Drill Pipe Screen

DRILL PIPE

SCREEN & STRAINER

**DESIGN • PRODUCTION • SHIPPING**

Drill Pipe Screens are a vital part of any directional drilling process because they protect your valuable equipment from solids that could damage your downhole tools or cause costly downtime. We offer a variety of pipe screens with multiple inner and outer ring configurations. SMS is your one-stop shop for all your pipe screen needs.

Perforated pipe screens are the most popular and are used for generally benign drilling environments with low flow rates and mild LCM. These are manufactured with 304 and 17-4 Stainless Steel.
