

For years we all are enthusiastically involved in WASH all over the world. Good results have been achieved in the construction of new water- and sanitation infrastructure and training.

✓ **Water**, has been addressed for last decades,

✓ **Sanitation**, more and more attention for the last 5 years,

But how about the H of Hygiene?

XOPI is a soap dispenser.

It is user friendly and vandalism proof. It works with the common known and available soap bars (average €0,80 per bar).

With an ingenious system only the care taker can open and re-fill the **XOPI**.

One bar can wash 1.600 hands!

Let us join efforts together to get the H finally on the WASH map!

A team of Dutch designers and entrepreneurs have been working for two years and invented **XOPI**!

Technical Specifications

Material	High density Poly Ethylene (HDPE) with UV stabilizer/ Acrylonitril Butadien Styreen (ABS) and Stainless Steel
Weight	950 grams
Dimensions	37 x 15 x 9 cm
Price	58 Euro, ex factory
