Dear ,

08 March 2016

What's in The Water Network for you personally as a water professional?

Sorry, I have just realized that we have been focusing on benefits to organizations, projects, initiatives and associations - but now it's your turn!

As a registered member you get your own, private, unlimited file storage that can be synced to your Dropbox and Google Drive. All files that you upload can be shared within the Network, or kept as your own private file storage for important water documents.

Our research team conducts interviews with selected experts and highlights them twice a month to over 135,000 water professionals. Get exposure with an expert interview or for posting your blog.

Be discovered by your area of expertise, and ranked based on experience, recommendations and publications.

This summer we will be launching a Water Domain Expertise listing.

Don't miss out, [register today](#) to be included.
