Dear ,

22 March 2016

We would like to share with you an exciting use case of a Digital Workspace for a project that impacts over 450 million people. Statistics show that teams that are working together in the real world are 40-60% more efficient when supported by a virtual workspace.

We are proud to announce our latest Digital Workspace, the [Knowledge Community](#) for the “National Mission for Clean Ganga” that brings together the thousands of stakeholders involved in cleaning up one of the most polluted river basins in the world. The Mission Ganga Knowledge Community is owned by the Indian Ministry of Water Resources, River Development and Ganga Rejuvenation and hosted by The Water Network.

If you have experience in past river restoration projects and would like to participate in this incredible mission, please let me know.

Vishakha Rajput  
COO, The Water Network

## Trending Technology

### Mitsubishi Develops Energy-Saving MBR

Mitsubishi Electric Corporation announced that it has developed a compact membrane bioreactor (Eco-MBR) that recycles municipal and industrial wastewater with low-energy consumption.
