DEVELOPING E-LEARNING SOLUTIONS FOR A BETTER ACCESS TO TECHNICAL TRAINING IN THE WATER AND WASTEWATER SECTOR IN THE MIDDLE-EAST

In a context of digital transformation and modernization of technical processes, the issue of capacities and therefore of training has become crucial. Still, access to training remains a central challenge for the water sector, especially when it comes to technical knowledge. E-Learning can be a key solution to target this issue, which we want to explore in this webinar.

SPEAKERS

Khaldon KHASHMAN, SG of ACWUA

Khaldon Khashman, the **Secretary General of Arab Countries Water Utilities Association (ACWUA)**, moreover a member of the Strategic Advisory Group for the UN Water monitoring the achievements of SDG6 likewise in other national and international institutions, a member of Jordan Standards and Metrology Organization and a member of Non for Profit Risk Management Professional Forum.

Sébastien RIGAL, CEO of WATURA

Sébastien Rigal, the **Founder and CEO of WATURA**, first started his career by working for the French group Degremont (now SUEZ). His experience in France and abroad led him to question the quality of training courses delivered to technical workers. I

n 2010, he created WATURA to provide in-person technical training. Since 2018, WATURA developed its training platform, which is now used in more than 30 countries, covering more than 150 courses and available in 3 languages: French, English and Spanish.
