# WATER LYNX<sup>TM</sup> PR5 CANISTER SKID SYSTEM TSS / NTU & Metals Reduction

www.clearflowgroup.com

# **CANISTER SKID**

- Patented Water Lynx<sup>TM</sup> Gel Flocculant
- Plug and play installation 2" cam lock
- Passive treatment
- Small footprint
- Dewater and treat at the same time
- No dosing pumps required

### **OPERATING PARAMETERS:**

DIMENSIONS: 4' x 4' x 5'
PRESSURE: 10 to 100 psi
TEMPERATURE: 0 – 100° C

**CANISTER SKID SYSTEM** 

# **UNIT CONSISTS OF:**

- 2 Water Lynx cartridges (consumable)
- 2 P2 Bag filter down to 5 micron separate (consumable)
- Mixing chamber.
- Built in spill containment
- Stainless steel construction

Water flowing into the canister system passes through 2 replaceable variable mesh cartridges to passively control the release of patented Water Lynx<sup>TM</sup> Gel Flocculant. Mixing occurs in-situ and the rapidly separated particulate is trapped within synthetic bag filters where capture rates down to 5 microns can be achieved. The Flocculated water could also be sent directly to a clarification, sedimentation or separate filtration system.
