

# Call for Papers

Publishing cutting-edge research  
on water treatment

*npj Clean Water* is an online-only, open access journal, dedicated to publishing significant research that ensures the supply of clean water to populations worldwide.

Topics of interest to the journal broadly include water and wastewater treatment by physical, chemical or biological means, including research at the interface of these approaches. Manuscripts exploring both fundamental and applied aspects of water treatment are encouraged for submission. In addition to primary research, *npj Clean Water* also publishes analysis of the broader issues surrounding the supply of clean water beyond the lab environment—including issues such as education, funding, policy, intellectual property and the impact on society.

## Submit your next manuscript to *npj Clean Water*, and benefit from:

- **Ease of submission:** manuscripts submitted to *npj Clean Water* do not need to adhere to our formatting requirements at the point of initial submission; formatting requirements only apply at the time of acceptance.
- **Comprehensive and rigorous peer review:** manuscripts are evaluated by experienced editors and reviewers who are authorities in the field.
- **Wide dissemination:** articles published under a Creative Commons license are permanently and freely available for all to read, use and cite without restriction, whilst authors retain the copyright to their article.
- **Reputation:** underpinned by the strength of the Nature Research brand, the journal is published in partnership with King Fahd University of Petroleum & Minerals, Saudi Arabia.
- **Global discoverability:** article level metrics showcase your personal research impact in academia and beyond.
- **Open access:** research\* indicates that open access articles may result in **increased visibility and citation** of your research.
- **Compliance** with international open access funding mandates.
