technologies developed by NRI researchers/ scientists and Edtech innovations from resident innovators will be added this year.

**Process:** There is no document to fill, just share a reference of researcher/ innovator to one of the editorial team by mail or WhatsApp to begin the engagement. Self-nomination is perfectly acceptable. Last date is end of July 2023 and the book will be formally released during International Innovation Fair planned in November in Goa.
