

AguaClara (Ithaca, NY) is a social enterprise that designs nonelectric municipal scale water treatment technologies that are sustainable in underserved communities. Founder Maysoon Sharif.

ANDalyze (Champaign, IL) has developed DNA-enzyme sensors to bring real-time water testing to the field. Chief Marketing Officer Marty Dugan.

kW River Hydroelectric (Hamilton, OH) has developed a unique technology to extract renewable energy from low-level dams using a patented micro-turbine device. The design of the turbine minimizes environmental impacts, eliminates modifications to the dam structure, and makes the river safer for recreational use. Founder Paul Kling.

PowerTech Water (Lexington, KY) has developed a disruptive technology platform to clean and purify water. The platform removes salts, corrosive minerals, and toxic materials without the need for costly membranes, high pressure pumps, chemicals or any consumables. Founder Cameron Lippert.

Searen (Cincinnati, OH) is revolutionizing water-dependent industries with vacuum air-lift technology that is simple and versatile and harnesses the power of nature while streamlining water treatment. Founder Emmanuel Briquet.

WaterStep (Louisville, KY) has developed the "WOW" - "Water on Wheels" mobile unit that provides a rapid response mini-water treatment solution in the case of emergencies or disasters. Founder Mark Hogg.
