FOR ONE BILLION
PEOPLE, SAFE
WATER IS SCARCE.

Every Drop Counts

About: WaterMicronWorld International

With the development of economy and society, the rapid increase of world's population and the growth of industry, agriculture and city causing environment degradation, pollution and serious waste of water resources force increasing shortage of world's water resources.

Facing the water shortage, and in line with idea of “meet the demand of people's life quality to provide more healthy and environmental safe water.” WaterMicronWorld got the idea from nature and has been trying to change the world with technology and taking the safe drinking water and healthy drinking water as the goal to benefit the society.

WaterMicronWorld International is an industry leader with Atmospheric water generator, at the same time, it is the first integrated development and oriented company specializing in the R&D, production and sales of atmospheric water generator with technology strength.

The leading product-”Atmospheric Water Generator” awards (IP) patents intellectual property & certificates in succession since 1998. WaterMicronWorld Technology is popular among the markets of the Middle East, Latin America, Africa and South East Asia with its merits of advanced technology, novel design, tight structure, reliable operation and low consumption etc.

In order to occupy the international market, in early July, 2004, the board of ” WaterMicronWorld International” deciding to introduce a strategy innovation of (AWG) Atmospheric Water Generator Technology and move Thailand Production & Manufacturing to Fujian China.

AGREEMENT BETWEEN
WATERMICRON,LTD AND FUJIAN YUXIN ELECTRONIC
EQUIPMENT CO.

This agreement is by and between Fujian Yuxin Electronic Equipment Co. domiciled at, Rong Qiao Economic Development Zone, Fuzhou, Fujian, China 3500301, and WaterMicron,Ltd domiciled at, 41/185 PrachubKhiriKhan, HuaHin, Thailand 77110 on the commencement date of 18 October, 2004

THE AGREEMENT

- 1.1 The Principal will manufacture several different proprietary models of Atmospheric Water Generators (the "Product(s)") license under WaterMicron™ Patent and Private Licensing Rights of WaterMicron,Ltd.
- 1.2 The parties hereto are desirous of entering into this Agreement whereby WaterMicron™ will use their own patent brand of private labeled product, to be sold under the trademark of "WaterMicron™". The Product supplied to WaterMicron™ by the Principal shall bear the brand name WaterMicron™. WaterMicron™ shall choose and inform the Principal in writing as to the name and labels or logos to be used to identify this brand. The Principal cannot sell any product using WaterMicron™ patent technology, labels or logos of WaterMicron™ to any other parties without the consent of the WaterMicron, Ltd.
- 1.3 Subject to the terms and conditions in this Agreement, the Principal agrees to manufacture for WaterMicron, Ltd. (Atmospheric Water Generators) hereinafter referred to as the (Product(s)). Utilizing WaterMicron™ patent and designs build upon specifications. WaterMicron™ will decide on the brand name for the product. WaterMicron™ will bear the re-tooling costs incorporated in any significant product design or change. WaterMicron™ will be responsible for any molding or tooling costs needed for the creation of any product built specifically and will remain the exclusive property of WaterMicron,Ltd. and any other party including the Principal cannot use these new designs.

Both parties agree to the terms and conditions of this agreement that shall commence on the following date on 18 October 2004

WaterMicronWorld International is an industry leader with Atmospheric water generator, at the same time, it is the first integrated development and oriented company specializing in the R&D, production and sales of atmospheric water generator with technology strength.

The leading product-"Atmospheric Water Generator" awards (IP) patents intellectual property & certificates in succession since 2002. WaterMicronWorld Technology is popular among the markets of the Middle East, Latin America, Africa and South East Asia with its merits of advanced technology, novel design, tight structure, reliable operation and low consumption etc.

Insist Excellence. Create Glory

Over years, the company adheres to scientific and technological innovation road, and constantly strengthens the independent brand of product development and technological innovation. In line with the production concept of excellence, pays attention to cultivate a team with high-quality talents, forms a scientific and efficient management mode, and strictly implements ISO quality control system and obtains certificates of CQC, 3C, CE, TUC, UL, PSE etc.

Since 2004-2005, the company has established a good long term partnership with multinational distributors and agents. Meanwhile, our technology and products raised awareness to the military at home and abroad. Parts of our technology products have been recognized by the world's military.

WaterMicronWorld International development objective is to supply safe & clean drinking water as a responsibility to the world, and to be the leaders of Atmospheric Water Generator Industry.

WaterMicronWorld International will lead the 5th revolution in the human safety and health of drinking water, and prompt the development of technology as its own duty, and continues to play leading role in the "Drinking Water Technology Revolution".

WaterMicronWorld International has the capacity of producing & manufacture from 20 to 30 thousand units.

WaterMicronWorld International

Technology

WaterMicronWorld International Atmospheric Water Generation Technology, Using the humidity in the atmosphere to generate water from **15 liters** up to a maximum of **20,000 liters** per day. A perfect solution, fresh and pure drinking water from the Air for home/office and light industrial units.

AWG

Our home/office atmospheric water generator machine is a humidity and temperature driven self-contained unit making water from the air.

The AWG-Home/Office generates from 15 to 30 liters of pure drinking water per day depending on the specific atmospheric conditions of a particular geographic region. AWG- Home/Office simply replaces the need to rely on municipal water systems, transport, storage and consumption of bottled water.

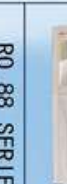

This AWG machines can reliably manufacture pure fresh drinking water in environmental humidity levels as low as 25%. AWG-Home/Office is the solution for a growing demand to supply safe and pure drinking water to the world.

Our Industrial AWG-C unit's produce 60, 100, 160, 200, 250, 500, 1,200, 1,500, 3,000, 5,000, 10,000 and 20,000 Liters per day of pure drinking water from the humidity (From the Air We Breathe).

WATER MICRON WORLD

Pure Drinking Water From Air

**10,000 to 20,000 Liters
Per Day**

Business Opportunity

With pure drinking water exponentially becoming the most precious commodity on our earth, then it is time we take a look at new technologies that move our sights beyond that of the bottle.

The bottle water industry has recently crossed the threshold of over 80 Billion United States Dollars worldwide as the largest selling beverage on this planet; although we never thought in our youth bottling water as a mainstay of our present existence would be the norm. Bottom line is that there is less than 3% pure water on our planet that is captured in the ground. Although our oceans are filled with billions of cubic feet of water, still the most abundant source comes from our air.

At WaterMicronWorld we know that trillions of liters of pure fresh drinking water in the sky that is virtually invisible to us humans on the ground. Oh yes, we see lots of water when it rains, but that is only a small amount that is really there for the taking.

WaterMicronWorld has the technology, machines and infrastructure to allow virtually any person on this planet to enjoy pure fresh drinking water, without the need of bottles, wells, and elaborate filtration methods for their municipal supply to give us the life sustaining sustenance we all deserve.

At first glance, WaterMicronWorld (Atmospheric Water Generators Technology) looks like an ideal business opportunity if you have got the money and basic business management skills. You can instantly get Atmospheric Water Generators Technology products, so you don't need to bother about the manufacturing or marketing.

You can also benefit from the experience and expertise of WaterMicronWorld. In short, all you need to do is to invest some capital and select appropriate Atmospheric Water Generators units, and you are all set.

You don't need to arrange for raw materials, set up manufacturing plants, as WaterMicronWorld will be taking care of these aspects.

Why instant success WaterMicronWorld (Atmospheric Water Generators Technology) will provide?

People today are tired of making frequent trips to the supermarkets stocking up on plastic bottled water, or relying on municipal filtration systems that need regular maintenance. Your customers will continually thank you for providing the purest, safest and best tasting drinking water that they extract from the air they breathe in the comfort of their own homes... What could be a greater gift or contribution to life?
