

As a pioneer in the South African water industry NuWater is a specialist in advanced water treatment solutions focussing on medium to large scale capacities for a variety of water sources including ground, surface, sea, industrial and effluent. NuWater is able to customise solutions specific to the treatment requirements of its client.

NuWater offers mobile, modular and rapidly deployable water treatment solutions. NuWater has a large rental fleet available for short and long term deployment. The additional advantage of NuWater's modular solutions is the ease of relocating and redeploying the units elsewhere. This ability to relocate also provides additional flexibility when treating ever changing feedwater sources.

Making use of the latest in innovative technologies and best in class equipment, NuWater has positioned itself as industry experts in water filtration and treatment. This includes but is not limited to clarifiers, multi-media filtration, cartridge filtration, reverse osmosis, seawater desalination systems and sewerage treatment plants.

If you would like to talk to us further or if you would like more information please feel free to contact us on email or on our office number, alternatively you can visit our website.

If you would NuWater to provide input on a possible solution such as size, cost and delivery the following information would be required:

- ⚙ Detailed water analysis
- ⚙ Specifications required after treatment
- ⚙ Quantity of water needed per hr. & per day
- ⚙ Feed water source/type
