Event description:

The **Saudi Desalination and Water Innovation Summit** is taking place on **14 – 15 October 2024** in **Riyadh** and will address key trends surrounding desalination in Saudi Arabia, including implementing sustainability principals in desalination, role of renewable energy, understand how latest technology can be applied to optimised outputs, significance of PPP, digitalisation of desalination plants and more.

The conference will gather regional and local trailblazers from across governments, consultants, contractors, and technology providers to discuss upcoming mega projects, national economic and sustainability visions in the Kingdom.

Key topics include:

- Desalination Technologies
- Saudi Arabia's Vision 2030
- Water Sustainability Practices
- Environmental Impact
- Privatisation Policies
- Automation, Monitoring, and Control Systems
- Brine/Concentrate Disposal and Waste Management
- Regulations and Policies
