Sasrai – Sustainable Augmentation, Solicited Festraint, Animated Integrity

sasrai-Movement

We have already crossed four "planetary boundaries." They are the extinction rate; deforestation; the level of carbon dioxide in the atmosphere; and the flow of nitrogen and phosphorous (used on land as fertilizer) into the ocean. Scientist shown human activities — economic growth, technology, consumption — are destabilizing the global environment,"

Need culture, environment, education, development, human rights, public health, social, women & Child Right. To ensure those we must stop the CONSUMPTION SLAVERY. UN, INGO, NGO Officials, Each Student Factory Worker need Orientation on "sasrai-Movement." Let's we do the Perfect, not Part - If we really mean habitable earth, First step is stop CONSUMPTION SLAVERY, Need "Cultural Revolution - sasrai-Movement." sasrai Can End the hunger, human-induced climate change let's stop Consumption Slavery

sasrai-Movement aimed at combat the Climate Change, Global Warming, Poverty, Hunger, Disaster - ensure Peace, Justice, Dignity and Rights for Each.

Scientists opine

- Commercial growth, technology, consumption destabilizing global environment, diminishing organism, threatening earth existence.
- 18 percent food production may dive by 2050 due to global warming
- Due to Climate Change Africa Will Starve and Asia Will Drown in 30 Years
- Climate Change may drown 15 Cities
- Scientists estimate that humans will consume twice as many resources as the planet can support by 2050. At the rate things are going, the Earth in the coming decades could cease to be a "safe operating space" for human beings.
- Scientist says Earth is halfway to being inhospitable to life

Absolute truth for today's world advertisement administered consumption prompt indefensible production that contributes climbing temperature, climate change, global warming that shaping a disastrous and hungry world that breeds millions of distressed people. Desperate populace will act desperate they riot, fight over food, hug lawlessness, create mayhem that's the curse for each.

Since 2004 `sasrai' appeal `We must get each child caring to each particle of food and resources. Combat the Climate Change, Global Warming, Poverty, Hunger, Disaster, Ensure Peace, Justice, Dignity and Rights for Each - save a bit, reserve, preserve, rejuvenate and conserve resources.' Unfortunately most of the focus is human biased, but everything on this planet is symbiotically connected - plants, animals, humans and the Earth itself. We are in need of far sighted Goal & Target.

Planet in Need:

- Each Creature Equality
- Gender Equality
- `sasrai' Living
- Stop Consumption Slavery
- Stop Advertisement Administered Lifestyle

sasrai Day 2015 Appeal

Environment friendly attitude, behavior and program from Environment activist, organization, Authority

Look at Nepal, New Zealand - Nature is rebellious - Demand Absolute Care. Have Effective, Purposeful and Logical Step

UNSG Opine - "The power of young people is essential if we are to succeed in facing global challenges, not least ending poverty and avoiding the worst impacts of climate change". ---

Present planet demand Planetary Health

Human well-being and social and economic functioning ultimately depend upon responsible management of the planet's finite resources. Responsibly manage the planet's finite natural resources, consume better and safer, stimulate innovation in sustainability and move away from a "throw-away" behavior.

Pohela Baishakh-April 14th `sasrai' Day Appeal for Planet Friendly World Environment Day Celebration Our Heartiest Gratitude to all Volunteer and Well Wisher across the Globe on the Eve of sasrai-Movement's 12th Birthday/sasrai Day

UNEP 01. April 06, 2015

sasrai' appeal turned into demand of seven billion `Consume With Care' `Seven Billion Dreams. One Planet. Consume with Care'.

То

Mr. Achim Steiner, Executive Director Attention: Mr. Naysan Sahba Acting Director of the Division of Communications Public Information and Spokesperson Office of the Executive Director United Nations Environment Programme (UNEP) Nairobi, Kenya

Subject: Planet Friendly World Environment Day Celebration

Dear Sir

Greetings from sasrai-Movement

Please be kind to accept our heartiest thanks and appreciation. We are happy enough that people voted and UNEP acknowledged World Environment Day (WED) theme - Seven Billion Dreams. One Planet. Consume with Care.'

Since 2004 `sasrai' appeal (`We must get each child caring to each particle of food and resources. Combat the Climate Change, Global Warming, Poverty, Hunger, Disaster, Ensure Peace, Justice, Dignity and Rights for Each – save a bit, reserve, preserve, rejuvenate and conserve resources') that turned into demand of seven billion today.

In this momentum sasrai-Movement appeal to UNEP and all concern across the globe let's have initiative to keep WED Celebration Planet Friendly.

WED Program needed to be Community Commenced, Designed and Managed Message

- Community given/taken/proposed
- Community perceived
- Community values and belief friendly

Material

- Environment friendly
- User friendly
- Locally available
- Solid waste reducing
- Long term useable
- Less costly

Scientist says Earth is halfway to being inhospitable to life'

We hope and believe your simple initiative could save much resource exploitation in the name of WED Celebration across the globe.

Kindest Regards SM Farid Uddin Akhter Secretariat In-charge

sasrai-Movement

UNEP 02. April 23, 2015

Sasrai' appeal turned into demand of seven billion Consume With Care'

То

Mr. Achim Steiner, Executive Director Attention: Mr. Naysan Sahba Acting Director of the Division of Communications Public Information and Spokesperson Office of the Executive Director United Nations Environment Programme (UNEP) Nairobi, Kenya

Subject: Appeal to have a resolution to hang sasrai banner for one week June 03 to 09 at each UN related office gate across the globe in honor of World Environment Day.

Dear Sir

Greetings from sasrai-Movement

We are in 100% agreement with UNEP belief influencing consumption and production patterns at the local level would have a significant impact at the global level, because resource efficiency facilitates the transition towards a green economy and global sustainable development.

Since 2004 our appeal is we must get each one caring to each particle of resource. sasrai-Movement aimed at every person would have a mindset `save a bit in every step'. Street beggar to state driver will save resource no matter how small it is. Last 11 years we have tried our level best to disseminate the message to people from all works of life.We are thankful to the voter and UNEP for the slogan 'Seven Billion Dreams. One Planet. Consume with Care'. We consider this is institutionalization of our appeal.

To attain the resilient and resource efficient cities; sustainable transport and mobility; and integrated solid waste management, globe in need of resource efficient individual, institution, organization finally the government. To materialize the utmost need, we are in needing voice from each corner of globe. Since 2011 we approached to the honorable minister for environment and forest & minister for education of Bangladesh to have an initiative to keep a sasrai banner in each educational institution in honor of world environment day. Based on our appeal honorable Divisional Commissioner of Chittagong passed a request to all Deputy Commissioner of his division to do the same.

Bringing behavioral and attitudinal change is the toughest job and we have no chance to spare a single second. Nature demands absolute care that includes concerted, cooperative and collaborative effort. UNEP could have an initiative to get each UN office and official - resource efficient first. And keeping a sasrai

banner at each office gate across the globe for one week June 03 to 07 in honor of World Environment Day could be the first step.

Scientists estimate that humans will consume twice as many resources as the planet can support by 2050. At the rate things are going, the Earth in the coming decades could cease to be a "safe operating space" for human beings. The Planet is in Need of Each Creature Equality, Gender Equality and `sasrai' Living (Stop Consumption Slavery or Stop Advertisement Administered Lifestyle). Albert Einstein opine "Those who have the privilege to know have the duty to act."

Kindest Regards SM Farid Uddin Akhter Secretariat In-charge sasrai-Movement

NB.

a. Since 2004 we worked without any financial assistance from any donor. We volunteered aimed at better earth for each creature. We believe voluntarism needed to be Prudent, Provident, Proficient and Relentless, Fearless, Greedless. We must have zeal to offer a habitable earth to our next generation. We owe to our next generation to offer the earth as we received and we vow to be unswerving, unshakeable.

b. Humanity in need of Climate Responsible Community, Climate Compatible Development. sasrai ONLY THE PATH TO SAVE MOTHER PLANET EARTH, NATURE. sasrai only the path to Eliminate Racial Discrimination - End violence against WOMEN and CHILDREN. sasrai only the path to end POVERTY, VULNERABILITY, HUNGER, DISASTER, CLIMATE Threat. Each second, minute, hour day needed to be spent considering earth, environment and humanity. We must get each child caring to each particle of food and resource. Wish the Peace, Justice, Dignity and Rights for each - save a bit, reserve, preserve, rejuvenate and conserve resources.

c. Scientist Opine

- Earth is halfway to being inhospitable to life
- We have already crossed four "planetary boundaries." They are the extinction rate; deforestation; the level of carbon dioxide in the atmosphere; and the flow of nitrogen and phosphorous (used on land as fertilizer) into the ocean. Scientist shown human activities economic growth, technology, consumption are destabilizing the global environment,"
- "Human security will be progressively threatened as the climate changes," the UN's Intergovernmental Panel on Climate Change (IPCCC) warned in its overview report. The Pentagon agrees. "Rising global temperatures, changing precipitation patterns, climbing sea levels, and more extreme weather events will intensify the challenges of global instability, hunger, poverty and conflict,"
- Scientists estimate that humans will consume twice as many resources as the planet can support by 2050. At the rate things are going, the Earth in the coming decades could cease to be a "safe operating space" for human beings.
- At the rate things are going, the Earth in the coming decades could cease to be a "safe operating space" for human beings.
- Africa Will Starve and Asia Will Drown in 30 Years Due to Climate Change
- People in Asia and the Pacific are four times more likely to be affected by natural disaster than in Africa and 25 times more than in Europe or North America?
- Global warming could cause an 18 percent drop in world food production by 2050
- 15 Cities Threatened by Climate Change
- The World Bank alarm bells are just the latest to sound about the havoc climate change and man-made global warming will cause to the planet.

 The World Health Organization predicts that climate change will cause 250,000 additional deaths per year around the globe between 2030 and 2050, primarily from malaria, diarrhea, heat exposure and malnutrition.

http://sasrai.com/climate-refugee-illegal-migrant/

UNEP 03 WED `T' Shirt Design Concrete Commitment - Combat Climate Change

May 20, 2015

To Mr. Achim Steiner, Executive Director Attention: Mr. Naysan Sahba Acting Director of the Division of Communications Public Information and Spokesperson Office of the Executive Director United Nations Environment Programme (UNEP) Nairobi, Kenya

Subject: Planet demand Concrete Commitment - Combat Climate Change

Dear Sir

Greetings from sasrai-Movement

Need concrete decision on World Environment Day (WED) Celebration. When our target is peoples' awareness need BCC material with some specific message those translate action for each. May be we shall be in 100% agreement that `T' shirt in WED celebration should contain messages for the mass and putting name and logo of particular organization/agency doesn't bear any significance. Furthermore we must emphasize on the quality of cloth/`T' shirt. It should be useable yearlong and gentleman will be wearing in their morning and evening work yearlong. As our central target is sustainability.

In this connection organization related with Environment Message Promotion could contact the designer to develop some acceptable model that student/youth motivated to use it yearlong.

This is crystal clear:

- We have already crossed four "planetary boundaries." They are the extinction rate; deforestation; the level of carbon dioxide in the atmosphere; and the flow of nitrogen and phosphorous (used on land as fertilizer) into the ocean. Scientist shown human activities — economic growth, technology, consumption — are destabilizing the global environment,"
- "Human security will be progressively threatened as the climate changes," the UN's Intergovernmental Panel on Climate Change (IPCCC) warned in its overview report. The Pentagon agrees. "Rising global temperatures, changing precipitation patterns, climbing sea levels, and more extreme weather events will intensify the challenges of global instability, hunger, poverty and conflict,"
- Absolute truth for today's world careless consumption driving untenable production that driving changes in temperature and weather patterns and that's the Hotter and Hungry World. Hungry world will contribute millions of desperate people. Desperate people do desperate things: They riot, they fight over food, they overthrow governments, and the mass migrate to food-secure countries. Breakthrough Study says Climate Change and Violence Linked.

Does these aforesaid messages known or clear to all? I must say no. It might be happen that a significant number environment worker yet to be clear about the fact. In addition another irony of fate those people know the message, even teach other about the message but not clear about her/his own doings in personal life, family, office, road etc. Well someone might be well known about doings but still there in a big gap between learning/knowing and behavior, attitude above all we can say mindset. Still we are to get the needed realization that when small saving in personal and family life multiplied in

million/billion what a big contribution it is, in each second, minute, day. As for example if each person committed to save one liter water and if it is performed by 3 billion what might be the contribution.

To face the climate change, global warming, climate crisis planet demand significant change in mindset among all. Street beggar to State driver each has capacity and responsibility to contribute for the habitable earth. And each should have mindset `HOW MUCH LESS CONSUMING I COULD BE' - `Let's save a bit, in every step of life no matter how small it is.'

There is another misfortune for us during our planning generally we forget - planet is symbiotically connected - plants, animals, humans and the Earth itself. Our maximum program Human focused. Our theme is `Seven Billion Dreams. One Planet. Consume with Care'. May be experts has the comprehensive or inclusive mindset. But for the much people need very much specific and action oriented message.

Let's ponder on design the program, message and material inclusive.

Planet in Need

- Each Creature Equality
- Gender Equality
- sasrai' Living
- Stop Consumption Slavery
- Stop Advertisement Administered Lifestyle

Kindest regards

SM Farid Uddin Akhter Secretariat In-charge email: fgaleeb@gmail.com Phone:+88 01553 748 354

Sasrai-Movement - help sasrai that helps the Humanity

Please, save a drop of water daily, during all water related activities Please, plant at least a Native tree annually at own home or community sasrai.com

UNEP 04

To Enock Chinyenze Special Events and Outreach United Nations Environment Programme P.O. Box 47074-00100 Nairobi, Kenya

Dear Madam/Sir Greetings

Thanks for your instant response regarding my appeal `peoples friendly `T' shirt or any other BCC material planning, designing and making.'

I have nothing to say or suggest anything about your design and message in the given link, just I could say excellent cause I am a completely layman regarding design and different paint or theme.

My appeal is as follows

 Our BCC material will bear message for the mass people that she/he could follow/practice in personal/family/community life.

- Our message should be translated into action for the general mass those not aware about several happening due to `Consumption Slavery' that driving global warming, climate change that's the biggest threat to survival of the humanity.
- Our message should be all-inclusive that include each creature as well as each particle of resource. As for example one person save one drop of water – that's the service to the environment largely humanity, universe.
- I believe taking space for Name and Logo on `T' shirt is immaterial. Message should be specific and bigger font (as maximum as possible) that visible to pedestrian that motivate/inspire her/him practice in personal, family, office and community.
- I believe our message could be defined successful that create Climate Leadership among the youth, student, mass people.

Please ponder on my point and put your talent. I am sure there will be a fantastic model that will make you and your team immortal in the world history.

In attached model I have tried to reflect my idea, please use your vast knowledge make it agreeable. We must remember that mass people have no time and talent to extract their doings from high level theme portrait/paint.

I have tried to articulate my idea and earnest request to all concern materialize it for the mass people realization and action aimed at better earth for the next generation.

Hope the best, much love.

NB. I have made up my mind to use the WED T' shirt yearlong and proposed our City Corporation Leader wear it at least for one week in honor of World Environment Day. Would you have in mind to design T' shirt or shirt that student wear it yearlong? Could we design it for celebrity in different sector?

http://sasrai.com/concrete-commitment-combat-climate-change/

UNEP 05

To Enock Chinyenze Special Events and Outreach United Nations Environment Programme P.O. Box 47074-00100 Nairobi, Kenya

Dear Madam/Sir Greetings

Thanks for your response. I have seen your design/model. This is very pleasant and excellent undoubtedly. sasrai-Movement is in 100% agreement with what you have designed.

I am sorry I failed to produce my feelings to you properly. Our appeal is a bit different. Our observation is message given here is not clear enough for the mass people to follow and practice. Since 2009 we have been trying to get the idea of mass people on WED Theme. They don't find their doings or following here. This is why we appeal `T' shirt should bear some simple and specific message for the mass people that they could translate it into their plan and action.

As for example since 2004 we raised voices `save a bit, reserve, preserve, rejuvenate and conserve resources' that UNEP has taken in 2012 WED theme Think.Eat.Save. Regarding this message mass people stated to us `*We are poor, we are in lack of daily food, and we have nothing to do here.*' This is a message for the rich and asks them to be caring. Main part of 2015 theme `Consume with Care' mass people not clear about how they could be caring. This is accurate, agreeable for expert/learned person working in the field of environment.

In sharing session of Local Government Leaders and different level Officials it is originated, they are not clear about how they could be caring. I hope you will find the same scenario in other country also. This is why we appeal making it simple and specific that each one can realize and practice in her/his personal, family, office and community.

- save a drop of water
- plant at least a Native Tree
- waste no food
- avoid personal car
- no more junk food
- avoid one time use
- prefer home made

If we look back the theme of 2009 'Your Planet Needs You– Unite to Combat Climate Change' I think we should consider `T' shirt other BCC material design. High profile designer do such a high level model but for the mass mobilization we need it as simple as possible.

Climate change is the biggest threat to the humanity we must involve each one across the globe and that demands simple and specific message that might be workable by each.

Seven Billion Dreams. One Planet. Consume with Care' is very nice for the expert/learned, mass people don't get practicable message for them. We like to have translated it `Earth is shared island Dreams of 7 billions Human, Infinite Plants, Animals, Microorganism, Demand special Care, `CONSUME WITH CARE.'

I hope I am clear to you. Global community is getting messages Tremor in Nepal, biggest Storm in New Zealand and historical devastated flood in The United States. Different study warned us number of disasters and intensity both will increase day by day. We must involve each one in fighting against the rebellious nature. Otherwise we will be defeated and history will not forgive us. Since 2004 sasrai-Movement's voice 'we must get each baby caring to each particle of resources'. You see The United States is the top most food wasting country and most of the develop countries are following same way. This situation indicates our message is not even clear to mass people of developed country. In that case how we could expect realization from the mass people of developing or under developed?

We believe each has the capacity and responsibility to combat the Climate Change and present planet demands involvement of each across the globe. And UNEP should come forward with that challenge. Our initiative should be pragmatic, effective, purposeful & logical in order to involve each. Like Chinese president I have to say that we have no time to waste. We should start right now.

Please consider our appeal.

Kindest regards.

SM Farid Uddin Akhter

sasrai-Movement

NB.

- UNSG says climate change "is a humanitarian issue, a development issue, and an issue of security and stability." USA President in his Berlin speech said the global threat of our time severe storms, Famine and floods, Coastlines vanish, Oceans rise and Climate change.
- IPCC 5th Assessment Report urges- disrupted climate can do in sea level rise and acidification, aggravated droughts and wildfires, increased storm severity and flooding. Those impacts will grow more severe unless we start reducing global warming pollution, not tomorrow, but now.
- IPS Special Issue on COP18 Doha Climate Change Conference 29 Nov, Dec 07, 2012 state that unsustainable human consumption and production systems are driving changes in average temperatures and weather patterns, "abnormal" is increasingly becoming the norm.
- Report from the International Energy Agency says we are headed toward an increase in global temperatures of 6.5 °F to 9.5 °F, most of it during the lives of young people alive today. And I do believe we never desire such situation for our young daughter and son. We must have step to stop this undesired trend.
- Planet is at a turning point cause Person crazy to Profit, Property and Possession. Planet under irreversible Catastrophic Climate Change sequences Famine and Flood, Severe Storm, Coast line Vanish and Ocean Rise.
- We must have a mission to bridle on our consumption across the globe that needs significant change in mindset among all, `save a bit, reserve, preserve, rejuvenate and conserve resources.' sasrai only the path to attain the target. In absence of sasrai feeling, thinking and practice we can't offer a habitable earth for our next generation.

Based on aforesaid sayings sasrai Day 2015 Appeal

Environment friendly attitude, behavior and program from Environment activist, organization, Authority

01. Appeal to the honorable minister for Environment and Forest, Director General, Department of Environment Bangladesh is –

- Hang sasrai banner month long in honor of WED at Office, Educational Institution and Factory gate
- Decentralize WED celebration

02. Appeal to the UNEP, ED

- Planet Friendly World Environment Day Celebration ie community designed, arranged & managed
- Have a resolution to hang sasrai banner for one week June 03 to 07 at each UN related office gate across the globe in honor of World Environment Day.
- Design `T' shirt and every BCC material that contain simple & specific message for the mass people that turned into action by each.

UNEP 06 June 17, 2015

To Mr. Achim Steiner Attention: Mr. Naysan Sahba Acting Director of the Division of Communications Public Information and Spokesperson Office of the Executive Director United Nations Environment Programme (UNEP) Nairobi, Kenya

Subject: Please have initiative to institutionalize sasrai appeal as Pope Francis' reveal the same.

Dear Sir

Greetings from sasrai-Movement

Since 2004 our appeal is ` save a bit, reserve, preserve, rejuvenate and conserve resources" we must get each one caring to each particle of resource. sasrai-Movement aimed at every person would have a mindset `save a bit in every step'. Street beggar to state driver will save resource no matter how small it is. Last 11 years we have tried our level best to disseminate the message to people from all works of life. We are thankful to the voter and UNEP for the slogan 'Seven Billion Dreams. One Planet. Consume with Care'. We consider this is the institutionalization of our appeal.

UNEP believe influencing consumption and production patterns at the local level would have a significant impact at the global level, because resource efficiency facilitates the transition towards a green economy and global sustainable development.

According to the leaked document Pope Francis' opine

- Humans are causing climate change, and there will be "grave consequences" if we don't act fast, warns the pope.
- Pope Francis will this week call for changes in lifestyles and energy consumption to avert the "unprecedented destruction of the ecosystem" before the end of this century, according to a leaked draft of a papal encyclical. In a document released by an Italian magazine on Monday, the pontiff will warn that failure to act would have "grave consequences for all of us."
- Francis also called for a new global political authority tasked with "tackling...the reduction of pollution and the development of poor countries and regions."
- "Humanity is called to take note of the need for changes in lifestyle and changes in methods of
 production and consumption to combat this warming, or at least the human causes that produce and
 accentuate it," he wrote in the draft. "Numerous scientific studies indicate that the greater part of the
 global warming in recent decades is due to the great concentration of greenhouse gases...given off
 above all because of human activity."
- Earth "is protesting for the wrong that we are doing to her, because of the irresponsible use and abuse of the goods that God has placed on her. We have grown up thinking that we were her owners and dominators, authorized to loot her. The violence that exists in the human heart, wounded by sin, is also manifest in the symptoms of illness that we see in the Earth, the water, the air and in living things."
- He immediately makes clear, moreover, that unlike previous encyclicals, this one is directed to everyone, regardless of religion. "Faced with the global deterioration of the environment, I want to address every person who inhabits this planet," the pope wrote. "In this encyclical, I especially propose to enter into discussion with everyone regarding our common home."
- The pope will praise the global ecological movement, which has "already traveled a long, rich road and has given rise to numerous groups of ordinary people that have inspired reflection."
- In a surprisingly specific and unambiguous passage, the draft rejects outright "carbon credits" as a solution to the problem. It says they "could give rise to a new form of speculation and would not help

to reduce the overall emission of polluting gases." On the contrary, the pope wrote, it could help "support the super-consumption of certain countries and sectors."

 "Numerous scientific studies indicate that the greater part of the global warming in recent decades is due to the great concentration of greenhouse gases," according to the pope. "Faced with the global deterioration of the environment, I want to address every person who inhabits this planet," the pope wrote.

Considering the aforesaid opinion we believe you could consider our appeal that served to you earlier

- 01. Planet Friendly World Environment Day Celebration ie community designed, arranged & managed
- 02. Have a resolution to hang sasrai banner for one week June 03 to 07 at each UN related office gate across the globe in honor of World Environment Day.
- 03. Design `T' shirt and every BCC material that contain simple & specific message for the mass people that turned into action by each.

Appeal to the honorable minister for Environment and Forest, Director General, Department of Environment Bangladesh is –

- 01. Hang sasrai banner month long in honor of WED at Office, Educational Institution and Factory gate
- 02. Decentralize WED celebration

Kindest regards

Mr. Achim Steiner, Executive Director Attention: Mr. Naysan Sahba Acting Director of the Division of Communications Public Information and Spokesperson Office of the Executive Director United Nations Environment Programme (UNEP) Nairobi, Kenya

Subject: Institutionalization of `sasrai-Movement' as Pope Francis reveals.

Dear Sir

Greetings from sasrai-Movement

Laudato Si is worldwide wake up call to help humanity understand the destruction that man is rendering to the environment and his fellow men. June 18, 2015. Pope Francis states the goal of this environmental document:-"In this Encyclical, I would like to enter into dialogue with all people about our common home." The goal of the dialogue: "I urgently appeal, then, for a new dialogue about how we are shaping the future of our planet. We need a conversation that includes everyone, since the environment challenge we are undergoing, and its human roots, concern and affect us all" (#14). I hope and believe global community has come to know that his holiness Pope voiced (for a drastic change in "lifestyle, production and consumption" from unsustainable habits to more mindful means of caring for "our common home." "What kind of world do we want to leave to those who come after us, to children who are now growing up?" Francis asks. "The question not only concerns the environment in isolation; the issue cannot be approached piecemeal.") that we are appealing since 2004 is to save a bit, reserve, preserve, rejuvenate and conserve resources.' Let's save in every step no matter how small it is, no matter what is the status of social, political and economical.

Pope Francis added:

- a. "It would hardly be helpful to describe symptoms without acknowledging the human origins of the ecological crisis. A certain way of understanding human life and activity has gone awry, to the serious detriment of the world around us. Should we not pause and consider this? At this stage, I propose that we focus on the dominant technocratic paradigm and the place of human beings and of human action in the world" (#101).
- b. "Since everything is closely interrelated, and today's problems call for a vision capable of taking into account every aspect of the global crisis, I suggest that we now consider some elements of an integral ecology, one which clearly respects its human and social dimensions" (#137).
- c. "So far I have attempted to take stock of our present situation, pointing to the cracks in the planet that we inhabit as well as to the profoundly human causes of environmental degradation. Although the contemplation of this reality in itself has already shown the need for a change of direction and other courses of action, now we shall try to outline the major paths of dialogue which can help us escape the spiral of self-destruction which currently engulfs us" (#163).
- d. "Many things have to change course, but it is we human beings above all who need to change. We lack an awareness of our common origin, of our mutual belonging, and of a future to be shared with everyone. This basic awareness would enable the development of new convictions, attitudes and forms of life. A great cultural, spiritual and educational challenge stands before us, and it will demand that we set out on the long path of renewal" (#202).

Aforesaid quotes justify our appeal to you since April 2015

- 01. Planet Friendly World Environment Day Celebration ie community designed, arranged & managed
- 02. Have a resolution to hang sasrai banner for one week June 03 to 09 at each UN office gate across the globe in honor of World Environment Day.
- 03. Design `T' shirt and every BCC material that contain simple & specific message for the mass people that turned into action by each.

Pope Francis rightly indicated the scientist opinion at the rate things are going, the Earth in the coming decades could cease to be a "safe operating space" for human beings. The Planet is in Need of Each Creature Equality, Gender Equality and `sasrai' Living (Stop Consumption Slavery or Stop Advertisement Administered Lifestyle). Albert Einstein opine "Those who have the privilege to know have the duty to act."

We do conduct dialogue session all sector people emphasizing student and factory worker. We believe this dialogue session is very urgent for person in development sector UN, INGO and NGO. Each development orientation course should be moduled minimum halfday `sasrai' session. Development worker/personnel needed to be resource responsible, environment efficient, climate coherent. First step should be bringing significant change in mindset of each staff emphasizing policy level/decision making that ensures mainstreaming `sasrai' in each development initiative across the globe. Each community would have a sasrai banner at their social communication point that disseminate the message for each member and they would be tuned to believe, act accordingly "no matter how small it is, each has responsibility and capacity to `save a bit' and we will follow it in every step."

We hope your kind consideration and action to promote sasrai theme among all, first step should be to ensure change in mindset, attitude and behavior among UN, INGO and NGO officials across the globe that could contribute a lot to bring change in mindset among the mass people and that's only the path to influence in mindset, policy and decision making of the global leaders'.

Kindest regards

Dear Sir Greetings from sasrai-Movement

Please own the "sasrai-Movement". I am sure if you own it very shortly it will spread across the country that contribute to save the crores worth natural resource everyday as well as it could bring the leadership of our nation and country in fighting for environmental justice, combat the human driven climate change.

I could say Pope's environment encyclical Laudato si June 18, 2015 attested "sasrai-Movement" and UN, INGO, NGO Officials, Students, Factory worker need orientation on "sasrai-Movement" Pope's "Cultural Revolution"

Here are 10 quick commandments of the Pope stop the human driven Climate Change that we are urging since 2004.

- 1. Think of future generations.
- 2. Embrace alternative energy sources.
- 3. Consider pollution's effect on the poor.
- 4. Take the bus!
- 5. Be humble.
- 6. Don't become a slave to your phone.
- 7. Don't trade online relationships for real ones.
- 8. Turn off the lights, recycle and don't waste food.
- 9. Educate yourself.
- 10. Believe you can make a difference.

since 2004 "sasrai-Movement" appeal

"The world is heading for irreversible and potential catastrophic climate change." "Nature does not discriminate rich/super power or a poorer, distress equally. Nature demand's absolute care – We must stop 'Consumption Slavery', "Let's have mission to spread "sasrai-Movement" aimed at habitable earth. Planet demand voice from each corner to Combat the Climate Change and Global Warming Threat

- Please, save a drop of water daily, during all water related activities
- Please, plant at least a Native tree annually at own home or community
- Please, let's waste not single particle of food
- Please, let's waste not single particle of any resource
- Please, keep off electric appliances one minute daily
- Please, suspend travel by personal car once a day
- Please, keep a day in a week luxury free
- Please, do not throw away the waste wherever you like
- Please, No more junk food
- Please, Avoid one time
- Please, Buy items made from recycled materials
- Please, Prefer land phone instead of your cell
- Please, save one minute to think on Climate Change and Environment
- You Can Reduce CO2 Emissions, Plant Native Trees Worldwide

Let's we try to save one Taka/dollar/pound/yenfrom our daily use, consumption, expenditure, LUXURY combat the CLIMATE CHANGE, GLOBAL WARMING and the sequences.

sasrai Volunteer demand your kind contemplation to spread sasrai across the globe effectively. Please keep a sasrai-Movement slogan at the bottom of your each letter, printing and publication. Let's keep a sasrai-Movement banner/poster at residence and office gate.

Kindest regards

SM Farid Uddin Akhter Secretariat In-charge SaSrai-Movement

> Let's be a desired friend to all creature, humanity, environment, earth Plant for planet, water for world, environment for entire

Sasrai – Sustainable Augmentation, Solicited Festraint, Animated Integrity sasrai – work locally-serve globally, initiative local-outcome global

- Keep the planet habitable everyone's interest and each needed to be involved sasrai is the strategy
- sasrai commenced involved mass in most major combat, the climate change and global warming.
- Climate Change Critically Changing Civilization Cordial, Prudent, Purposeful Partnering urgent ensure desired environment & ecology, habitable earth for the youth, next generation. Save nature that save You, Your Family, Community, Nation, Humanity

Sasrai – Sustainable Augmentation, Solicited Festraint, Animated Integrity sasrai – work locally-serve globally, initiative local-outcome global

UNEP 09 August 21, 2015

Need vibrant step to launch "sasrai-Movement - bold cultural revolution"

То

Mr. Achim Steiner, Executive Director Attention: Mr. Naysan Sahba Acting Director of the Division of Communications Public Information and Spokesperson Office of the Executive Director United Nations Environment Programme (UNEP) Nairobi, Kenya

Subject: Appeal to initiate the mass mobilization process "sasrai-Movement - bold cultural revolution"

Dear Sir Greetings from sasrai-Movement.

This is the fact beyond question "Climate Change" is the biggest threat to the humanity. Planet desperately demands drastic action to face the threat. The biggest combat needs biggest number of combatant. Need purposeful and logical initiative that involves each, irrespective of sect, race, religion, caste, creed, economic, education and social status. Each one will feel own responsibility and capacity to make difference, fight against the "Consumption Slavery" to "End Slavery" to stop the human driven climate change that can contribute "Livable Planet Earth". Pope encyclical defines it "bold cultural movement" and we are saying "sasrai-Movement" since 2004.

We are thankful to you and UN secretary general welcomed the papal encyclical. This is the peak time to kick start the process, mobilization to prepare the combatants across the globe. "sasrai-Movement" has been trying people in all works of life emphasizing students and factory worker. To achieve the real result or keeping up the pressure on world leaders to listen the voice of earth we must reach mass people as maximum as possible. We believe being a lead agency/authority for the environment UNEP should launch massive program that includes three tiers as follows

- a. Policy makers dialogue like Pope's World Mayor Conference
- b. Orientation on "bold cultural movement or sasrai-Movement" for UN, INGO and NGO officials' etc
- c. Mass mobilization Students, Factory worker ------ etc

We must remember that first two is utmost need. But to materialize this decision/direction/policy/consensus we must go to last one. Mass people are ultimate implementer and their positive feelings and wills can shape the desired earth we demand or need. This is also true that political leader will consider peoples feeling only.

We hope and believe your good office shall have instant initiative in coordinated and comprehensive manner. And we believe different individual, institution, organization waiting to have ringing of your whistle to come forward to shoulder the mass mobilization responsibility. Please whistle and kick start in respond to planet's desperate demand as true thanks giver to the papal encyclical.

Kindest regards

SM Farid Uddin Akhter Secretariat In-charge sasrai-Movement

NB.

This is our 9th appeal to your good office since April 2015 and we could encapsulate the prior appeal as follows.

Planet Friendly World Environment Day Celebration ie community designed, arranged & managed

- Have a resolution to hang sasrai banner for one week June 03 to 09 at each UN office gate across the globe in honor of World Environment Day.
- Planet demand Concrete Commitment Combat Climate Change
- Design `T' shirt and every BCC material that contain simple & specific message for the mass people that turned into action by each.
- Mainstreaming the sasrai-Movement theme in every development initiative across the globe.
- UN, INGO and NGO officials' orientation on sasrai-Movement

"human-induced climate change is a scientific reality and its effective control is a moral imperative for humanity."

August 05 in facebook page your office circulated 5 tips for green or environment friendly. Pope proposed 10 and many other individual, organization proposing same. This proposal/vision creates hope for "sasrai-Movement" volunteer, yes our vision and mission of 2004 is now stemming.

We like to state that only tips cannot bring desired result that present planet need. We must accept the reality `bringing change in mindset and behavior' is time consuming need giant step according to pope "bold cultural revolution."

We believe giant step should be kick started with UN, INGO, NGO officials, students and factory workers

Pope Francis declared 'Revolution' sasrai-Movement for better Earth, to combat human-driven climate change. Pope added "The earth, our home, is beginning to look more and more like an immense pile of filth," Need change of mind and heart to listen to cry of the Earth and the cry of the poor." Pope PERFECTLY DIAGNOSED People no longer seem to believe that happy day lay ahead. This pessimism shall bring uncontrollable disaster for the globe any time. Profiteers, Polluters and CONSUMPTION Addicts' are unable to pay attention to the Truth due to their greed or whim.

The sensible person and organization cannot keep silence. This is the peak time to kick start the process get the vast majority optimistic. And we believe sasrai-Movement is appropriate vehicle to triumph over the most critical situation of the present planet and humanity.

August 05, 2015 UNEP fb promotion

No matter what way we survive on Earth

The way we behave each day affects the Environment - so what can you do to help green our planet? Here are five tips to make a difference.

No matter what way we survive on Earth there are affects on Earth, Environment, Nature – Try to mitigate as maximum as possible

1. Bring your own mug to the coffee station of your office.

2. When doing the dishes, put water in the sink and don't let the water run.

3. Try to avoid a plastic bag for every fruit & vegetable item you have weighed at the supermarket. Have two or more items packed in the same bag if unavoidable.

4. Think before you print. Do you really need a hard copy or is it going to end up in the waste bin?

5. If you have a garden, make use of your organic waste and start composting.

What else do you do to help the environment on a daily basis? Let us know below! http://goo.gl/dXhxmf

b. Since 2004 we serve without any financial assistance from any donor. We volunteered aimed at better earth for each creature. We believe voluntarism needed to be Prudent, Provident, Proficient and Relentless, Fearless, Greedless. We must have zeal to offer a habitable earth to our next generation. We owe to our next generation to offer the earth as we received and we vow to be unswerving, unshakeable.

c. Humanity in need of Climate Responsible Community, Climate Compatible Development. sasrai ONLY THE PATH TO SAVE MOTHER PLANET EARTH, NATURE. sasrai only the path to Eliminate Racial Discrimination - End violence against WOMEN and CHILDREN. sasrai only the path to end POVERTY, VULNERABILITY, HUNGER, DISASTER, CLIMATE Threat. Each second, minute, hour day needed to be spent considering earth, environment and humanity. We must get each child caring to each particle of food and resource. Wish the Peace, Justice, Dignity and Rights for each - save a bit, reserve, preserve, rejuvenate and conserve resources.

d. Scientist Opine

- Earth is halfway to being inhospitable to life
- We have already crossed four "planetary boundaries." They are the extinction rate; deforestation; the level of carbon dioxide in the atmosphere; and the flow of nitrogen and phosphorous (used on land as fertilizer) into the ocean. Scientist shown human activities — economic growth, technology, consumption — are destabilizing the global environment,"
- "Human security will be progressively threatened as the climate changes," the UN's Intergovernmental Panel on Climate Change (IPCCC) warned in its overview report. The Pentagon agrees. "Rising global temperatures, changing precipitation patterns, climbing sea levels, and more extreme weather events will intensify the challenges of global instability, hunger, poverty and conflict,"
- Scientists estimate that humans will consume twice as many resources as the planet can support by 2050. At the rate things are going, the Earth in the coming decades could cease to be a "safe operating space" for human beings.
- At the rate things are going, the Earth in the coming decades could cease to be a "safe operating space" for human beings.
- Africa Will Starve and Asia Will Drown in 30 Years Due to Climate Change
- People in Asia and the Pacific are four times more likely to be affected by natural disaster than in Africa and 25 times more than in Europe or North America?
- Global warming could cause an 18 percent drop in world food production by 2050
- 15 Cities Threatened by Climate Change
- The World Bank alarm bells are just the latest to sound about the havoc climate change and manmade global warming will cause to the planet.
- The World Health Organization predicts that climate change will cause 250,000 additional deaths per year around the globe between 2030 and 2050, primarily from malaria, diarrhea, heat exposure and malnutrition.

http://sasrai.com/need-resolution-to-hang-sasrai-banner-for-one-week-june-03-to-07-at-each-un-related-office-gate-across-the-globe-in-honor-of-world-environment-day/

UNEP's conceptual integrated framework, a trilogy, states that the road to sustainability needs to address at least three key principles:

- Leave no one behind and provide a life of dignity for all.
- Live within our means and achieve greater prosperity in an inclusive manner within the capacity of the Earth's life support system.
- Leave something behind by increasing natural, social and economic capital to achieve greater resilience and secure future generations' livelihoods.

We believe `sasrai' only the means that could address said trilogy and more. In absence of sasrai thinking, feeling and practicing we cannot achieve it.

The National Oceanic and Atmospheric Administration (NOAA) announced that 2014 was the hottest year that's the cause most extreme, weather-wise, nearly twice the average. NOAA confirmed that this pattern will worsen if climate change continues unabated. Scientists has shown that human activities — economic growth, technology, consumption — are destabilizing the global environment," and we have already crossed four Planetary Boundaries - extinction rate; deforestation; the level of carbon dioxide in the atmosphere; and the flow of nitrogen and phosphorous (used on land as fertilizer) into the ocean.
