

Axius Water: Shortlisted for Water Technology Company of the Year

POCASSET, MA USA (February 26, 2024): Axius Water, leading provider of nutrient management solutions for municipal and industrial wastewater treatment facilities, announced today that it has been shortlisted for the *Global Water Intelligence* (GWI), Water Technology Company of the Year Award, as featured in the February issue of GWI.

According to Chris McIntire, Axius Water CEO, "We are thrilled to be selected as a nominee for Water Technology Company of the Year and to stand side by side with other water industry giants. Our veteran application experts within the businesses work hard every day to provide wastewater solutions that enable our customers to remove nutrients in municipal and industrial applications. They are laser-focused on providing unique technologies for customers in a variety of geographies, ranging from rural / remote communities to large urban areas."

Highlights from Axius's award submission include:

- Axius reached a significant milestone with the removal of one billion pounds (450 million kg) of nutrients by customers from wastewater since 2020. This is a stunning achievement in meeting one of the most challenging environmental problems today.
- The acquisitions of two more companies, Napier-Reid and Triplepoint Environmental, in 2023, strengthening Axius's value proposition for tackling water pollution even further.

Axius looks forward to the next phase of the award process and to the April ceremony in London, UK. To learn more about the awards, visit [Global Water Awards](https://www.globalwaterawards.com).

About Axius Water

Axius Water was founded in 2019 by KKR's Global Impact Fund, in partnership with XPV Water Partners through the foundational acquisitions of EOSi and Nexom and the subsequent acquisitions of ATAC Solutions, EDI (Environmental Dynamics International), Napier-Reid, and Triplepoint Environmental. Axius' differentiated products and services improve the effectiveness of the wastewater treatment process, thereby measurably improving the quality of treated water. The platform is expanding globally as it builds a diversified portfolio of operating companies that offer leading solutions that improve the overall wastewater management processes.
