

DRIZZLE

RAINWATER HARVESTING SYSTEM

- BE PREPARED
- BE RESILIENT
- BE SUSTAINABLE

The DRIZZLE kit is an innovative solution to rainwater harvesting designed for use by small farmers and homes.

The standard DRIZZLE kit can collect approximately 40,000 litres per year in arid and semi-arid areas. This will allow a daily use of over 100 litres. Larger kits may be designed to supply > 1,000 litres/day.

WHY CHOOSE DRIZZLE?

- very simple to install
- managed by individual
- zero evaporation and contamination
- extremely efficient
- allows farmers to irrigate throughout the dry season

1: Plastic liner is laid on gently sloping land

2: Rainfall flows to outlet

3: Water is stored in a flexible "pillow" tank for household or irrigation needs
