

The Plastic Age is Definitely Over

Industry leaders have already implemented GREEN strategies by reducing single-use plastic bottles.

With a Swisspro's midsize system, your hotel produces drinking water equivalent to more than 4000 plastic bottles (500ml) per day, with cost of maintenance & service as low as SGD210 annually.

CONVENIENT SOLUTIONS FOR SELF-HELP AND BACK KITCHEN PREPARATION

TRIPLE TAP and SLIMLINE comes with under-counter water coolers suited for commercial and catering applications such as bars and restaurant.

At 180-litre per hour, both applications produce chilled and ambient water at the touch of a button or turn of faucet lever. Aimed to facilitate bottled water and improving efficiency, the robust and reliable water coolers were designed with cutting-edge technology that allows large amount of water to be dispensed, complying with the highest standards on terms of product performance and quality.
