BIO RENDER

THE INNOVATIVE ODOUR
CONTROL RENDERING SOLUTION

For Fish, Poultry, Meat, Bones, Offal, Fethers And Blood

WHAT IS BIO RENDER ?

Bio Render is a custom blend of highly concentrate and powerful liquid neutralizing agent which form strong chemical bonds with many odour molecules and permanently trap them in an aqueous phase. The odour molecules are not simply masked. Instead, they are encapsulated and then neutralized.

Bio Render is very fast acting, safe to use and Environmentally sound solution whose potency makes it ideal for use against **"Biological"** odour emissions from slaughterhouse waste, rendering plant cookers, meat bone meal plants etc.

Odours Are Generally Produced By Microbial Growth And Their Metabolic Activities During The Decomposition Of Raw Materials Before Cooking Usually Give Rise To Odors.

BENEFITS OF BIO RENDER :

- ◆ Neutralise pungent smell of ammonia, hydrogen sulphide and mercaptans, cooking gas within minutes.
- ◆ Remove odour of rotten rendering waste (Methylamines, Cadaverines).
- ◆ High yield (Concentrate) safe to use and ecofriendly.
- ◆ Durable and long lasting effect which provide smell free working area.
- ◆ Remove odour from final product made up of rendering waste.
- ◆ No dyes or fragrances without biocides / environmentally problematic ingredients.

WHERE TO USE

Rendering Plant

(Bone Meal, Poultry Meal & fat, Fish Meal, Blood Meal, Feather Meal, Meat Bone Meal)

Slaughter Houses

DOSING POINT

Cooker

(Any type whether it is batch or super cooker)
