“Two of the most salient objectives animating our world today are sustainable development and water security. Whether you are a seasoned water expert, stakeholder, academic, policymaker or interested citizen, this book offers an accessible path to the heart of these critical objectives.”

Jerome Delli Priscoli, Editor-in-Chief, *Water Policy*

“This timely contribution unravels the complexities of water resources management, highlighting the need to understand different perspectives and reconcile competing interests if we are to achieve sustainable development and water security. Invaluable.”

Jerry W. Knox, Professor of Agricultural Water Management, Cranfield University

“A compelling study on a pressing issue that affects us all. Not only my fellow professionals in the field, but everyone involved with water should read this book, which offers fresh insights on one of the biggest threats to global security.”

Patricia Wouters, Director, International Water Law Academy, Wuhan University

“This book is the perfect entry point for readers new to the subject and from backgrounds outside the water sector. A clear and comprehensive overview of this important topic through the lens of water security, which will inform and enlighten.”

Zaki Shubber, lawyer and researcher, Queen Mary University of London

Drawing on years of real-world experience of water resources management, the authors provide a comprehensive survey of the central issues surrounding water security and sustainable development. They offer an in-depth critical review of SDG6, while also correcting many of the misunderstandings that have led to poor decision-making in the past. Engagingly written and accessible to the non-professional, the book uses case studies from around the world to illustrate the key challenges to achieving a water-secure world.

Melvyn Kay has over 40 years' international experience in water resources, including in the Middle East and Africa. He has taught at Cranfield University and was chief editor of UN FAO's flagship report *The State of the World's Land and Water Resources for Food and Agriculture 2021*.

Olcay Ünver is Professor of Practice on the Environmental and Resource Management Program at Arizona State University and a member of the Water Policy Group. He has led water programs and activities for FAO, UN-Water and UNESCO.
