Technology at work for You

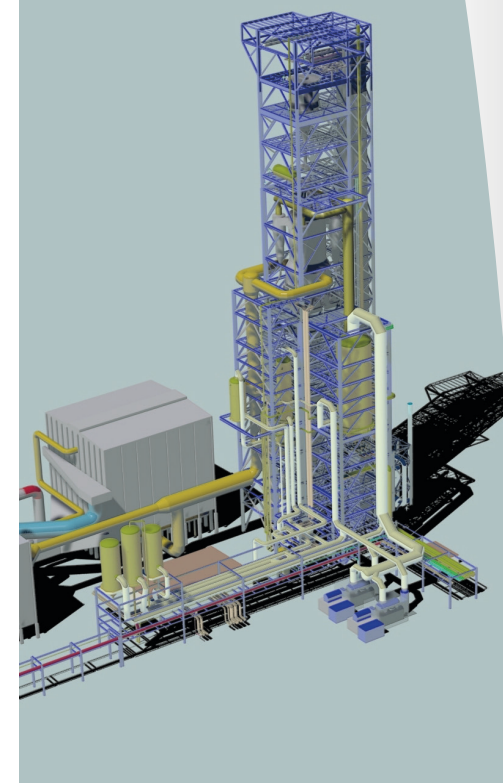

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

Active since 1999 in the field of water treatment WEnCo, which stands for Water Engineers & Consultants, is an Italian engineering firm having its core business in the design of systems for industrial water treatment and distribution.

Through the balanced management of modern and traditional technologies, WEnCo provides rapid-deployment solutions at competitive cost, always complying with standards and quality demanded by customers.

Among our Clients we count Business Consulting Companies, Engineering Firms, Companies and individuals. Services of Project Management and Business consulting are now available on demand as advisory services.

Born as a professional practice, today WEnCo is an independent firm led by four senior associate partners, operating through a network of Professionals with sound experience in the chemical processing, mechanical design, civil and electrical engineering.

OUR TEAM IN NUMBERS

PERMANENT STAFF: 4 Senior Engineers
3 Junior Engineers
1 Administrative
INDEPENDENT STAFF: 2 Senior Engineers
4 Junior Engineers
4 Design Engineers

TOTAL MAN-HOURS CAPACITY
25.000 LHMY

SOFTWARE AND TOOLS

IVIEWOPS (*)
Autodesk Plant Design Suite (**)
COADE Caesar II 5.1 (**)
Algor pipepack 23.1 (**)
Bentley Autopipe XM (**)
GRAPHISOFT Archicad 17 (**)

Notes:

(**) with authorized subcontractor

CERTIFICATIONS AND LIABILITY

WEnCo is licensed and registered for the practice of engineering services at CNI. VAT 03697360281

WEnCo is insured against any claim for civil liability with Professional Indemnity Insurance (DPR 137/2012).

INDUSTRIAL ENGINEERING

- Project Services
- Process Engineering
- Mechanical and Piping Engineering
- Electrical Engineering
- Automation and Control Engineering
- Civil and Structural Engineering

CONSULTING SERVICES

- Project Management
- Project Supervision and Monitoring
- Business Development
- Budgeting and Costing
- Business and Competitive Intelligence
- Strategic Marketing Planning

flexible solutions for water treatment

ENGINEERING

A decade after its founding, WEnCo is earning a good reputation for its projects outcome, as a result of light engineering and very simple solutions, chosen among the available state-of-the-art.

By both concentrating and expanding our available resources, we have created a highly efficient network of competence and specialised knowledge covering the sectors of water, wastewater and environmental engineering.

WEnCo's expertise incorporates today all major engineering disciplines including Chemical, Mechanical Electrical and Civil, providing comprehensive solutions for the management of Industrial water and wastewater.

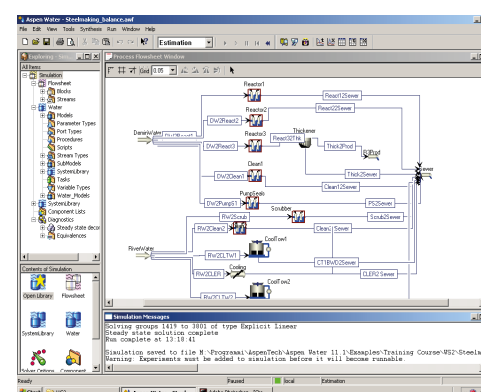

Serving Clients in many sectors, our team is equipped with the latest tools and technologies for process simulation, CAD and BIM modeling, piping stress analysis, finite elements design of steel and steel-concrete structures.

Front End Engineering Design (FEED) is the engineering design approach used to manage projects, focusing on the technical requirements as well as on the rough investment cost for the project.

“WEnCo provides rapid-deployment solutions at competitive cost”

CONSULTING

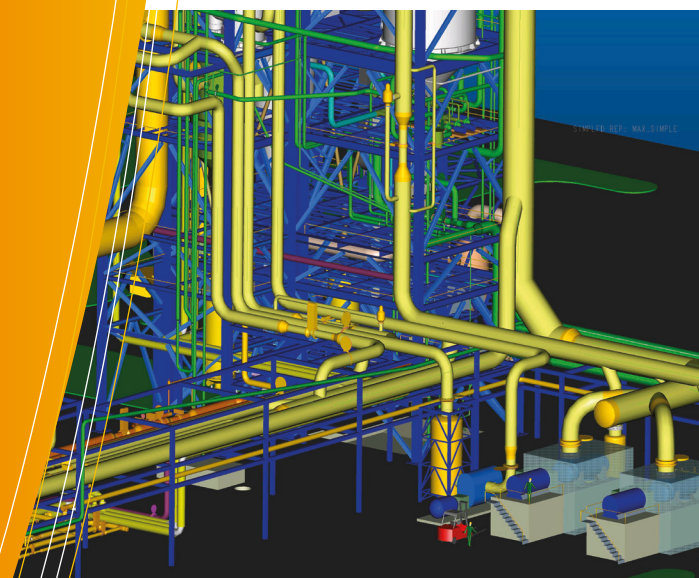

Besides developing engineering, WEnCo provides consulting and operational services such as tender and project management, project supervision and monitoring, prequalification and tender adjudication services.

Our tender management services are aimed at supporting Companies to source and win more tenders.

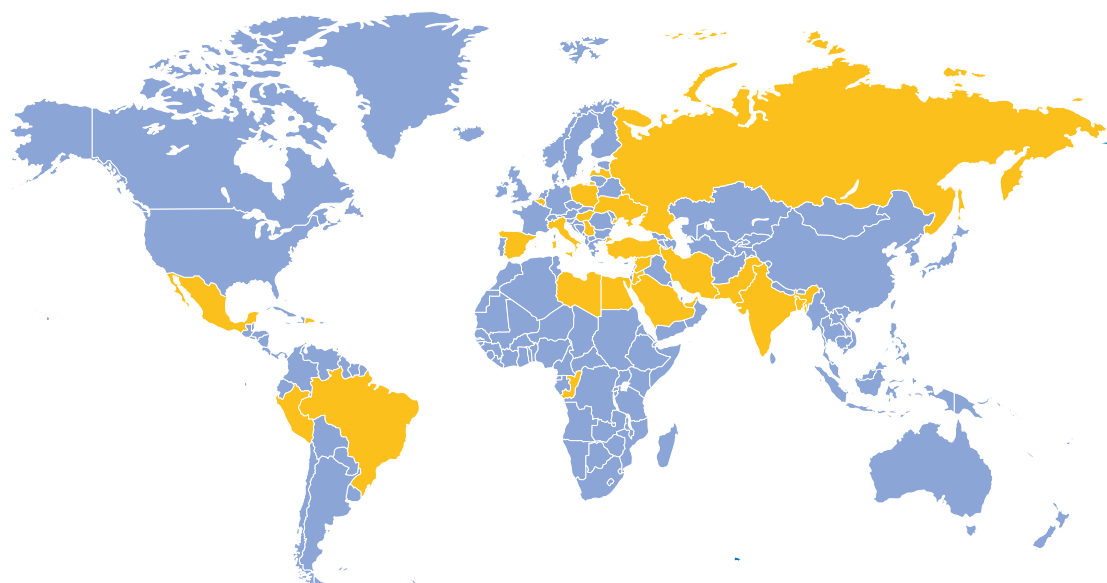

Our project management services help our Clients apply project management and practices to improve business performance, delivering projects that meet cost, schedule and quality targets.

The deal of experience gained over the years enables WEnCo to provide effective Business Development and Business Intelligence Services (BI). A broad network of consultants, agents, suppliers and Clients, allows WEnCo to get and to analyze data, making then analytical results available to successful corporate decisions. Gaining competitive advantages over competitors, BI systems can also help companies identify market trends and spot business problems that need to be addressed.
