# Pluvento™

## Datasheet

### The benefits

#### Benefit 1: Save up to 50% without loss of comfort

The Pluvento™ draws in air and mixes it with the water in the shower. This ensures that the pressure and the shower comfort remain the same, while at the same time it provides savings of up to 50% of water and energy.

#### Benefit 2: Easy installation

The Pluvento, shower head and (if required shower hose) are very easy to assemble and require no change to the current installation. You can enjoy a comfortable and efficient shower in no time at all.

#### Benefit 3: Avoid legionella in the hand shower or hose

(Only with hose) After showering, water always remains in the hose and shower head. Here bacteria can grow. With the Pluvento™, however, the water runs away after showering and (legionella) bacteria are therefore less likely to grow.

### Calculation example per shower\*

17.000 - 30.000 liter

195 - 228 m3

100 – 150 Euro

157-224 kg

\*Based on assumptions, detailed calculation available

### Technical specifications

- **Color:** Chrome
- **Connection:** Standard 1/2" Inch size suitable for all shower arms / thermostats
- **Garanty:** 5 year product garanty on the Pluvento
- **Size:** Different shower heads available, hose is either 1,50 m, 1,75m or 2m.
