

Volatile Organic Compound Abatement and Odour Control Products

Products for controlling volatile organic compounds and other odorous compounds in the air released during the cleaning of crude oil storage tank, land remediation, operation of sewage treatment works, etc.

VOLATILE ORGANIC COMPOUND ABATEMENT AND ODOUR CONTROL

Code	Product	Details
DC142	VOC ABATEMENT/ DEODORISER CONCENTRATE	• Control and neutralise odours and emissions around and during work on process plant, refineries, oil storage depots, site remediation, etc. • Solubilises hydrocarbons, sulphides, mercaptans, etc., from air into liquid phase on contact with aerosol, neutralising odours • Usage: dilute 1 part in 500 parts of clean water • Contains biodegradable surfactants and solvents, derivatives of long-chain fatty acids, perfume (no artificial musks)
DC143	VOC ABATEMENT/ DEODORISER + AIR SANITISER CONCENTRATE	• Control and neutralise odours and emissions around and during work on sewage and wastewater treatment works, landfill sites, site remediation, etc. • Solubilises hydrocarbons, sulphides, mercaptans, etc., from air into liquid phase on contact with aerosol, neutralising odours • Usage: dilute 1 part in 500 parts of clean water • Contains biodegradable surfactants and solvents, derivatives of long-chain fatty acids, perfume (no artificial musks) • Additionally contains a synergistic blend of biocides to formulated to kill bacteria and fungi in contaminated water aerosols produced by plant and works, etc., on contact with aerosol of product solution
DC144	UNPERFUMED VOC ABATEMENT/DEODORISER CONCENTRATE	• Control and neutralise odours and emissions around and during work on process plant, refineries, oil storage depots, site remediation, etc. • Solubilises hydrocarbons, sulphides, mercaptans, etc., from air into liquid phase on contact with aerosol, neutralising odours • Usage: dilute 1 part in 500 parts of clean water • Contains biodegradable surfactants and solvents, derivatives of long-chain fatty acids
