

About the Book:

Water poised itself the centre of civilization since time immemorial. The limited amount of useable water on this planet is becoming scarcer with growing industrialization, population exploitation and irrational use. This captivating book "India's Water Crisis: Task Ahead" takes readers through insights of water management required for sustenance of humanity and analysis of sustainable development in the context of Indian water resources. It brings together the information on the technological advances in water management.

About the Author:

Recipient of various national and international awards, Dr Gursharan Singh Kainth Director General of Guru Arjan Dev Institute of Development Studies is rightly acclaimed as a thinker and a scholar. He is well known for his diligence and academic approach to work and unassuming demeanour.
