

PRESS RELEASE

Marbella will host the annual conference IX InterEcoForum on Sustainable Development, which will focus on “Water for Sustainable Development”.

IX InterEcoForum will be held on March 19 and 20, 2020, this time the main attention will be paid to the implementation of the Sustainable Development Goals in the water sector. We are proud to announce that through our annual conferences we have been supported & became a part of the “International decade for action on water for sustainable development 2018-2028” part of the United Nations Water Action movement

Among the participants we will have representatives of the large water sector, who are looking for new business opportunities, leading experts and government officials. With an international atmosphere, the conference allows major opportunities for academics, businesses, policymakers, scientists and government officials.

The international meeting, organized every year in Spain, will have several directions: on the first day, March 19, a discussion will be held on a sustainable water business, water security and sustainable production. Various projects in the field of water use, innovations in the field of utilization, conservation and consumption of water will be presented. On the second day, March 20 - solid waste and its impact on the water ecosystem. Today's global problem in the world is pollution of water ponds and rivers, technologies and solutions that contribute to the reduction and cessation of pollution in this direction. Our invited speakers will present their research work in this direction, talk about new technologies and Water trends for Sustainable Development.

We invite you to participate in IX InterEcoForum and learn about innovative technologies used in different countries for the operation and conversion of water management systems.
