

Detect leaking
toilets and
avoid
unexpected,
large water
utility bills

A leaking toilet can be difficult to detect as the water trickles down the inner backside of the toilet pan. Although the problem might not be noticeable at first, it will definitely be noticeable when the water bill arrives

The Aguardio Leak Sensor is installed literally in minutes as a **clamp-on** solution, fixed with strips to the toilet water inlet

Leak Sensor is capable of detecting toilets that leak more than 4 **litres** of water per hour

Leak Sensor is able to **sound** a notification when it detects a leaking toilet

Push button to **deactivate** sound for 24 hours

10 year expected battery life time
