

Fast. Simple. Secure. Automated Water Metering Infrastructure

Water Pigeon is an innovative alternative to traditional AMI/AMR water meter reading.

HOW IT WORKS

Water Pigeon integrates AMI into the water meter lid and uses a combination of optical character recognition (OCR) and the cellular networks for reliable data communications.

WATER PIGEON BENEFITS

- Works with existing meters
- Uses existing cellular infrastructure
- Rapid deployment
- Avoids customer outages
- Low capital cost
- Low life-cycle cost

Fast. Simple. Secure. **Automated Water Metering Infrastructure**

SYSTEM FEATURES

Water Pigeon deploys rapidly, without the extensive capital and operational costs associated with traditional AMR/AMI. Installation can be completed in 5 minutes or less. The number and frequency of billing reads can be altered remotely by the utility, providing data for water bills, leak detection, water system performance testing, water conservation monitoring and water resource analytics.

- Meter Reading
- Leak Detection
- Data Analytics and Graphing
- Remote Auditing
- Remote Schedule Changes and Firmware Updates
- Tamper and Theft Detection
- Web Interface
- Field Technician Tools
- Secure Utility Access
- Encrypted Data Storage
- Multiple Cellular Network Access
- Automatic Network Selection (best signal)
- 20 Year Battery Life

RECOGNITION

During the past year, Water Pigeon received several awards including Winner 2016 Most Innovative New Product Award from CONNECT San Diego, and winner of EvoNexus Demo Day 2016.

AVAILABILITY

Water Pigeon completed Phase I piloting in June 2017 with great results. Phase II piloting is scheduled to begin early fourth quarter 2017 with several U.S. water utilities. Water Pigeon anticipates entering the market the first quarter of 2018. Please contact us for further information.
