

December 2014

Dear ,

I am delighted to introduce this first edition of the The Water Network newsletter, a regular publication designed to keep you well informed on trending technology, professional insights, and news in the global water sector. You can be a part of this channel by sending your hot topics to contact@aquaspe.com.

Enjoy the read, and happy holidays!

Trudi Schifter
CEO, AquaSPE

Global Water Intelligence New Report Highlights Areas of Opportunities

Water for
Offshore Oil & Gas

GW Intelligence states that the choice of water treatment technology is becoming increasingly important where production challenges are higher: in ultra-deep waters, enhanced oil recovery projects, and mature fields with high volumes of produced water. In 2014, the global market for water treatment solutions for the offshore oil and gas industry is estimated to be worth \$1.76 billion.

OxyMem Receives SEAI Sustainable Energy Innovation Award

OxyMem MABR

OxyMem received the SEAI award for their breakthrough technology for the wastewater aeration market which tackles the industry's biggest challenge – energy demand. For more than 100 years wastewater treatment has relied upon energy intensive processes which compress large volumes of air to provide oxygen to the bacteria breaking down the pollutants.
