INDUSECO TECHNOLOGIES LLP

WE OFFER BEST SERVICES & SOLUTIONS

Induseco Technologies LLP is environmental services company, providing turnkey services in water and wastewater collection, treatment and disposal. Induseco Technologies provides complete, single-source services from engineering and design to construction and installation of water, wastewater and domestic waste treatment facilities.

Our range of products includes small wastewater treatment plants for usage at small residential buildings or holiday homes, compact plants, which can be connected to larger facilities such as camp sites or isolated building areas, and containerized wastewater treatment plants, which are suitable for the usage at mobile or temporarily established camp sites.

FOUNDATIONS

Backed by a talented team of professionals, who are specialized in the field of wastewater designs and advanced engineering solutions, INDUSECO TECHNOLOGIES offers all types of water and waste treatment management services all over INDIA. The company is well equipped with state-of-the-art technologies and modern machineries required in the treatment process. We offer wastewater treatment plants and solutions.

Quality Assurance

Our team of highly qualified and experienced personnel has industrial acumen and is familiar with each and every requirement of the customers. Hence, they are efficient in providing excellent services to users throughout the country. Our specialized water and waste treatment management services are available for household as well industrial purposes

Our Services

Effluent Treatment Plant

We Design, Manufacture, Supply, Erection and Commissioning Effluent Treatment Plant (ETP) on Turnkey basis for various types and natures of wasteWaters, effluents which combines advanced physico-chemical treatment processes with tertiary polishing system for the removal of organic, inorganic, oil and grease, heavy metals & suspended solids.

Sewage Treatment Plant

We Design, Manufacture, Supply, Erection and Commissioning Sewage Treatment Plant (STP) on Turnkey basis for various types and natures of wasteWaters, effluents which combines advanced physico-chemical treatment processes with tertiary polishing system for the removal of organic, inorganic, oil and grease, heavy metals & suspended solids.

Water Treatment Plant

IET Technologies performance meets all the limits in the drinking and wastewater sectors and also considers the health of its customers to be an absolute priority and deploys the technologies necessary to produce and distribute water that meets those quality standards.

Softener System

Water softener hardness setting is an ion exchange technique by which hardness of water is removed to supply pure water. Ion exchange is the process of water softener hardness setting to supply pure water system. This water softener hardness setting process of ion exchange will continue until all available exchange sites are filled at which point the resin is exhausted and must be regenerated by suitable chemicals.

Our Services

Reverse osmosis Plants

Reverse osmosis (RO) is a membrane-technology filtration method that removes many types of large molecules and ions from solutions by applying pressure to the solution, when it is on one side of a selective membrane.

Ultra Filtration Plant

Unwanted sediments, colour, algae (which can cause a taste and smell), and other dangerous creatures are present in raw water. The Ultra Filtration Plant (UFP) is made to get rid of unwanted material and make water that is safe to consume and are available with Induseco Technology

Zero liquid discharge Plant

Zero liquid discharge (ZLD) describes a treatment method where the facility doesn't release any liquid effluent into surface waters, effectively eradicating all associated environmental pollutants.

Demineralized Water

Demineralized Water also known as Deionized Water, Water that has had its mineral ions removed. Mineral ions such as cations of sodium, calcium, iron, copper, etc and anions such as chloride, sulphate, nitrate, etc are common ions present in Water. Deionization is a physical process which uses specially-manufactured ion exchange resins which provides ion exchange site for the replacement of the mineral salts in Water with Water forming H^+ and OH^- ions.

Our Services

Operation & Maintenance

We employ experienced operators to operate and maintain ETP/STP/RO/DM/Softeners. These are very rare available with and industry but Induseco Technology provides the best Operation and maintenance of stp/etp/cetp/etp.

SWIMMING POOLS

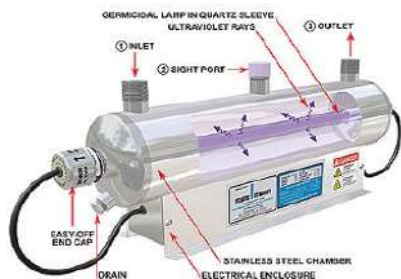

Swimming Pool Filtration Plant and accessories are available in a variety of us. These are all extensively utilised by diverse industries and are all calibrated to predetermined criteria. Our swimming pool filtration systems use filtration, disinfection, and recirculation to purify the water in the pools. They have all undergone quality testing.

Package Type STP/ETP

The system or method used to treat wastewater before releasing it into the environment or reusing it is known as an effluent treatment plant (ETP). Sewage Treatment Plant (STP) – It is a facility that processes both home and industrial runoffs, as well as wastewater, to remove impurities (effluents). These both technologies are provided by Induseco Technology.

Our Products

ULTRA VOILET

OZONATOR

FILTER PRESS

MBBR MEDIA

TUBE DECK MEDIA

DIFFUSERS (FINE)(EPDM/SILICON)

DIFFUSERS (COARSE)
(EPDM/SILICON)

CHEMICALS (LIME, ALUM,
POLY, CHLORINE)

OIL SKIMMER

INSTRUMENTS (pH meter/ Rota Meter/ TDS Meter/ Flow meter)
