FOR ONE BILLION
PEOPLE, SAFE
WATER IS SCARCE.

Every Drop Counts

About: WaterMicronWorld International

With the development of economy and society, the rapid increase of world's population and the growth of industry, agriculture and city, causing environment degradation, pollution and serious waste of water resources force increasing shortage of world's water resources.

Facing the water shortage, and in line with idea of “meet the demand of people's life quality to provide more healthy and environmental safe water.” WaterMicronWorld got the idea from nature and has been trying to change the world with technology and taking the safe drinking water and healthy drinking water as the goal to benefit the society.

In order to occupy the international market, in early July, 2000, the board of ” WaterMicronWorld International” deciding to introduce a strategy innovation of (AWG) Atmospheric Water Generator Technology.

WaterMicronWorld International is an industry leader with Atmospheric water generator, at the same time, it is the first integrated development and oriented company specializing in the R&D, production and sales of atmospheric water generator with technology strength.

The leading product-”Atmospheric Water Generator” awards for more than 20 patents intellectual property certificates in succession since 2002 to 2011. WaterMicronWorld Technology is popular among the markets of the Middle East, Africa and South East Asia with its merits of advanced technology, novel design, tight structure, reliable operation and low consumption etc.

Insist Excellence, Create Glory

Over years, the company adheres to scientific and technological innovation road, and constantly strengthens the independent brand of product development and technological innovation. In line with the production concept of excellence, pays attention to cultivate a team with high-quality talents, forms a scientific and efficient management mode, and strictly implements ISO quality control system and obtains certificates of CQC, 3C, CE, TUC, UL, PSE etc.

Since 2000, the company has established a good long term partnership with multinational distributors and agents. Meanwhile, our technology and products raised awareness to the military at home and abroad. Parts of our technology products have been recognized by the world's military.

WaterMicronWorld International development objective is to supply safe & clean drinking water as a responsibility to the world, and to be the leaders of Atmospheric Water Generator Industry.

WaterMicronWorld International will lead the 5th revolution in the human safety and health of drinking water, and prompt the development of technology as its own duty, and continues to play leading role in the “Drinking Water Technology Revolution”.

WaterMicronWorld International has the capacity of producing & manufacture from 20 to 30 thousand units.

WaterMicronWorld International

Technology

WaterMicronWorld International Atmospheric Water Generation Technology, Using the humidity in the atmosphere to generate water from **15 liters** up to a maximum of **20,000 liters** per day. A perfect solution generating fresh pure drinking water from the Air for home/office and light industrial units.

AWG

Our home/office atmospheric water generator machine is a humidity and temperature driven self-contained unit making water from the air.

The AWG-Home/Office generates from 15 to 30 liters of pure drinking water per day depending on the specific atmospheric conditions of a particular geographic region. AWG- Home/Office simply replaces the need to rely on municipal water systems, transport, storage and consumption of bottled water.

This AWG machines can reliably manufacture pure fresh drinking water in environmental humidity levels as low as 25%. AWG-Home/Office is the solution for a growing demand to supply safe and pure drinking water to the world.

Our Industrial AWG-C unit's produce 60, 100, 160, 200, 250, 500, 1,200, 1,500, 3,000, 5,000, 10,000 and 20,000 Liters per day of pure drinking water from the humidity (From the Air We Breathe).

INSTRUCTIONS FOR USE

— Soft touching and hold the icon, the machine starts up or shut down.

Soft touching and hold the  icon until  flashes, indicates  is unlocked, then touching the  icon will dispense hot water.

Soft touching and hold the icon to dispense cold water.

Soft touching the icon to switch water temperature display between Celsius and Fahrenheit.

Icon flashing means tap is unlock.
Motion means hot water is dispensing.

Indicate water temperature.

HOT — Heating function enable/disable indicator.

Bottom tank water level indicator.

Top tank water level indicator.

Motion icon flashes when water is generating. Light on when water generating stops. Icon flashes when water generating function force to turn off manually.

Motion icon flashes when booster bump is working.

Normal operating condition indicate humidity level. Indicate value when programming.

Soft touching the  icon to select function, then soft touching the  icon to set preferred value.

- A. H-ON / OFF — Turn-on / turn-off heating function.
- B. C-ON / OFF — Turn-on / turn-off cooling function.
- C. W-ON / OFF — Turn-on / turn-off water generation.
- D. H-075~095 — Adjusting hot water temperature (range: 75-95°C).
- E. C-004~010 — Adjusting cold water temperature (range: 4-10°C).
- F. T-*** — Reset to zero on filter system usage period.
- G. RESET — Reset to factory standard.
- H. FT ** — Indicate condenser temperature.

Motion means cold water is dispensing.

Indicate water temperature.

COOL — Cooling function enable/disable indicator.

Light on when leak is detected.

Flashes when filters need to replace or clean up.

Flashes when reflux is in process.

Flashes when machine is defrosting.

Both icons flashing at the same time means

Top tank UV light abnormal
Reflux UV light abnormal
Bottom tank UV light abnormal.

WATER MICRON WORLD

Pure Drinking Water From Air

The image shows a large industrial water treatment system, likely a reverse osmosis (RO) plant, installed outdoors. The system is housed in a black metal frame and consists of several stages of filtration. The first stage is a large blue cylindrical tank, likely a pre-filter. The second stage is a large blue cylindrical tank, likely a post-filter. The third stage is a large blue cylindrical tank, likely a reverse osmosis membrane. The fourth stage is a large blue cylindrical tank, likely a post-filter. The system is connected to a network of copper pipes and valves. A worker in a blue uniform is visible on the left side of the frame, working on the equipment. The background shows a building with large windows.

Pure Drinking Water From Air

**10,000 to 20,000 Liters
Per Day**

Business Opportunity

With pure drinking water exponentially becoming the most precious commodity on our earth, then it is time we take a look at new technologies that move our sights beyond that of the bottle.

The bottle water industry has recently crossed the threshold of over 101 Billion United States Dollars worldwide as the largest selling beverage on this planet; although we never thought in our youth bottling water as a mainstay of our present existence would be the norm. Bottom line is that there is less than 3% pure water on our planet that is captured in the ground. Although our oceans are filled with billions of cubic feet of water, still the most abundant source comes from our air.

At WaterMicronWorld we know that trillions of liters of pure fresh drinking water in the sky that is virtually invisible to us humans on the ground. Oh yes, we see lots of water when it rains, but that is only a small amount that is really there for the taking.

WaterMicronWorld has the technology, machines and infrastructure to allow virtually any person on this planet to enjoy pure fresh drinking water, without the need of bottles, wells, and elaborate filtration methods for their municipal supply to give us the life sustaining sustenance we all deserve.

At first glance, distributorship looks like an ideal business opportunity if you have got the money and basic business management skills. You can instantly get a hot running product, so you don't need to bother about the manufacturing or marketing stuff.

You can also benefit from the experience and expertise of WaterMicronWorld. In short, it is a ready-made business, all you need to do is to invest some capital and select an appropriate spot for distributorship, and you are all set for a jumpstart.

You don't need to arrange for raw materials, set up manufacturing plants or go around spending big amounts on marketing, as WaterMicronWorld will be taking care of these aspects. Therefore when considering WaterMicronWorld Exclusive Distributorship we take a more personal or "hands on" approach than our competitors.

Why instant success WaterMicronWorld Exclusive Distributorship will provide?

People today are tired of making frequent trips to the supermarkets stocking up on plastic bottled water, or relying on municipal filtration systems that need regular maintenance. Your customers will continually thank you for providing the purest, safest and best tasting drinking water that they extract from the air they breathe in the comfort of their own homes... What could be a greater gift or contribution to life?

Each Authorized Distributor has exclusive rights to market and arrange installation of WaterMicronWorld International products within their territory subject to meeting agreed targets.
