

## Enterprise Water Management Software

### Key Features

Software as a Service

Creates a single repository of water-related data across the enterprise

Scalable to multiple users and locations

Full audit trail for compliance

Role-based access

Supplier engagement

Covers blue, green, and grey water footprints

Benchmark and set targets to track performance

Analytics and forecasting

Data validation and quality controls

Integration with existing systems, smart meters and utility bills

- Prudent water management is now an essential component of any organization's sustainability strategy.
- If water is an essential input to your products, your risks from unmanaged water resources are high.
- Mapping the embedded water content of your products and processes can help save operational costs.

### Business Risks of Unmanaged Water

Water is essential to the manufacture, delivery and use of virtually all products and services.

The uncertainty associated with water availability, consumption patterns, and impacts on ecosystems and local communities in which businesses operate, makes water a key risk category. If you haven't mapped your water risks yet, you may be running the risk of increased costs from unmanaged water resources, adverse social responsibility impacts, lost branding opportunities, competitive disadvantage, and more.

### Realize the Profits in Water Savings

AcquaSolve enables organizations to transform their enterprise water accounting needs into measurable metrics and trackable processes. Whether your need to make the shift to more sustainable enterprise water accounting is driven by legislation, voluntary/mandated reporting, brand differentiation, competitive differentiators, risk mitigation, or stakeholder concerns, AcquaSolve provides an automated way to easily tackle these challenges.

### MANAGE RISKS

Mitigate regulatory, financial, and reputational risks

### TURN WATER INTO AN OPPORTUNITY

Identify hotspots and cost reduction opportunities

### ACHIEVE SUSTAINABILITY

Reduce the impacts from unmanaged water resources

### CORPORATE SOCIAL RESPONSIBILITY

Track and exceed performance goals

## Key Benefits

Getting a handle on your water usage data and attaining business intelligence from AcquaSolve can provide you with important benefits.

- Identify opportunities to reduce water consumption and costs.
- Mitigate the risks of non-compliance with regulatory, industry, or corporate policies.
- Manage stakeholder expectations through a comprehensive corporate responsibility strategy.
- Leverage socially responsible branding backed by quantifiable metrics.
- Build and sustain competitive advantage.

## System Requirements

- AcquaSolve is a software as a service (SaaS) offering.
- All you need is an internet browser, and your user name and password to access the system.
- No software to be installed or maintained at your site.

## SERVICES AVAILABLE

Technical Support  
Implementation and Setup  
Water Management Consulting  
Training  
Custom Application Development

The screenshot displays the AcquaSolve web application interface. At the top, there is a navigation bar with links: Dashboard, Reports, Profile, Data, Analytics, IDES, and Admin. Below this, the main content area is titled 'Process Definition'. It includes several sections: 'General' with fields for Name (Manufacturing Stage 1), Ownership (Site 1), Data Entry (Mike), Process Type (Intermediate), and Product Input Processes (-Select-); 'Process Attributes' with a 'Create New Attribute' button; 'Product Definition' with a 'Create New Product' button; and 'Benchmarking' with a 'Track against Benchmark' toggle (Yes/No), a 'Define Benchmark' field, and units of measurement (Numerator and Denominator) both set to '-Select-'. There is also an 'Enter Authority' field and 'Save' and 'Reset' buttons at the bottom.
