CONGRESS HALL A
STOCKHOLM WORLD
WATER WEEK 2016

CONVENORS

CONTENT

The current global water institutional architecture is highly fragmented and does not allow for an effective and coordinated support to Member States in implementing the ambitious 2030 Agenda on Water. A full-scale water-cultural revolution within the UN is needed. Join us for an exciting high-level debate about the set-up of a 'fit-for-purpose' UN institutional water architecture during Stockholm World Water Week!
