ExcellNano™ NF-3

Process Nanofiltration Membranes

SnowPure's **ExcellNano™** process NF membranes are uniquely designed for special industrial process separations. Based on 3-layer chemistry, the thin-film PA microscopic surface is smooth and hydrophilic, so is less fouling than traditional 2-layer membranes. These proprietary aromatic membranes are a selective-rejection chemistry, and are available only from SnowPure.

3-Layer ExcellNano™ membranes can be used to separate:

- ◆ Divalent ions from monovalent ions
 - ◆ Hardness
 - ◆ Sulfate
 - ◆ Dissolved Metals
- ◆ Organics from aqueous salt streams
- ◆ Proteins from supernatant
- ◆ Acid purification
- ◆ Dye recovery and dye desalting
- ◆ Custom membranes for custom applications

ExcellNano™ NF membranes are available in spiral-wound or flat-sheet form.
