

Newsletter

Dear Subscribers,

30 August 2016

We are excited to invite you to participate in our first two Business Ecosystem Communities of Practice hosted by The Water Network.

1. For Water Treatment Plant Operators, to exchange information, share troubleshooting tips and ideas on all aspects of the operation and maintenance of water treatment plants - [free for all to join](#).
2. Technology company matchmaking - linking up investors and Pilots with privately held breakthrough water tech companies. Already we have 50 qualified companies and several investors. We will make this public to everyone in a few weeks. Please submit your business plan today if you would like to participate.

Kind regards,

Vishakha Rajput
COO, The Water Network

Trending Technology

Adaptable Device Monitors and Conserves Water

Tech startup Ark Labs' new device monitors the flow of water at your house, your apartment, or your business. The device and accompanying app can learn your water use patterns and adapt.

[Read details](#)

Successful Nitrate Removal

Nitrates are easily washed into rivers and ground water sources since they are soluble. A nitrate removal solution from ACWA Services will improve drinking water quality and get rid of excess nitrate.
