

WATER RISK ASSESSMENT CERTIFICATION

**Become a CPD-accredited Water Risk
Expert in just 12 weeks**

This 12-week certification helps purpose-driven professionals build the **skills, structure, and credibility** needed to assess water risks confidently and translate them into strategic insights decision-makers trust.

You won't just learn about water risk — you'll **apply a proven Water Risk Assessment Blueprint**, complete a real-world assessment, and develop the capability to influence corporates, governments, and financial institutions.

Whether you're breaking into the space or deepening your niche—this training accelerates your journey.

What you'll learn

- **Prioritise Water Risk Hotspots:** Quickly map and prioritise hotspot sites, cities, and basins for corporates, governments, and financial institutions
- **Understand Water Risk Exposure:** Confidently assess in-depth water-risk exposure for corporates, governments, and financial institutions using a proven, structured, and repeatable Water Risk Assessment Blueprint
- **Convince Decision Makers to Act:** Translate complex water-risk insights into clear strategic and financial implications that leaders, investors, and policymakers understand — and use to guide decisions, policies, and investments.
- **Turn Risk Insights into Solutions:** Design feasible, cost-effective, high-impact solutions and water strategies— while knowing which stakeholders to involve and what makes collective action succeed or fail.

A structured, CPD-accredited program with tools, templates, and guided application
