Your Solution Partner in Environmental Problems

# About Us

Incorporated in the year 2008, Envirotech Systems is a Solution Partner for your Environmental Problems. We are Consulting Organization in the field of Environmental Pollution, Analysis and Control Technologies to provide you the economically viable and appropriate pollution control tools with pre and post operational support.

Our services are designed so as to meet all specified requirements stated by our clients. Our services go through different scales of quality checks so as to ensure their conformity to international standards. We look at each enquiry as different and arrive at customized solutions.

We undertake operations and process maintenance of ETP/STP. We are associated with design and supply of ETP/STP/Bio gas plants/WTP/DM/RO plants. We believe in continuous improvement and value added services to the customers. All our wastewater treatment systems are easy to install and has trouble free operations and maintenance.

We offers helping hand for number of national & international companies to achieve their goals of Environment Management & Natural Resource Conservation.

# Vision

**To Create an Identity as a Solution Partner for every problem in the field of Environmental Pollution, Analysis and Control Technologies to provide an economically viable and appropriate pollution control tools by achieving sustainable, quality growth.**

**To provides customized, technically excellent, innovative & value-added environmental consulting solutions and services to our clients to assist them to achieve their goals and objectives towards pollution free environment.**

**Customer First :** Customer Satisfaction & Loyalty.

**Doing What is right :** Achieving Technical excellence with professional ethics.

**Wining Together :** Work as a team to achieve Organisational and individual growth.

**Make Ideas Happen:** Developing technical and economical solutions to challenges encountered by our clients as well as in our internal processes.

**Getting better Every Day :** Technical excellence delivered to all assignments, both external and internal.

**Achieving Sustainability:** Adopt clean business practices integrated into our daily operations to contribute to a clean and sustainable environment.

**Safety & Environment:** As an integral part of our company culture, giving employees the training and equipment they need to get their jobs done without injury and serve Environment as our Social Responsibility.

# Quality Policy

## A Step towards Quality Work

We will individually and collectively perform our daily activities to achieve excellence as a company and be a Brand in the Field of Environmental Engineering & Consultancy Services with top priority to Innovation, Technology, Commitment and Customer Satisfaction.

# SMART Quality Objectives

## **S : SPECIFIC**

To Provide **Specific** solutions to Customers problem.

## **M : MEASURABLE**

To give **Measurable** efforts towards Customers issues.

## **A : ACHIEVABLE**

To prove that the solutions to all the problems are **Achievable**.

## **R : REALISTIC**

To provide solutions which are **Realistic**.

## **T : TIMELY**

To provide **Timely** services to all our Customers.

# OUR SERVICES

**Wastewater Management & Treatment**

**Water Engineering & Treatment**

**Environmental Impact Assessment**

**Air Pollution Control & Monitoring**

**Industrial Safety, Risk Analysis & Waste Reduction**

**Legal Compliances & Environmental Audits**

**Green Energy & Water Conservation**

**Management System Training & Consultancy**

**Laboratory & Analytical Services**

## **Wastewater Engineering**

Wastewater management is the field of handling wastewater, to make it suitable to either be recycled into a water system or to be disposed of in an environmentally-conscious manner.

**Sewage Treatment Plants**

**Effluent Treatment Plants**

**Advance wastewater Treatment Plants**

### **Features:**

- Reliable and efficient
- Available in all the parts of the country
- Helpful and reliable
- Top quality materials used for the manufacture
- Easy to install
- Long lasting reliability
- Cost efficient

# Wastewater Management & Treatment

## Services:

Wastewater Engineering and Consultancy Services.

Process Design, Detailed Engineering, Erection and Commissioning of Effluent & Sewage Treatment Plants.

Detailed Project Report (DPR) for ETP/STP/CETP.

Preparation of techno commercial reports for ETP/STP.

Operation and Process Maintenance of ETP/STP on round the clock for 24 x 365 days.

Performance study and feasibility study for ETP/STP/CETP.

Up gradation & Modification of ETP/STP.

# **Water Engineering & Treatment**

**Water Treatment Plants**

**RO / DM/ Softener Plants**

**Drinking Water Bottling Plants as per BIS norms**

## **Services**

Design, erection and Commissioning of Water Treatment Plants, DM Plants, RO Plants, Softeners.

Operation and Process Maintenance of WTP/RO/DM/Softener Plants on round the clock for 24 x 365 days.

Servicing and overhauling of the treatments units/equipments.

Supply of Chlorination units and Ozone units.

Water audits and water budget studies

# **Environmental impact assessment (EIA) & Environmental clearance**

Primary & Secondary Data Collection.

Preparation of Rapid/Comprehensive Environmental Impact Assessment Report.

Assistance in Conducting Public Hearing.

Environmental Clearance from State and Central Ministry of Environment & Forest.

## **Legal Compliances & Environmental Audits**

Assistance in securing consent to establish & operate from Maharashtra Pollution Control Board.

Preparation of environmental & safety audit report.

Preparation of environmental management plan & disaster management plan.

Online submission of form 4, Environmental statement, Water Cess etc.

# **Air Pollution Control & Environmental Monitoring Services**

Design and erection and commissioning of air pollution control equipments.

Ambient Air Quality Monitoring Survey as per NAAQS/EPA/IS standards.

Source Emission and Work zone air monitoring.

Fugitive emission & DG set emission monitoring.

Efficiency assessment for Air Pollution Control Equipments.

Ambient & Work zone noise level monitoring.

Illumination & Ventilation Survey

# Laboratory & Analytical Testing Services

Sampling & Analysis of Waters, Drinking Waters, Packaged Drinking Waters & Process Waters as per IS/USEPA methods.

Sampling & Analysis of Wastewaters, Industrial Effluents, Ground Waters & Storm Waters as per IS/USEPA methods.

Sampling and Analysis of Industrial Sludges, Solid Wastes, Soils as per IS/USEPA methods.

Sampling & Analysis of food, food products and raw food materials as per IS/AOAC methods/FSSAI.

Compost Quality Analysis as per Schedule 4 of the Municipal Solid Wastes Rules, Hazardous Waste, Waste Oil & Used Oil analysis as per Hazardous Waste (M & H) Amendment Rule 2016.

Laboratory Set Up and Training as per MoEF Guidelines.

Supply of Laboratory equipments, glass wares and chemicals.

# Green Energy & Water Conservation

Development of green belt.

Rain water harvesting projects.

Design, erection and commissioning of bio gas plants.

Operation and process maintenance of bio gas plants.

Bio gas to electricity generation systems.

## WASTER AND WASTEWATER TREATMENT PLANTS
